ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RADAR AVAILABLE : How and Where

(19 Mar 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____), IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.

Continued on next page.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

(a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.

(b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
"(aircraft identification) THIS IS (name of radar site), (instructions)"
The instructions will normally consist of one of the following:

(a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)

(b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).

(c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).

(d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).

(e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
(a) radio contact with the director is lost.
(b) notified by the radar director that radar contact has been lost.
(c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.
(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights. W - Without voice. BC - Back course BC-restricted = Not suitable for approaches

DIRECTORY OF AIRPORTS – LEGEND

ALWAYS CHECK NOTICES TO AIRMEN SECTION

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.

2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.

3. When city and airport names are identical, the airport name is omitted to conserve space.

4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

U: Unicom (Aero Advisory Station transmitting and receiving on 122.8 mc). Operates during airport hours only.

FUEL OCTANE

F1: 80 oct., at least
F2: 80/87 oct., and lower
F3: 91/96 oct., and lower
F4: 100/130 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

✓ HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

(19 Mar 1957)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 1, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

TEMPORARY CONTROL AREA EXTENSION: Effective 0001 CST, April 1, 1957 to 2400 CST April 5, 1957, unless otherwise advised the following control area extension is amended as follows:

LAKE CHARLES, LA. Control Area Extension is amended to read: "All that airspace within a 40-mile radius of the Lake Charles, La., rdo rng stn excluding the portion which overlaps the Houston (Beaumont-Palacios-Houston) Control area extension, and excluding the portion below 3000 ft. MSL which overlaps the temporary King Cole Restricted Area".

NOTE: At the end of this period (April 1 - 5, 1957), Lake Charles, La. Control Area Extension as designated prior to this temporary amendment shall again become effective.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

TROY, ILLINOIS VOR SHUTDOWN: Until approximately April 1, 1957, the Troy, Illinois VOR will be shut down for modernization. During the interim period, the following MEA's can be utilized:

When route of flight includes changing to any airway with a higher MEA, flight will be cleared to higher MEA prior to crossing intersection so that intersection will be received to enable pilot to make turn.

Airways, alternate airways and intersections formed by the shutdown VOR will not be utilized except where noted to clear aircraft.

Air carriers should check to determine need to request any direct routes using combination facilities if they desire lower altitudes or require added transitions to approach procedures.

FCC AIRCRAFT RADIO STATION LICENCES: The Federal Communications Commission calls attention to the fact that all radio transmitters used aboard civil aircraft must be licenced by the FCC and that the station licence must be carried aboard the aircraft at all times. Application for renewal of expiring or expired licences should be submitted on FCC Form 404. Copies of this form may be obtained from the FCC, Washington 25, D. C., or from any FCC field office.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

FLIGHT ADVISORY AREA - SPOKANE RAPCON CENTER: Effective April 22, 1957, the Flight Advisory Area for the Spokane RAPCON Center will be as follows:

From a point 49°N 115°W southward to a point on Green 2, 25 miles E of Mullan Pass; thence S to 46°N 115°W; thence W to 46°N 117°30'W; thence NW to a point on the eastern boundary of Red 53, 25 miles NE of Walla Walla MF Radio Range; thence to a point on the W boundary of Victor 112, 25 miles NE of Lamar Intsxn; thence SW to the southeastern corner of Prohibited Area P-246; thence W and northwesterly along the southern and southwestern boundaries of Prohibited Area P-246; thence along the western boundary of Prohibited Area P-246 and the eastern boundary of Restricted Area R-247 to the northeastern corner of Restricted Area R-247; thence to a point on Green 2 and Victor 2, 25 miles E of the Ellensburg MF Range; thence N to 49°N 120°W; thence E along 49°N to point of beginning.

Also, note that the voice call is changed to Spokane center or Spokane approach control, whichever is applicable.

AERONAUTICAL CHART CORRECTION: Correct the following Aeronautical Chart as follows:

Saline Sectional Chart, dated November 20, 1956, change elevation of Lyons Municipal Airport, Lyons, Kansas from 700 to 1700 feet.

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 190)
(March 15, 1957)

(1) In Section 608.27, the Deblois, Maine, area (R-397), amended on August 11, 1954 in 19 F.R. 5041, is further amended by changing the "Controlling Agency" column to read: "4060th Refueling Wing, Dow Air Force Base, Bangor, Maine."

(2) In Section 608.37, the Isle of Shoals, New Hampshire, area (R-96), amended on May 4, 1956 in 21 F.R. 2977, is further amended by changing the "Designated Altitudes" column to read: "18,000 feet MSL."

(3) In Section 608.54, the Camp Pickett, Virginia, area (R-44), amended on May 4, 1956 in 21 F.R. 2977, is further amended by changing the "Controlling Agency" column to read: "Headquarters, Second U.S. Army, Fort Meade, Maryland."

(Part 608 - Restricted Area - Amendment 191)
(April 10, 1957)

In Section 608.61, the Eagle River, Alaska, area (R-348), amended on October 31, 1951 in 16 F.R. 11066 is redesignated as follows:

"Description by Geographical Coordinates: Beginning at lat 61-27-00, long. 149-44-00; thence to lat 61-16-48, long. 149-43-30; thence to lat 61-17-36, long. 149-35-36; thence to lat 61-22-10, long. 149-33-48; thence to lat 61-24-40, long. 149-33-48; thence to lat 61-25-24, long. 149-30-00; thence to lat 61-29-30, long. 149-30-00; thence to point of beginning. Designated Altitudes: Surface to 50,000 feet. Time of Designation: Continuous. Controlling Agency: CG, U.S. Army, Fort Richardson, Alaska."

(Part 608 - Restricted Area - Amendment 192)
(April 1 - April 5, 1957)

In Section 608.26, the King Cole, Louisiana, Temporary Restricted Area, amended on March 5, 1957 in 22 F.R. 1328, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 30-30-00, long. 93-30-00; thence N along long. 93-30-00 to lat 31-00-00; thence E along lat 31-00-00 to long. 93-00-00; thence S along long. 93-00-00 to U.S. Highway 190 near the town of Reeves, La.; thence W along U.S. Highway 190 to the North Control Zone Extension of Lake Charles; thence around this Control Zone Extension back to lat 30-30-00, thence W along lat 30-30-00 to point of beginning."

(Part 608 - Restricted Area - Amendment 193)

In Section 608.26, the Sledge Hammer, Louisiana, Temporary Restricted Area, amended on March 6, 1957 in 22 F.R. 1378 is further amended by changing the "Effective Date" to read "May 18, 1957 through May 21, 1957."

COMPULSORY REPORTING POINTS FOR AIRCRAFT OPERATING BELOW 15,200 FEET MSL: Effective immediately, the following reporting point is compulsory only for aircraft operating below 15,200 ft MSL:

CULBERSON, TEXAS VOR.

CIVIL AIRWAY, CONTROL AREA AND REPORTING POINT AMENDMENTS: Effective April 11, 1957, unless otherwise advised the following civil airway, control area and reporting point are amended in whole or in part as follows:

CIVIL AIRWAY: - Blue Civil Airway No. 18 (Paterson, N.J. to United States-Canadian Border), caption changed and is amended by deleting the entire first portion between the intsxn of the NE course of the Philadelphia, Pa., rdo rng and the SW course of the New York, N.Y. (LaGuardia) rdo rng and the intsxn of the NE course of the Idlewild, N.Y. rdo rng and the E course of the New York, N.Y. (LaGuardia) rdo rng. (Note: deletes portion between Freehold Intsxn and Glen Cove Intsxn.)

CONTROL AREA: - Blue Civil Airway No. 18 (Paterson, N.J. to United States-Canadian Border), caption changed.

REPORTING POINT: - Blue Civil Airway No. 18 (Paterson, N.J. to United States - Canadian Border), caption changed.

MINIMUM EN ROUTE ALTITUDE: Effective April 11, 1957, the 1500-Foot MEA on Blue 18, Freehold Intsxn, N.J. - Idlewild, N.Y. LFR - Glen Cove Intsxn, N.Y. is deleted.

ON-REQUEST REPORTING POINTS: The following on-request reporting points are redesignated and cancelled and shall become effective as indicated:

REDESIGNATE: March 29, 1957:

FLATBUSH, N.Y. INTSXN - the intsxn of the Idlewild, N.Y. VOR direct radial to the Flatbush FM and LaGuardia, N.Y. lclzr course or the SW course of the LaGuardia LFR.

REDESIGNATE: April 11, 1957:

(1) CHARLOTTE HALL, MD. (VHF) INTSXN - the intsxn of the 151°T radial of the Washington, D.C. TVOR and the 186°T radial of the Baltimore, Md. VOR.

(2) DODGER, N.Y. INTSXN - the intsxn of the LaGuardia, N.Y. lclzr course or the SW course of the LaGuardia, N.Y. LFR and 296° M radial of Idlewild, N.Y. VOR.

(3) MINEOLA, N.Y. INTSXN - the intsxn of the NW course of the Mitchel, N.Y. LFR and the 037° M radial of the Idlewild, N.Y. VOR.

(4) PLAINFIELD, N.Y. INTSXN - the intsxn of the Wilton, Conn. VOR 241°M radial and the 124°M radial of the Stroudsburg, Pa. VOR.

CANCEL: April 11, 1957:

(1) GLEN COVE, N.Y. INTSXN - the intsxn of the E course of the LaGuardia, N.Y. LFR and the NE course of the Idlewild, N.Y. LFR.

(2) JERSEY, N.Y. INTSXN - the intsxn of the NE course of the Newark, N.J. LFR and the NW course of the Idlewild, N.Y. LFR.

(3) RED BANK, N.J. INTSXN - the intsxn of the SW course of the Idlewild, N.Y. LFR and the NE course of the Philadelphia, Pa. LFR.

(4) SHERMAN, N.Y. INTSXN - the intsxn of the MacArthur, N.Y. ILS and the SE course of the Idlewild, N.Y. LFR.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

CPR	Casper, Wyo., Casper Air Terminal (Name change)
DYS	Abilene, Texas, Dyess AFB (Change from AAB Abilene AFB 0001Z April 2)
GAF	Grand Forks, N. Dak., AFB (Assignment April 2)
LCH	Lake Charles, La., Lake Charles Airport (Change from AFB April 2)
*LKC	Lake Charles, La., AFB (Assignment 0001Z April 2)
MIB	Minot, N. Dak., AFB (Assignment April 2)
MXN	West Palm Beach, Fla., Morrison AFB (Deletion)
*PBI	West Palm Beach, Fla., Palm Beach AFB (Name change)
UMH	Yuma, Ariz., Vincent AFB (Name assignment)
WN	Winisk, Ont. (Assignment)

* Preceded by letter "K" for international usage.

NON-STANDARD HOLDING PATTERN: The following non-standard holding pattern shall become effective April 11, 1957:

COLTS NECK VOR - direction of holding - SW on the 253° radial (V-166); direction of turns - LEFT: time - one minute. (NOTE: Cancel the current non-standard holding pattern on the 214° radial.)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Austin
Albuquerque
Dallas

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 23 Bridgeport, Conn. Correct WB telephone number to read: DRexel 8-2344.
(2) Page 24. West Palm Beach, Fla. Correct CAA telephone number to read: TEmple 2-2022.
(3) Page 26. Greensboro, N. C. Correct WB telephone number to read: BRoadway 2-7501.
(4) Page 27. Providence, R. I. Correct WB telephone number to read: REgent 7-0051*
(5) Page 27. Lubbock, Tex. Correct WB telephone number to read: POrter 2-3479*.
(6) Page 100 - (Airborne) Ellensburg, Wash., (Bowers Fld.) Correct VOR rcvr check point to read: 255°:
(7) Page 107 - (Ground) Santa Fe, N. Mex., (New Municipal) Correct VOR rcvr check point to read: 333°; at junction of taxiway and approach end rnwy 33.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outer marker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

JACKSONVILLE CENTER-TAMPA RAPCON CONTROL AREA AND FLIGHT ADVISORY BOUNDARY REVISION: Effective 0001E, April 11, 1957, revise the Jacksonville Center-Tampa RAPCON Control Area and Flight Advisory boundaries from point of existing TPA-JAX bndry at 28-28N, 82-00W; northward along the 82-00W meridian to 29-42N, 82-00W; thence westward direct to 29-42N, 82-04W; thence northward direct to 29-56N, 82-04W; thence westward direct to 29-56N, 82-40.50W; thence southerly along the 82-40.50W meridian to the junction with V159 thence in accordance with the presently defined Tampa Area.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

[redacted]: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO:VOR operg., test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14)
BIRMINGHAM ARPT: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
DOTHAN-NAPIER FLD: Caution - helicopters from Fucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in Montgomery-Maxwell area should avoid Maxwell AFB and Dannelly Fld control zones unless in contact with and cleared by the appropriate twr. Extensive flying engaged in at both arpts including practice instr apchs and simulated "flame-outs" by jets from 6500' to Dannelly Fld. (1-22)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx ly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)
[redacted]: AJO ARPT: Beacon and lights inoperative. (6-18)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215° 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
DOUGLAS-BISBEE-DOUGLAS INTNL ARPT: Until about Apr 15, const on various taxiways - caution. (3-4)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
GRAND CANYON (S. RIM) ARPT: Due weather conditions, clsd until Apr 1. (12-26)

ARIZONA: PHOENIX-SPECIAL NOTICE: Extreme Caution - area between Phoenix VOR and Hassayampa VOR on Victor arwy 16 and Green 5. Extensive high performance, jet acft cross these arwys when departing and arriving Luke AFB in connection with training conducted Gila Bend Restricted Area (R-309, R308). This tfc generally crosses V 16 and Green 5 between Hassayampa VOR and town of Tolleson (11 mi W of Phoenix) at alts of 5000' MSL and below - 0715 thru 1600, Mon thru Fri. (3-1)

**PHOENIX-PARADISE ARPT: Open on racing days only. Private arpt. Data rcvd too late to correct Arpt Directory. (3-13)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000';060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz. to be conducted week-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'.

VALLE-RADIO: About April 20, VOR will be cmsnd. Freq: 115.2 mc. Ident: VLE. Lctd lat 35-37-00, long. 112-09-30. Elev: 6000' MSL. Class: VORW. (3-1)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: **CROSSETT ARPT: 433' MSL lgtd twr erected 4.9 n mi SW(228°T) at lat 33-07-51, long 91-56-54. (2-25)

FLIPPIN-RADIO: Feb 12, VOR shut down until approx April 16. (2-12)

HARRISON ARPT: Fld clsd nights.

**LITTLE ROCK-ADAMS ARPT: 168'(421'MSL) lgtd twr erected 3 n mi NW(332°T) at lat 34-46-20, long 92-15-19. (3-14)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends. VOR shut down until approx March 28 - relct lat 33-30-50, long 94-04-20. (2-27) VOR flights authorized to use TXK LFR in lieu of VOR. (1-3)

CALIFORNIA: AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°, 35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flight-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flight-checked on arwy radials only.

DIXON ARPT: Closed. (8-30)

DONNER SUMMIT-RADIO: Soon H fac freq will be changed to 375 kc. (3-1)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has light course roughness all quads. Only arwy radials flight-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd.

CALIFORNIA: Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

KLAMATH-McBETH ARPT: Closed. (6-13)

LONG BEACH RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

*LONG BEACH ARPT-TOWER: March 1, ASR trans: 233, 242;110.3, 119.5, 121.9, 123.8, 126.18, 173.75, 257.8, 348.6, 379.1, 121.5, 243.0. Gds: 122.5 mc. About May 1, rcvr 122.5 mc will be discontinued and concurrently 122.6 mc will be cmsnd. (3-4) ILS glide slope subject to indef shutdown periods during arpt const. (8-18) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch light lane discontinued indefinitely. (1-1)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather broadcasts shut down - modernization. Manual broadcast continues on VOR and both VOR and LF combined.

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000'MSL. (10-23)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or btwn LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flight should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications durg IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000';60°-80°, 35 n mi at 5000';280°-290°, 35 n mi at 4000';340°-350°, 35 n mi at 6000';350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Concrete paving construction in progress in former gravel area btwn rnwy 27R-9L and taxiway along S side of hangars 3, 4, and 5. Area hazard mrkd. Taxi with caution. (12-8)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)

CALIFORNIA: ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000';330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)
ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000';150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000';225°-300°, 43 n mi at 5000';300°-20°, 43 n mi at 7000'.
SAN CARLOS-SAN MATEO COUNTY ARPT: Mound of dirt adj taxiway at N end has barricades and lgtd with flares. (1-18)
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)
SAN DIEGO-LINDBERG FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control zone Notam
SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)
SAN FRANCISCO INTNL ARPT: 130' high pile-driver lctd 2000' W of term bldg - mrkd day and ngt. (2-13)
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23)
**SANTA BARBARA ARPT: Rnwy lgts 15L-33R perm discontd. (3-19)
SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)
SANTA PAULA ARPT: Work in progress S side of fld. Caution - trucks immediately S of rnwy. Area S of rnwy soft, muddy. (9-1)
STOCKTON FLD: Intensive helicopter trng conducted in vcnty of fld btwn 0800-1700 daily xcpt Sat and Sun. Acft utilizing Stockton rdo rng for simulated rng apchs - exercise extreme caution. Minimum altitude for low apchs is 528' MSL. (8-3)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi;250°-280°, 40 n mi at min en route alt. (3-14)
THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150°-at 6000'; 105° thru S and W to 305° over water not checked. (10-11)
UKIAH ARPT: Use surfaced rnwy 34-16 only. Dirt strip closed for winter. (10-26)
VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator incp 2300-0700. (2-25)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360° 045°, below 15,000'.
WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.
YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200'; lgts, BL4; fuel, F2.
COLORADO: CHEYENNE WELLS-ARPT: Closed for winter due dust. Land at own risk. (10-29)
COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)
DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segmented circle de-

COLORADO: notes rgt hand tfc. 2-way rdo rqrd. (9-12)
PUEBLO MEMORIAL ARPT- SPECIAL NOTICE: Ordnance depot 6.8 n mi ENE at lat 38-20-00, long 104-22-14 conducting demolition work days. (2-7)
CONNECTICUT: BRIDGEPORT-RADIO: Z marker very weak. (10-13)
HARTFORD-BRAINARD FLD: Dike apch lgts to rnwys 2, 20, 23 resume normal opern. Other section of dike unlgtd. Rnwy 9-27 clsd. Rnwy may be used for taxiing only. (12-27)
Fld will close as of midnight Mar 31, 1957 due to lack of operg funds. (2-28)
SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.
SOUTH GLASTONBURY-RIVERSIDE SEAPLANE BASE: Clsd until June 1. (11-15)

MM lctd 3547' from apch end of rnwy. Elevation 8' MSL. (3-18) FLD: ALL ACFT: Clsd to jet, motorless and fighter type acft and acft over 150,000 lbs. 2-way rdo rqrd. Rotary wing acft operg at terminal, NATCC preferential rnwy system in effect. Unusable lndg area rnwy 29 mrkd with red lgts. Earth mound 1250' E of threshold lgts rnwy 29 with obstn lgts 20' high. Hangar const lctd 600' N of centerline W end rnwy 11. Equip. active on taxiway area immediately adj to site. Taxiway N clsd to all operns from old run up block westbound to apch end rnwy 11. Const-taxiway B from taxiway A at intsxn F to terminal apron, 300' parallel to taxiway A. New taxiway between Brewster hangar and terminal ramp open. Taxiway from Brewster hangar to hangar 12 clsd. Men, equip on fld. MILITARY: Clsd to mil acft xcpt on ofl bus. Clsd to all fighter type, jet acft regardless of ofl orders. Restrictions are not applicable to N.J. National Guard T-6, F-51, C-45, C-47 type acft based at Newark Arpt. 130' cranes operg in seaport area E of apch end rnwy 29. (8-16) Soon, a 3000' standard hi-intensity centerline apch lgtg sys configuration A serving rnwy 22 will be cmsnd. (1-11) Amber screens on ctc lgts on both ends of rnwy 4-22 increased from 1500' to 2000'. 80' crane 800' NE of centerline from apch end rnwy 11 mrkd days and lowered nights. (1-25)
READINGTON-SOLBERG-HUNTERDON ARPT: Sod area clsd-use paved areas only.
RIDGEFIELD PARK-MELLOR-HOWARD SEAPLANE BASE: Const at E end of rnwy S side; pile drivers 60' high, along with barges on water on S side of river, lgtd. (9-14)
SOMERVILLE-SOMERSET ARPT: On W take-off start left turn as soon as practicable. NW take-off make gentle right turn as soon as practicable followed by wide left hand pat.
TETERBORO-RADIO: March 15 thru April 15, privately owned experimental talking beacon will oper on 124.6 mc, 0800 thru 1900 during VFR conditions only. Located at arpt. This is not a navigational aid. (3-12)
TETERBORO ARPT: Open ditches parallel to rnwy 1-19 E side and to S taxiway both sides. Shoulders rocky and rough. All grass areas subject to marsh conditions. Use rnwys only. Extreme caution taxiing on W end of S taxiway and to and from rnwy 24 to apch end. Open ditch parallel to rnwy 6-24 E side N of intsxn. NW/SE taxiway designated as rnwy 14-32 for civil and mil acft of gross rated take-off weight under 9000 lbs. Rnwy 32 clsd for take-offs, rnwy 14 clsd for lndgs. Rnwy 14-32 avail nights only on special req. Equip. on fld -days. Const adj to all paved surfaces. Helicopter lndg are now lctd 50' E of W taxiway opposite ctl twr. Clsd to jet propelled acft xcpt with prior permission of arpt manager. (3-11)
TRENTON-RADIO: TVOR usable dist 026°, 096°, 228°, 230° and 344° radials 17 n mi at min inst alt, other azimuths 4 to 17 n mi with moderate to severe roughness. (10-18)
TRENTON-MERCER COUNTY ARPT-TOWER: Rcvr 3023.5 kc inop until approx March 2. FLD: Acft using rnwy 24 on take-off cont straight out to Delaware Riv before executing left turn. All acft operns should be conducted on paved areas only, due to sink holes in sod.
WRIGHTSTOWN-McGUIRE AFB: VFR tfc controlled by radar up to 3000' within 7 mi radius of arpt and 5 mi both sides of centerline from McGuire LFR(WRI) to, and 10 mi beyond the Medford(MFX) bcn. All VFR acft are requested to call McGuire Apch Ctl before entering this zone. Civil freq 126.18 mc. Caution-exten jet operns durg VFR and IFR wea up to 20,000'. (2-11)
NEW MEXICO: ALBUQUERQUE-SPECIAL NOTICE: Until Sept. 15, captive balloons will be released from SE quad of Sandia Base lctd 34-57-30 N, 106-28-45 W. (9-13)
ALBUQUERQUE-KIRTLAND AFB-TOWER: UHF/DF 305.4 mc and ILS lclzr voice fac 110.3 mc out of service pending cmsng RAPCON fac. (3-12) FLD: Jet barrier operational, but unreliable, on W end rnwy 08-26 upon request. Lndg will not be made in overrun area and taxiing across barrier will be held to a min. (11-30) Jet barrier rnwy 21 cmsnd. First 2600' and last 1000' rnwy 21 clsd to all lndgs. Last 1000' rnwy 21 overrun area.
NEW MEXICO: Lndgs will not be made in overrun area and taxiing across barrier will be held to a min. First 2500' rnwy 17 and first 2500' of taxiway T-1 not visible from new ctl twr. (2-20)
ANTON CHICO-RADIO: About March 18, VOR will be shut down until approx April 12 - modernization. Durg this period, following arwys will be unusable: V-12 OTO-TCC, V-12N ACH-TCC, V-62 San Jose Int - Pleasant Hill Int, V-234 ACH-Conchas Dam Int.
CLOVIS AFB: Hvy jet tfc 0600-1500 hrs (MST) daily, Mon-Fri.
COLUMBUS-RADIO: DME coverage 216° thru 360° to 79°, 43 n mi at 10,000'. Coverage in Mexico not checked.
COLUMBUS, SITE 34, PHX-ELP ARPT: No aviation gasoline avail until further notice.
DEMING ARPT: Rnwys 26L-8R and 17-35 clsd to all tfc. (12-6)
FARMINGTON-RADIO: About April 20, VOR will be cmsnd. Freq: 115.3 mc Ident: FMN lctd: lat 36-45-00, long 108-30-54, elev. 5870' MSL. Class: BVOR. (2-18)
FARMINGTON ARPT: Rnwy 6-24 ruf at intsxn W taxiway. (10-11)
GRANTS ARPT: Erosion and loose sand near rnwys.
LAS VEGAS-RADIO: VOR has moderate to severe scalloping all courses beyond 35 n mi.
LAS VEGAS ARPT: Bndry and rnwy lgts inop. (4-4)
OTTO-RADIO: VOR radials usable 26 n mi. About April 15, VOR will be shut down until approx May 10 - modernization. Durg shutdown, the following arwys will be affected: V-12 MEA ABQ-ACH 12,000'; V-83 MEA SAF-CNX 10,000'; V-60 OTO-San Jose Int unusable; V-60S ABQ-OTO unusable. (3-14)
SANTA FE-RADIO: March 5, VOR shut down until approx April 5-modernization. Durg shutdown, following arwys will be affected: V19 and V190 Grants-Las Vegas - MEA 14,500'; V83 Otto-Santa Fe Int - MEA 14,500'; Int Otto 334°-Las Vegas 252° radials temp designated as Santa Fe Int. V62 Santa Fe - San Jose Int unusable. (3-4)
TUCUMCARI-RADIO: Soon VOR will be shut down. Durg shutdown, following arwys will be affected: V-12 ACH-AMA MEA 15,000'. V-12N AMA-ACH, V-60 Conchas Dam-Pleasant Hill Int, V-192 TCC-CNX and School and Field Ints on V-62 all unusable. (2-14)
ZUNI-RADIO: VOR has moderate scalloping SW quadrant. (4-20)
NEW YORK: BETHPAGE-GRUMMAN ARPT: Hrs of opern 0700-1830E, Mon-Sat only. (10-25)
BINGHAMTON-RADIO: Erratic ADF action 4 to 13 n mi SSE of facility at min instr alt.
BINGHAMTON-BROOME COUNTY ARPT-TOWER: Roughness vicinity MM. (10-19) FLD: Const equip and men adj to and on W ramp daily durg hangar const program. (10-4)
BUFFALO-RADIO: DME coverage 40°-110°, 39 n mi at min en route alt. (7-6)
CALVERTON-PECONIC RIVER ARPT: Hrs of opern 0800-2400E, Mon-Sat only. (10-25)
COOPERSTOWN ARPT: Caution-snow on rnwys durg winter months. Do not use first 600' of rnwy 23 due const thru April. (1-25)
DELANCY-RADIO: March 14, VOR operg test basis only. Freq: 110.2 mc. Ident: DNY. Lat 42-10-40, long 74-57-27. (3-13)
ELMIRA-RADIO: VOR has scalloping all quads. (3-14)
FARMINGDALE-REPUBLIC ARPT: Private arpt. Manufacturer's plant - official bus. only. Clsd to all operns unless previous arrangements are made by telephone to have twr open and adequate crash facs. Fuel unavail. transient acft. (4-5)
FLATBUSH-RADIO: About March 29, MHW will be decmsnd. (3-11)
GENEVA-SCENIC AIRE PARK ARPT: Closed. Services discontinued. Rnwy avail for emerg. use - no snow removal. (11-29)
HUGUENOT-RADIO: VOR coverage restricted to 18 n mi. 210° clockwise to 230° at MEA.
IDLEWILD-RADIO: VOR coverage 50°-75°, 17 n mi; 75°-50°, 26 n mi at min en route alt. About April 19, LFR will be decmsnd - relctn to vicinity Peconic, N.Y. Concurrently, April 19, MHW will be cmsnd at ILS OM site serving rnwy 4. Freq 353 kc. Ident: IDL. Lat 40-35-41, long. 73-48-28. (3-11)
JAMESTOWN ARPT: Const SW end NE/SW rnwy. N/S rnwy clsd-men, equip. on rnwys.
LAKE PLACID: Not a seaplane base. Do not land thereon.
MASSENA-RADIO: VOR radials 82°-230° have bends.
MASSENA-RICHARDS ARPT: 4' stakes mrkg all rnwys and taxi-strip lgts. (12-21)
NEWBURGH-STEWART AFB-RADIO: USAF VHF/DF bearings unreliable below 7000' in all quads. (9-23)
NEW YORK CITY AREA - SPECIAL NOTICE: Acft operating VFR be alert for all types of tfc from Newark, Teterboro, La Guardia, Idlewild, NAS Floyd Bennett, Westchester Co. Arpt, Mitchel AFB and Rockaway Arpt. VFR acft apchg Idlewild from S or W remain well off shore until reaching a point abeam SE of Floyd Bennett. VFR departures from R31L at Idlewild, unless cleared otherwise by Idlewild Twr, shall climb straight ahead to an alt of 1200' beofre turning left. Floyd Bennett tfc can normally be avoided by not exceeding a

NEW YORK: heading of less than 270° mag until abeam Floyd Bennett prior to proceeding on desired course. VFR acft not intending lndg at any of New York metropolitan arpts should avoid apch areas thereto below 2500'. Recommended crossing traffic plan crossing area at 2500' or above, ceiling permitting, avoid shoreline S of Flatbush, Floyd Bennett and Idlewild due hi-density tfc in that area. Acft arriving or departing Idlewild or La-Guardia requested to remain well clear of Mitchel AFB. (10-1)

NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat. within 4.3 n mi radius of arpt; in lndg join tfc pat. at or above 1200'MSL, weather permitting. This applies to New York International (Idlewild) Arpt; La Guardia Fld, N.Y., and Newark Arpt, N.J.

**NEW YORK-HELIPORT #1, PIER 41, MANHATTAN: Open daylgt hrs on 1-hr advance notice only. Telephone ALgonquin 5-1000, ext. 666. Restricted to float and skid type helicopters. (2-7)

NEW YORK INTERNATIONAL(IDLEWILD) ARPT-TOWER: About April 22, ILS serving rnwy 22 will be cmsnd. Lclzr freq: 110.9mc. Lctd 475' SW of NE/SW rnwy 22. Elev: 10' MSL. Bear: 222°. Ident: IWY. Glide slope freq: 330.8mc. Glide angle: 2.8°. Lctd 300' SE of centerline of NE/SW rnwy and 1248' from apch end of rnwy 22. Elev: 11' MSL. MM lctd 3400' from NE end NE/SW rnwy. Elev: 61'MSL. OM lctd 5.53 mi from NE end of NE/SW rnwy. Elev: 75'MSL. Alt over MM 240' MSL; OM 1500'MSL. Concurrently with cmsng of ILS, Elmont FM on back course ILS serv rnwy 4, will be decomsnd. (3-18) FLD: Lndgs and tk-offs prohibited unless acft equip. with functioning 2-way rdo, capable of direct direct 2-way rdo, capable of direct 2-way commun with ctl twr. Clsd to fighter type, motorless and jet propelled acft. Clsd to mil acft xcpt on offl bus. or flag rank or higher. Caution. Use paved surfaces only. Rnwy 1L-19R, 1R-19L and 7L-25R perm clsd for lndgs and tk-offs, avail. for taxiing. Rolling surface S end rnwy 7R-25L. NATCC preferential rnwy system in effect. 185' MSL ctl twr is highest arpt structure. Caution-taxi A-acft running up on clsd rnwys 7L-25R, S of intsxn with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Const in progress adj all paved surfaces. 150' cranes and hvy truck operns within arpt bndry-mrkd. Follow centerline all taxiways. New taxiways temp mrkd by delineators and/or taxiway lgts irregularly spaced. Unstable shoulders. Soon, a centerline apch lgtg system serving rnwy 22 will be cmsnd. System extends 3000' from rnwy pavement out into apch. System consists of green lgts across rnwy at threshold, a red bar lgt on each side of rnwy 100' from the pavement, a red bar lgt on rnwy centerline 200' from the pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. (3-6)

NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia apch ctl on 119.1mc regardless of wea. No UHF freqs avail for twr contacts. FLD: Closed to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. Lndgs and take-offs prohibited unless acft equipped with 2-way rdo, capable of direct commun with ctl twr on gnd ctl 121.7mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. General trucking, 40' crane, men and equip. operg inside base of dike-days. 500' apch end of rnwy 31 not usable for lndg acft-days. Obstns and equip. mrkd-flags days, lgtd ngts. Equip. parked 250 ft from centerline of rnwys when not in use. (9-28) Soon, combination left lane apch lgtg sys serving rnwy 4 consisting of 1500' hi-intensity lgts with 3600' neon lgts will be decmsnd. Simultaneously, 3000' standard hi-intensity centerline apch lgtg system configuration A will be commissioned. (1-11) Caution-use paved surface only, sod areas unsuitable for acft operns.

NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No ngt flying permitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)

**NEW YORK-WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 min advance notice (tel. Longacre 4-2073). Direct commun by two-way rdo on 122.8 mc rqrd before apch and takeoff. Caution-ship tfc in area. (9-27)

NIAGARA FALLS-RADIO: VHF/DF unreliable below 3000' in NE quadrant, 4000' SE & SW quadrant and 4500' in NW quadrant. (6-22)

NIAGARA FALLS ARPT: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara Riv as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16)

NIAGARA FALLS-COLONIAL VILLAGE ARPT: Closed due runway repairs. (2-23)

NEW YORK: OGDENSBURG ARPT: E/W rnwy clsd-construction. (4-24)

PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at min en route instr alt. DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)

PLATTSBURGH MUNICIPAL ARPT: VFR tfc pat. for all civil acft in vcnty of arpt is 800' to insure adequate separation from mil jet acft & jet turbulence. Non-rdo equipped acft will not enter Plattsburgh ctl zone unless ceiling is 2500' and visibility 3 mi. Non-rdo equipped acft will maintain 2000'MSL until W of arpt. Over that position, acft shall let down to pat alt.

POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'.

ROCHESTER-MONROE CO. ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T-type hangars. Caution taxiing in these areas. No signal btwn sunset-sunrise to indicate gnd visibility of less than 3 mi and/or a ceiling of less than 1000'. (3-3)

ROME-GRIFFISS AFB-RADIO: USAF VHF/DF unreliable 360°-90° below 4000', 215°-270° below 6500', 270°-284° below 6000', 284°-315° below 5000', 315°-360° below 4000'.

ROMULUS-SPECIAL NOTICE: Heavy ammunition demolition approx 3 n mi NW at lat 42-46-57, long. 76-53-17, 0730-1615, Mon-Fri. Blasts cause shock & flying missiles up to 1000'.

SCHENECTADY CO. ARPT: Due to non-visibility twr unable to ctl tfc on apch end rnwy 10, NG ramp, and portions of taxiways serving rnwys 22 and 33. Caution-lndg jet acft using left hand pat. at 1879'MSL. Sod areas unsafe. Rdo rcvr rqrd. (12-3)

SPITFIRE LAKE: Closed seaplane operns-xcpt emergency.

SYRACUSE-RADIO: VOR coverage 180°-220°, 35 n mi at min en route alt.

★SYRACUSE-HANCOCK FLD-TOWER: ILS glide slope, MM, OM and LOM-relctd to serve rnwy 28 extended. MM lctd 3403' from end of extended rnwy 28; OM 4.74 mi from end extended rnwy; glide slope 400' N of centerline and 1000' from end of extended rnwy 28.

** Alt over OM 1600'MSL; MM 610' MSL. No freq change. Glide angle: 2.64°.(3-18) FLD: Old style left hand neon approach light lane; recommissioned concurrent with ILS relocated fac restoration. (3-18) VOR ground rcvr check point unusable. (1-7)

UPPER ST. REGIS LAKE: Close seaplane operns xcpt emergency.

UTICA-RADIO: ILS LMM freq 254 kc usable dist. 10 n mi from 270° clockwise to 360°.

UTICA MUN ARPT: Mil acft will not fly over arpt below 2000'MSL. Lgt acft operg in vcnty of Marcy during daylgt hrs. (10-22)

WATERTOWN-RADIO: DME coverage 35 n mi at min en route alt. (7-1)

WHITE PLAINS-WESTCHESTER COUNTY ARPT: First 400' rnwy 23 not visible from ctl tower.

WURTSBORO-MAMAKATING ARPT: Glider and soaring operns being conducted during daylight hours within a 10 mi radius of arpt, 33 mi 300° heading from Newburgh.

NORTH CAROLINA: ★ASHEVILLE-HENDERSONVILLE ARPT-TOWER: Effect. Mar 15, twr oper 24 hrs. (3-13) Rcvd too late for ANRA page.

CHARLOTTE-DOUGLAS ARPT: About April 1, 1076'(1932'MSL) lgtd twr will be erected 10.5 n mi ENE(74°T) at lat 35-15-41, long. 80-43-38 & being completed approx. June 1. All acft operating in and out of arpt required to have operg transmitter and receiver on a twr freq, xcpt in emerg or on prior approval of twr or arpt mgr's office. (1-20) Rnwy 5-23 clsd for repaving until approximately May 5. (3-14)

CHERRY POINT-SPECIAL NOTICE: Effect. April 17, Warning Area 122 will be revised as follows: beginning at latitude 35-09-00, longitude 75-00-00; thence southeast to latitude 34-21-00, longitude 75-05-00, SW to latitude 33-06-00, long. 75-53-00; NW to latitude 33-58-45, longitude 77-12-00; continuing NW to latitude 34-17-45, longitude 77-37-30; thence in a northeasterly direction 3 n mi from and parallel to the North Carolina mainland and outer shoreline to latitude 35-05-00, longitude 75-51-00; thence clockwise along the arc of a circle with a radius of 60 mi centered at latitude 34-54-30, longitude 76-53-00, to latitude 34-50-00, longitude 75-50-00; thence NE to latitude 35-05-00, longitude 75-00-00; thence N to latitude 35-09-00, longitude 75-00-00; thence N to point of beginning. (3-6)

CHERRY POINT MCAS-RADIO: VOR may have radial error to 9° in 180°-300° sector. (2-12)

ELIZABETH CITY-RADIO: Dec 5, VOR/DME shut down until approximately March 20, relocation.

HURON-RADIO: Mar 11, VOR shut down until approx Apr 22 - modernization. (3-13) During shut down the following MEA's can be utilized: V-26, Pierre VOR - Int R075° PIR and R168° ABR, 5000'; Int R075° PIR and R168° ABR - Oakwood Int., 5000'; Oakwood Int - Redwood Falls, Minn., 5000'. V-78, Int R075° PIR and R168° or R228° ATY - Watertown VOR, 5000'; V-15, Sioux Falls VOR - Int R297° FSD and R228° ATY, 5000'; Int R297° FSD and R228° ATY-Aberdeen VOR, 5000'. Direct routes - Pierre VOR to Huron LFR, 3400'; Huron LFR-Aberdeen VOR, 2500'; Huron LFR-Sioux Falls VOR, 3000'; Huron LFR Redwood Falls, Minn., VOR, 3900'; Huron LFR-Watertown VOR, 3100'. (2-25)
HURON-HOWES ARPT: Rnwys 17-35 and 8-26 clsd to acft over 12,500 lbs gross weight xcpt portion of rnwy 8-26 from intsxn E to taxi strip. Sod areas clsd xcpt 150' adj to rnwys inside of bndry lgts, usable for lgt acft at pilots' discretion. (4-25)
PHILIP ARPT, SITE 31, CYS-HON: 24' unlgtd p-line N from bcn to transmission line.
SIOUX FALLS-FOSS FLD-TOWER: Audio interference may be noted lclzr SE thru SW. Approach procedures and lclzr alignment not affected. (12-5)
TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 via Knoxville is invited to the proximity of the W course of Knoxville radio rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.
BRISTOL-TRI-CITY ARPT: Hangar const in progress 350' W of N end rnwy 20-2. Height 45' unlgtd. (1-28)
CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. NE and NW courses LF range have moderate to severe multiples. (7-27)
CHATTANOOGA-LOVELL FLD: All acft within arpt tfc ctl zone between sunset-sunrise must be equipped with transmitter and receiver capable of rcvg instructions from ctl twr; during daylgt, all acft must be equipped with rcvr capable of rcvg instructions from ctl twr. (8-23)
KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution - VOR has occasional momentary course distrubance in mountainous areas.
KNOXVILLE-McGEE TYSON ARPT-TOWER: Nov 13, ASR shut down. (1-30) ILS glide slope inop.
MEMPHIS-RADIO: About Mar 18, Nesbit FM on S course LFR will be shut down until approx Mar 29. (2-28)
NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250° have bends and roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi, 180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEAs and routing as follows: V-16 GHM VOR to BNA LFR via GHM 066° MEA 3000'; V-16 BNA LFR direct

TENNESSEE: Smithville VHF Int via CSV 284° MEA 3500'; V-16 Smithville Int to CSV VOR via CSV 284° MEA 5000'. V-140 DYR VOR to McEwen Int via DYR 083° MEA 5000'; V-140 McEwen Int to BNA VOR via BNA 266° MEA 3500'; Min hold alt at McEwen 3500'; V-140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V-140 Hartsville Int to Highway Int via BNA 056° MEA 7000'. V-7 BNA LFR to Lewisburg Int MEA 3000'. (2-28)

NASHVILLE-BERRY FLD: Taxiway btwn ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy-use as a taxiway. (12-28)

SEWANEE-UNIVERSITY OF THE SOUTH ARPT: Clsd due to rough and muddy fld after hvy rains. Pilots use at own risk. White cross mrkrs placed on worst places. (2-19)

TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

ALICE-RADIO: VOR radials 85°-105° unreliable. About April 8, VOR will be shut down unt/ April 29-modernization. (2-8) During shutdown VOR flights authorized to use LFR in lieu VOR. Intersections and altitudes as charted. (2-13)

ALICE ARPT: Boundary lights runway 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of naturas gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi North.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)

AUSTIN-MUELLER ARPT: Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat.-exten. jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green range lights on rnwy 30 designates touchdown point ngts. (10-4)

BEAUMONT-JEFFERSON CO. ARPT-TOWER: About Mar 15, ILS will be cmsnd. Lclzr freq: 109.5mc, ident: BUJ. Glide slope freq: 332.6mc. Apch bear: 113°. LMM freq: 206kc; ident: UJ. LOM freq 236kc; ident: BU. MM lctd 0.4 mi, OM 4.8 mi from apch end runway. (2-8) FLD: Rnwy 11-29 clsd-construction. (9-19) Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13)

BIG SPRING-RADIO: VOR courses 280°-325° and 345°-30° out of tolerance acct bends. DME coverage 130°-190°, 35 n mi at 4000'. (11-19) About April 1, VOR will be shut down until approx Aug 1-relctn to lat 32-23-06, long. 101-29-00. (3-7) During this period VOR flgts are authorized to use BGS LFR in lieu of BGS VOR. On all arwys bearings and MEA's remain as charted. Johnson Int use 182° bearings from BGS LFR; Mustang Int use 266° from BGS LFR. (3-8)

BIG SPRING-HAMILTON ARPT: Caution all altitudes - intensive jet training.

COLLEGE STATION-RADIO: DME coverage 60° to 90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

CORPUS CHRISTI-RADIO: Jan 15, VOR shut down until approx Mar 15. Durg shutdown the following temp MEAs have been estab: V-20 ALI-PSX MEA 4000'; V-68 from Int of SAT 159° radial to CRP unusable; from CRP to Kingsville Int. unusable. Clareville and Kingsville Ints unusable. All other routes utilizing CRP VOR unusable. (1-30)

COTULLA-RADIO: Feb 5, VOR shut down until approximately Mar 15-modernization. (3-1)

DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21)

DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000'MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution-acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions.

EDINBURG ARPT: Clsd until approx April 13, due rnwys & taxiways under construction.

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000'MSL or 1000' above terrain; lgt acft no higher than 4500'MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip avail. Tetrahedron uncontrollable, unreliable- not to be used as traffic direction indicator. (11-27)

TEXAS: GALVESTON-RADIO: About Mar 18, VOR will be shut down until approx Apr 8-modernization. (2-8) During modification shutdown Galveston VOR flights authorized to use LFR in lieu VOR. Intersections and altitudes as charted. (2-13)

GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop. (6-5)

**GRAHAM ARPT: 395'(1770'MSL) lgtd twr being erected 5.0 n mi E(93°T) at lat 33-06-10, long. 98-27-17. (2-14)

GREGG COUNTY-RADIO: About Mar 29, LF voice fac will be changed from 257kc to 236.

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these rads are not authorized. In lieu thereof instrument operns between Houston VOR & CLL VOR are temp authorized using Houston 315° rad and CLL 118° rad. Houston VOR to GLS VOR authorized utilizing GLS 314° rad. Courtney Cypress and Fairbanks Ints remain using above temp rads and charted ELA VOR radials. No change in charted alts. Houston VOR instrument apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed approach procedure on HOU ILS authorized utilizing the HOU VOR 315° rad in lieu of 306° radial.

HOUSTON-CLOVER ARPT: Caution on lndgs and take-offs. 80'(AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30).

HOUSTON INTNL ARPT: Tetrahedron uncontrollable and unreliable-not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for tk-offs to E only; no lndgs. (3-11)

HUDSPETH-RADIO: Feb 21, VOR shut down until approx Mar 18. During this period MEA on V-66 El Paso to Culberson 10,000'MSL. Dove and Antelope VHF Int unusable. (2-21)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000'-photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use-erratic course displacement. (1-21)

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenne poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4) Rnwy 13-31 closed for installation of hi-intensity rnwy lgts.

**LUBBOCK ARPT-SPECIAL NOTICE: ILS procedure #1, straight in minima 400-1 until further notice. (3-2)

LUBBOCK ARPT-TOWER: March 4, ILS glide slope shut down until approximately September 1. (2-25) FLD: W 300' of E ramp open as taxiway. E 500' of E ramp closed to aircraft for cotton storage. (10-9) N 1000' rnwy 17-35 closed to all aircraft until about September 1, for major construction and extension of runway. Runway 17 threshold lights moved 1000' S. Men and heavy equipment working during daylight hours in the approach zone of runway 17. Runway 17-35 closed to Convair and larger aircraft during construction period except during IFR weather conditions or with N or S winds of 20 knots or more. (3-14)

LUFKIN-RADIO: DME coverage 125°-145°, 43 nautical miles at 1500'; 145°-280°, 35 nautical miles at 1500'; 280°-305°, 35 mautical miles at 1700'; 305°-315°, 26 nautical miles at 1700'; 315°-335°, 35 nautical miles at 1700'; 335°-015°, 35 nautical miles at 2000'; 015°-060°, 35 nautical miles at 1700'; 060°-125°, 35 nautical miles at 1500'. About March 18, VOR will be shut down until approximately April 8- during this period VOR flights authorized to use LFK Rbn in lieu VOR except V-13E LFK to SHV unusable. Intersections, altitude and reporting points as charted. (2-4)

MARFA-RADIO: Auto. rebroadcast feature cmsnd. Rcvg 122.1, 126.7, 135.9, 255.4 mc.

MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW. (7-18)

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylight hours Sundays. Field will be closed by a white X both ends of strip. Aircraft desiring to land circle field and field will be opened as aircraft will be given priority. (4-17)

McALLEN-MILLER INTNL ARPT: Runway 18 closed for take-offs and landings. (11-26)

McKINNEY-SPECIAL NOTICE: 166' lighted temporary drilling derrick erected 3.5 nautical miles NW. (7-18)

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300'MSL. (6-15)

TEXAS: **NEWARK-EAGLE MOUNTAIN LAKE ARPT: 235' (1485' MSL) twr being erected 10 n mi W (288° T) at lat 32-58-55, long. 97-47-20. (2-14)
ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 clsd. (5-16)
PORT ISABEL ARPT: Closed all operns - const. (7-26)
ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)
SAN ANGELO-RADIO: About Mar 18, VOR will be shut down until approx Apr 8 - modernization. Durg shutdown, San Angelo VOR figts authorized to use SJT LFR in lieu VOR. Int. and alts as charted. (2-8)
SAN MARCOS ARPT: NE/SW strip rough - caution. (8-6)
SHAMROCK ARPT: Bcn and rnwy lgts inop. (7-9)
★SNOOK-RADIO: USAF H fac cmsnd. Freq 371 kc. Ident: SOK, Lctd at lat 30-29-00, long. 96-29-25. Class: MHW. Bearing & distance to Bryan AFB: 355°, 8.0 n mi. (1-29)
SNYDER-WINSTON FLD: 150' (2577' MSL) lgtd rotary drilling rig erected 2552' SE N/S rnwy. (10-4)
TEXARKANA - SPECIAL NOTICE: Demolition in progress during daylight hours on Green Arwy #5 approx 13.4 n mi WSW ot Texarkana LF rng.
TYLER-RADIO: About Apr 1, Z mrkr at H fac will be decmsnd. Class: BH. (3-1)
TYLER-POUNDS FLD-TOWER: ILS glide slope out of tolerance from MM to touchdown - account of severe scalloping and roughness.
UVALDE-LEONA RANCH STRIP: New lndg area reported: Lctd 35 n mi NW; lat 29-30, long. 100-22; elev. 1720'; 1 strip - 2800' long. (1-28)
WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.
UTAH: BONNEVILLE-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'.
BRYCE CANYON-RADIO: VOR has lgt roughness below 13,000'.
DELTA-RADIO: VOR coverage 40°-80° and 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'.
HANKSVILLE-RADIO: VOR coverage 40°-60°, 35 n mi at 10,000'; 172°-190°, 26 n mi at 13,000'. About Feb 25, VOR will be shut down until approx Mar 22 - modernization. During shutdown MEA V-8 Bryce Canyon-Grand Junction will be 15,000' and V-8 South Bryce Canyon-Grand Junction will be unusable. (2-14)
LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280° to 300°, 35 n mi; 350°-30° and 180°-220°, 25 n mi. (11-26)
MILFORD-RADIO: VOR coverage 20°-140°, 22 n mi, 235°-330°, 35 n mi at min en route alt.
OGDEN-RADIO: VOR coverage 5°-120°, 30 n mi at 11,000'. DME coverage 360°-150°, 17 n mi at 12,000'.
PRICE-CARBON CO. ARPT: NE/SW rnwy clsd - const. (11-1)
SALT LAKE CITY-RADIO: VOR course scalloping prevalent between 290°-350°. Coverage this area 17 n mi at 6500' MSL, 30 n mi at 11,000' MSL. Coverage 10°-135°, 22 n mi at min terrain clearance alt. DME coverage 20°-140°, 17 n mi at 13,000' MSL; 180°-235°, 35 n mi at 12,000' MSL; 340°-20°, 26 n mi at 12,000' MSL. (8-10)
UTAH LAKE-RADIO: VOR usable dist at 14,000' MSL from 010° thru 040°, 35 n mi, 40° thru 50°, 30 n mi, 50°-85°, 40 n mi; at 13,000' MSL from 145° thru 155°, 35 n mi, and 275° thru 295°, 30 n mi. Course roughness exists over mountain ridges N thru E between 15 and 20 n mi. (2-1)
VERMONT: SPECIAL NOTICE: Arpt condition info avail. by calling Vt. Aero Comm (telephone CApital 3-2311, Ext. 808) 0830-1630, Mon thru Fri or CAA Communs Stn, Barre-Montpelier Arpt anytime (tel. CApital 3-2376). Acft in figt call Montpelier Rdo.
BARRE-MONTPELIER ARPT: Rnwy 5-23 clsd to wheel-equipped acft during winter months.
BRISTOL ARPT: E/W rnwy clsd - obstn. (4-4)
BURLINGTON-RADIO: VHF/DF bearings unreliable inbound headings 055°-110° below 6000'; 110°-140° below 4000'; 235°-255° below 4000'; 255°-355° below 9000' all beyond 50 n mi. UHF/DF bearings unreliable inbound headings beyond 40 n mi; 345°-067° below 6000'; 344°-280° below 7600'; 279°-255° below 9500'; 255°-175°, below 8500'; 174°-135°, below 7500'; 134°-066° below 5000'. (10-16)
VIRGINIA: **CAMP PICKETT-BLACKSTONE AAF-SPECIAL NOTICE: 400' (757' MSL) lgtd rdo twr erected 3 n mi WSW (258° T) at lat 37-03-17; long. 78-01-14. (3-18)
CAMP PICKETT-BALCKSTONE AAF: Fld open to civil in emerg or prior arrangement thru C.O. Camp Pickett, Va. Frequent parachute dropping exercises involving personnel & equip in progress. Exercise extreme caution when in vcnty. Ctc Balckstone Rdo for advisory info.

VIRGINIA: DAHLGREN-SPECIAL NOTICE: Restricted Area (R-38) daily air and surface firing present. Extreme hazard to acft all altitudes all times.
FRONT ROYAL-RADIO: VOR coverage 120°-160°, 175°-200°, 220°-226°, 270°-010°, 35 n mi at 4000'. ATCS and ranges controlled from Martinsburg, W. Va. (7-25)
GORDONSVILLE-RADIO: VOR has roughness in all quads. DME coverage 55°-75°, 35 n mi at 1500'; 75°-85°, 30 n mi at 1500'; 85°-130°, 35 n mi at 1500'; 130°-160°, 39 n mi at 3000'. (6-11)
HERNDON-RADIO: VOR usable dist 35 n mi at min instr alt NE quad. Terrain causes minor course roughness in SW quad.
HOT SPRINGS-INGALLS ARPT: Closed. (10-29)
LANGLEY AIR FORCE BASE: Lndgs and take-offs prohibited unless acft equipped with 2-way radio. Closed to Civil acft unless on ofl bus. Follow centerline all taxiways. Intensive jet operns 50 mi radius to 45,000' cont 0800-2400E. Conventional acft use rectangular pat alt 1000' MSL. Rnwy 12-30 perm clsd for lndgs and take-offs. Indicate in figt plan when destined for NACA or TAC Hq. No overruns rnwy 17-35. Do not land short rnwys 07 and 25 acct jet barriers. Caution - hvy-civil air tfc crossing extension line of rnwy 07-25, 3 to 5 mi from apch end of rnwy 07. (10-29)
LAWRENCEVILLE-RADIO: Roughness all arwy radials VOR. Radials 185°-240° usable only to 22 mi MEA. (7-23)
LEESBURG ARPT: New 3500' E/W strip clsd - old strip lying parallel and S will be available - 2200'. (3-14)
LEXINGTON ARPT: Land at own risk. Unattended - no fuel.
LYNCHBURG-FALWELL ARPT: Until April 8, antenna array to 80' along S side of rnwy 75' from edge and near hangar area - obstruction lgtd. (1-8)
LYNCHBURG-PRESTON GLEN ARPT: Signal for below VFR wea minimums inop, ngts.
MONTEBELLO-RADIO: VOR coverage 110°-220°, 35 n mi at MEA. DME coverage 150°-180° 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'.
NEWPORT NEWS-PATRICK HENRY ARPT: Exten const in progress apch end rnwy 20.
NORFOLK-RADIO: Visual courses VAR slightly rough.
PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'.
★RICHMOND-BYRD FLD-TOWER: March 11, local control freq changed to 120.1 mc and apch ctl freq changed to 119.5 mc. (3-11) FLD: Due to non-visibility twr unable to ctl tfc on N portion of N/S taxiway parallel to rnwy 2-20. All acft rqrd to have 2-way rdo for ngt opern and at least rdo rcvr for daylgt opern. Use paved areas only, all other soft. Landing FEE for multi-eng executive and non-scheduled acft. (9-15)
ROANOKE MUN-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W strip. Men and equip. adj all rnwys and taxiways - Caution.
WINCHESTER ARPT: New arpt reported: Lctd 18 mi N; elev approx 900'; 1 rnwy; 3500' long. (graded dirt - shale); remarks - telephone line parallel to rnwy 100' to one side.
WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area & lakes.
BANDERA ARPT: Closed - due snow. (12-7)
BELLINGHAM-RADIO: VOR radial 280°, on Vancouver, B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.
BELLINGHAM ARPT: 1000' NE end NE/SW rnwy clsd to hvy acft. (11-19)
BREMERTON-KITSAP COUNTY ARPT: The first 2000' rnwy 1 clsd to all Naval acft.
EASTON, SITE 5B, SEA-HLN ARPT: Clsd due to snow for winter season. (11-20)
ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'.
EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown prohibited area; 227°-280°, 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.
EPHRATA ARPT: Rnwy lgts on rnwy 2-20 inop. (10-8)
EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160° below 9000'.
LEAVENWORTH-LAKE WENATCHEE ARPT: Closed - due snow. (12-7)
LESTER ARPT: Closed - due snow. (12-7)
MT. CATHERINE BEACON SITE 4, SEA-HLN: Inop - due power cable trouble. (10-26)

WASHINGTON: OLYMPIA-RADIO: VOR coverage 340°-45°, 43 n mi at 4000'; 45°-135°, 43 n mi at 8000'; 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'. 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oregon intsxn usable for 35 n mi at 5000'. (5-3)
OTHELLO ARPT: Caution - unlgtd power line approx 50' high E end - unmrkd.
PACKWOOD ARPT: Clsd - due snow. (12-7)
PULLMAN-MOSCOW ARPT: Rnwy lgts avail on request. W taxiway clsd. Use rnwy to taxi for E take-off. Take-off may be made from rnwy at center taxiway intsxn at pilot's discretion. (12-20)
RENTON ARPT: Until about Mar 15, 1958, const in progress - use rnwys and taxiways only. (3-11)
RIMROCK-TIETON ARPT: Clsd - due snow. (12-7)
SEATTLE-BOEING FLD: All multi-eng acft use main rnwy. 2-way rdo equipped, medium type, single-eng acft may use main rnwy on req, PROVIDED local tfc permits. Single-eng acft with retractable lndg gear drop lndg gear prior to entering tfc pat. (7-19) 2-way rdo required, xcpt on prior request. (1-29) All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or approaches thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat. W of fld at 1500' - use main rnwys, taxi strips only. Jet acft tfc pat. W of fld at 2500'. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. W side taxiway clsd to tfc until further notice. (2-15)
SEATTLE-TACOMA INTNL ARPT-TOWER: Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. (3-15) FLD: Taxiway btwn rnwy 29 and rnwy 34 clsd. Rnwy 11-29 clsd. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z and 2100Z daily - actual release time will be broadcast by Seattle Rdo. (8-14) Hi-intensity apch lgt sys S end rnwy 16-34. First row lgts at N end of sys perm. discontd. Second and third row lgts at N end reestablished. First row lgts now 300' S of rnwy 34. (11-1)
SKYKOMISH ARPT: Clsd - due snow. (12-7)
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)

GLENDALE ARPT: Ditch under construction across N/S rnwy 700' N of S bndry. Will be mrkd by flags. Rnwy length reduced to 2200' until further advised. (12-13)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.
MARTINSBURG ARPT: Serv fac avail 0800-sunset. 28' hangar 500' E of centerline and 1100' from S end runway 35 lighted. (6-7) Factory building 40' high under construction 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Rnwy 8-26 clsd 0700-1800 EST xcpt Sun. Men and equip. on rnwy. (12-3)

WEST VIRGINIA: MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.
RAINELLE-RADIO: Feb 16, mobile VOR operating on test basis. Freq: 108.8 mc. Lctd: lat 37-58-33, long. 80-48-17. (2-18)
SUTTON, 21, CIN-DCA ARPT: clsd to all operns for unknown duration. (2-28)
WISCONSIN: EAGLE RIVER ARPT: 800' S end of N/S rnwy ruf, soft - unusable. Arpt clsd until May 1. (10-12)
FOND DU LAC ARPT: Caution - use center of rnwys - due soft rnwys and shoulders during winter and early spring. Snow will be rolled on the center of rnwys. (12-21)
LA CROSSE-RADIO: VOR radials 320°-335° unreliable 20 to 30 n mi from stn. (11-3)
LAND O' LAKES-KING'S GATEWAY ARPT: Clsd due ice or snow. Arpt will be plowed on request. (12-19)
LODI-LAKELAND ARPT: New arpt reported: Lat 43-19-40, long. 89-30-55; lctd: 0.5 mi NE of Lodi; 1 strip - (E/W) 2640' x 200'; 87 oct gas; remarks - unattended. (1-14)
MADISON-TRUAX FLD-TOWER: About Mar 22, 119.9 mc will be changed to 119.3 mc. FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. (10-17)
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, during VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd - itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusing rnwy 1 with parallel taxiway to left. (8-15)
OCONTO ARPT: E/W rnwy plowed 2850' x 175' - open to wheeled acft. NE/SW rnwy open to ski-equipped acft only. (1-16)
OSHKOSH-WINNEBAGO CO ARPT: Caution - bldg const on fld - use rnwys only. Use only N/S and E/W rnwys during winter months. (2-21)
WOODRUFF-ARBOR VITAE-RADIO: H fac operg on request basis. (12-28)
WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather is VFR. (12-28)
WYOMING: CASPER AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Two 200' fences SW end of ramp not obstn lgtd. (11-16)
CHEROKEE-RADIO: About April 8, VOR will be shut down until approx May 3, modernization. During shutdown following arwys will be affected: V-4, V-4N, V-6, V-6N, RKS-CKW; V-4 CKW-LAR; V-6, V-6N CKW-RKR; V-26 CKW-CPR all unusable. (3-15)
CHEYENNE ARPT: Overrun lgts (apch lgts) rnwy 26 inop. (10-18)
DOUGLAS-RADIO: About Mar 25, VOR will be shut down until approx Apr 19 - modernization. During this period the following arwys will be unusable: V-19 CPR-Wheatland Int, V-19E CPR-CYS, V-247 DGW-CZI. (3-6)
GILLETTE ARPT: 50' - 75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.
KEMMERER ARPT: Arpt unsafe for opern of acft with wheels acct snow. (1-28)
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness btwn OM and LFR.
ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - mrkd.
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi btwn 150°-280°. Moderate course roughness exists in mountainous area.
THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on fld. Use extreme caution.
PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50'-60' high operg intermittently approx 1000' off E end rnwy 9R-27L.
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

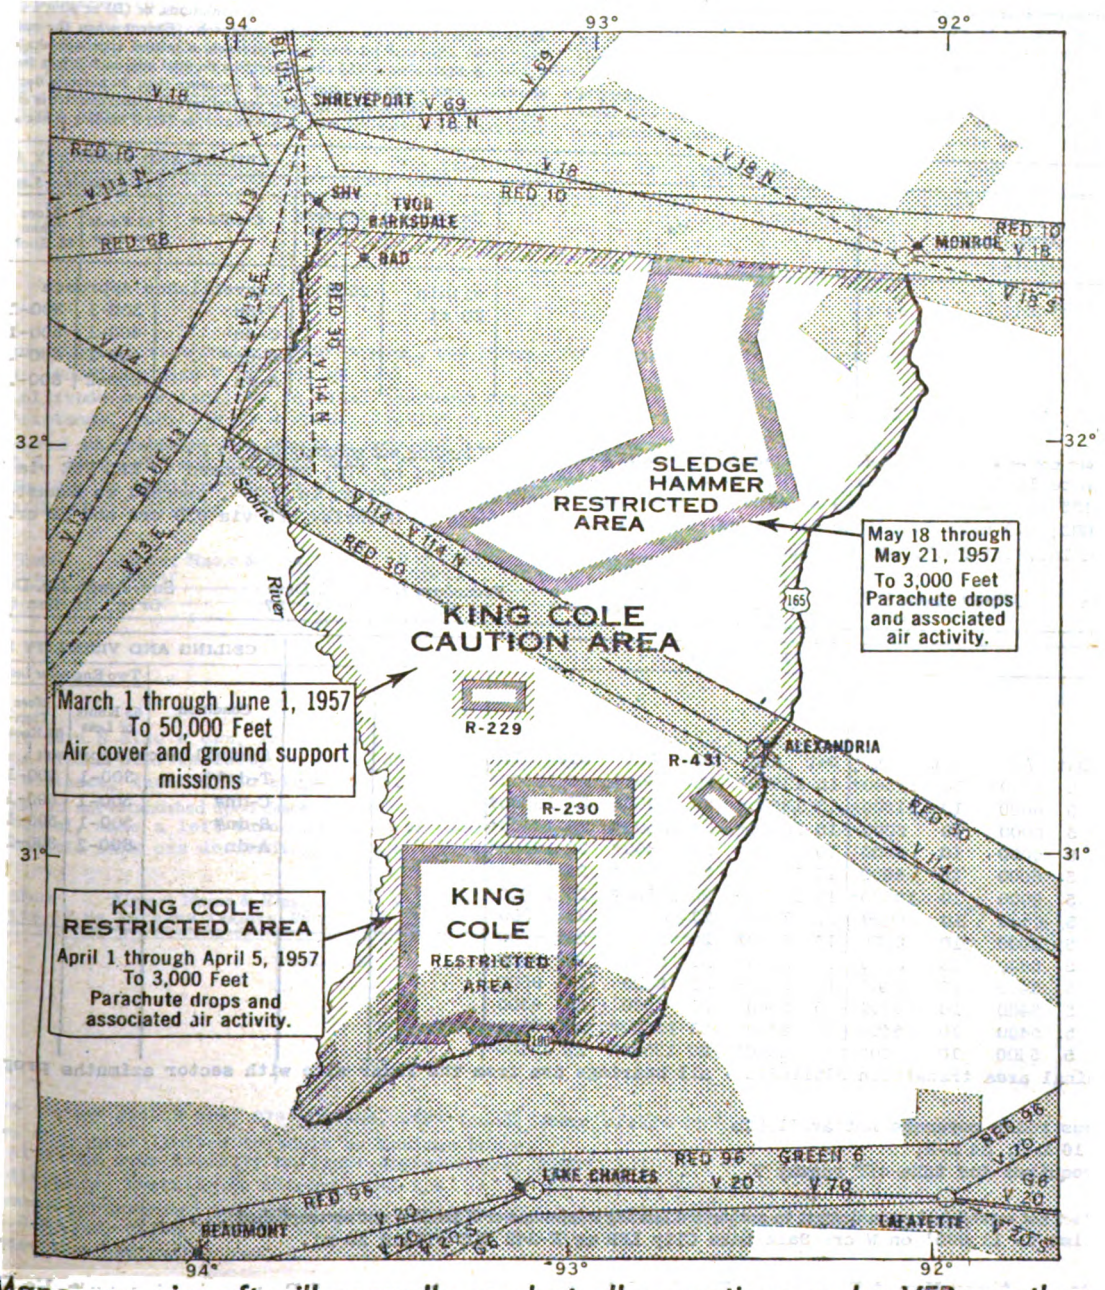
SPECIAL NOTICE

LOUISIANA

KING COLE-SLEDGE HAMMER

REVISED

During March 1 through June 1, 1957 the US Army and the USAF will conduct maneuvers in the depicted areas. Restrictions to non-maneuver aircraft are noted for each area. Clearance through Restricted Areas may be obtained through CAA ATCS, from "Maneuver Director" Camp Polk, La.



Maneuver aircraft will normally conduct all operations under VFR weather.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

CHICAGO, ILL., MIDWAY AIRPORT: Comb. ILS-ADF, Proceed. #1, Amend. 13, dated 23 Mar 57, correct facility class and ident on last line of panel 1 to: "ILS-IMDW, LOM-MD."

GRAND MARAIS, MICH., GRAND MARAIS AIRPORT: LFR, Proceed. #1, Amend. 5, dated 2 Mar 57, correct straight-in runway to "14" in lieu of "13"; correct outbound and inbound courses to "292-112" in lieu of "291-111"; insert airport elevation - "838".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

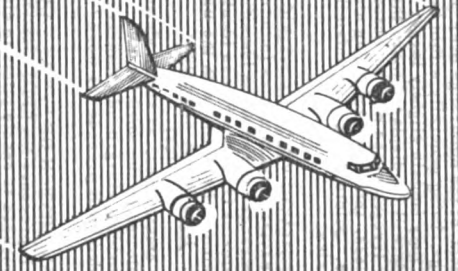
AIRMAN'S GUIDE



SPECIAL NOTICE
New York ARTC Center
Preferential Routes p. 5

How to use this Guide - page 2

Notices to Airmen - page 2

VOL. 12, NO. 2 **APRIL 2, 1957**

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.75, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 25 cents.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

TEMPORARY CONTROL AREA EXTENSION: Effective 0001 CST, April 1, 1957 to 2400 CST April 5, 1957, unless otherwise advised the following control area extension is amended as follows:

LAKE CHARLES, LA. Control Area Extension is amended to read: "All that airspace within a 40-mile radius of the Lake Charles, La., rdo rng stn excluding the portion which overlaps the Houston (Beaumont-Palacios-Houston) Control area extension, and excluding the portion below 3000 ft. MSL which overlaps the temporary King Cole Restricted Area".

NOTE: At the end of this period (April 1 - 5, 1957), Lake Charles, La. Control Area Extension as designated prior to this temporary amendment shall again become effective.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

TROY, ILLINOIS VOR SHUTDOWN: Until approximately April 15, 1957, the Troy, Illinois VOR will be shut down for modernization. During the interim period, the following MEA's can be utilized:

When route of flight includes changing to any airway with a higher MEA, flight will be cleared to higher MEA prior to crossing intersection so that intersection will be received to enable pilot to make turn.

Airways, alternate airways and intersections formed by the shutdown VOR will not be utilized except where noted to clear aircraft.

Air carriers should check to determine need to request any direct routes using combination facilities if they desire lower altitudes or require added transitions to approach procedures.

FCC AIRCRAFT RADIO STATION LICENCES: The Federal Communications Commission calls attention to the fact that all radio transmitters used aboard civil aircraft must be licenced by the FCC and that the station licence must be carried aboard the aircraft at all times. Application for renewal of expiring or expired licences should be submitted on FCC Form 404. Copies of this form may be obtained from the FCC, Washington 25, D. C., or from any FCC field office.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(d) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

FLIGHT ADVISORY AREA - SPOKANE RAPCON CENTER: Effective April 22, 1957, the Flight Advisory Area for the Spokane RAPCON Center will be as follows:

From a point 49°N 115°W southward to a point on Green 2, 25 miles E of Mullan Pass; thence S to 46°N 115°W; thence W to 46°N 117°30'W; thence NW to a point on the eastern boundary of Red 53, 25 miles NE of Walla Walla MF Radio Range; thence to a point on the W boundary of Victor 112, 25 miles NE of Lamar Intsxn; thence SW to the southeastern corner of Prohibited Area P-246; thence W and northwesterly along the southern and southwestern boundaries of Prohibited Area P-246; thence along the western boundary of Prohibited Area P-246 and the eastern boundary of Restricted Area R-247 to the northeastern corner of Restricted Area R-247; thence to a point on Green 2 and Victor 2, 25 miles E of the Ellensburg MF Range; thence N to 49°N 120°W; thence E along 49°N to point of beginning.

Also, note that the voice call is changed to Spokane center or Spokane approach control, whichever is applicable.

JACKSONVILLE CENTER-TAMPA RAPCON CONTROL AREA AND FLIGHT ADVISORY BOUNDARY REVISION: Effective 0001E, April 11, 1957, revise the Jacksonville Center-Tampa RAPCON Control Area and Flight Advisory boundaries from point of existing TPA-JAX bndry at 28-28N, 82-00W; northward along the 82-00W meridian to 29-42N, 82-00W; thence westward direct to 29-42N, 82-04W; thence northward direct to 29-56N, 82-04W; thence westward direct to 29-56N, 82-40.50W; thence southerly along the 82-40.50W meridian to the junction with V159 thence in accordance with the presently defined Tampa Area.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10 dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outer marker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 98 - Radiated Test Signal. New York (LaGuardia): Correct frequency to read: 111.0 mc.

(2) Page 100 - (Airborne). Evansville, Ind. (Dress Memorial): Correct VOR rcvr check point to read: 057°.

✓ ADMISSION OF LIMITED AND RESTRICTED CATEGORY AIRCRAFT INTO CANADA: "Limited" and "Restricted" category aircraft will be admitted into Canada for periods up to thirty days provided they are used for private purposes or as executive transport aircraft only. In no case are passengers other than those included in the above classification to be carried, nor is the transportation of goods or freight to be allowed.

✓ ATLANTA AND WASHINGTON CENTERS BOUNDARY CHANGES: Effective 0001EST March 21, 1957 the Atlanta and Washington Centers boundaries are amended as follows: Beginning at the present boundary crossing VOR civil arwy No. 128 and Red civil arwy No. 34, 25 miles NW of the Pulaski, Va. LF rng stn thence direct to cross VOR civil arwy No. 37, VOR civil arwy No. 261, VOR civil arwy No. 16, Green civil arwy No. 5 and VOR civil arwy No. 136 on an arc 20 miles N and E of the Pulaski, Va. VOR stn thence direct to cross VOR civil arwy No. 103, Red civil arwy No. 77 and VOR civil arwy No. 143 on an arc 45 miles N of the Greensboro, N.C. VOR stn thence direct to the present bndry at 36-29-30N and 79-26-30W.

✓ RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective May 9, 1957:

(Part 608 - Restricted Area - Amendment 194)

In Section 608.48, the Myrtle Beach, South Carolina, area (R-515) is added to read: "Description by Georgraphical Coordinates: Beginning at lat 33-44-30, long. 79-05-15; thence to lat 33-55-00, long. 79-17-30; thence to lat 33-49-20, long. 79-26-30; thence to lat 33-38-30, long. 79-16-00; thence to point of beginning. Designated Altitudes: Surface to Unlimited. Time of Designation: Continuous. Controlling Agency: Myrtle Beach, AFB, South Carolina."

✓ NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 39. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

AKB	Auke Bay, Alaska (Change from AUK)
AKU	Alakanuk, Alaska, REP (Deletion)
AUK	Alakanuk, Alaska, REP (Reassignment)
BRV	Brooke, Va., VOR (Assignment)
EDO	El Dorado, Kans. TVOR (Assignment)
GBS	Grubbs, Va. VOR (Deletion)
MDH	Carbondale, Ill., Southern Illinois Arpt (Name Change)
BQ	Clover Bar, Alta. (Assignment)
BS	Barons, Alta. (Assignment)
DR	Dresdon, Ont. (Assignment)
DY	Dalroy, Alta. (Assignment)
EL	Carp, Ont. (Assignment)
IK	Sona Lake, Nfld. (Assignment)
LD	Long Lac, Nfld. (Assignment)
NU	Nisku, Alta. (Assignment)
NX	Casselman, Ont. (Assignment)
TF	Sturgeon Falls, Ont. (Assignment)
TJ	St. Albert, Alta. (Assignment)
TK	Telkwa, B. C. (Assignment)
WT	Powassan, Ont. (Assignment)
XP	St. Joseph d'Alma, Que. (Assignment)

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective as indicated, unless otherwise advised the following civil airways, control areas, control area extensions, cntrol zones and reporting points are amended in whole or in part as follows:

PART 600 - AMENDMENT 5 - Effective May 9, 1957:

CIVIL AIRWAYS:

(1) Amber civil airway No. 6 (Jacksonville, Fla. to United States-Canadian Border), is amended by deleting the portion which reads: "Bowling Green, Ky. rdo rng stn; the intsxn of the NE course of the Bowling Green, Ky. rdo rng and the S course of the Louisville, Ky. rdo rng; Louisville, Ky. rdo rng stn; Cincinnati, Ohio rdo rng stn to the intsxn of the NE course of the Cincinnati, Ohio rdo rng and the W course of the Columbus, Ohio rdo rng." and by adding the following portion in lieu thereof: "Bowling Green, Ky. rdo rng stn; Lexington, Ky. nondirectional rdo bcn; Cincinnati, Ohio rdo rng stn to the intsxn of the NE course of the Cincinnati, Ohio rdo rng and the W course of the Columbus Ohio rdo rng" (Note: Due to proposed decommissioning of Louisville LF rng and relocation as an H type facility.)

(2) Red civil airway No. 11 (Enid, Okla. to Boston, Mass.), is amended by deleting the portion which reads: "From the intsxn of the S course of the Indianapolis, Ind. rdo rng and the W course of the Louisville, Ky. rdo rng via the Louisville, Ky. rdo rng stn to the intsxn of the E course of the Louisville, Ky. rdo rng and a line bearing 358°T from the Lexington, Ky. nondirectional rdo bcn."

(3) Red civil airway No. 14 (Lone Rock, Wis. to Indianapolis, Ind.), caption changed and is amended to read: "From the intsxn of the SE course of the La Crosse, Wis. rdo rng and the W course of the Madison, Wis. rdo rng via the Rockford, Ill. rdo rng stn; the intsxn of the SE course of the Rockford, Ill. rdo rng and the W course of the Chicago, Ill. rdo rng; Chicago, Ill. rdo rng stn to the Indianapolis, Ind. rdo rng stn." (Note: Deletes portion of Red 14 between Indianapolis and Lanesville Intsxn.)

(4) Red civil airway No. 27 (Atlanta, Ga. to Detroit, Mich.), is revoked. (Note: Redesignated as part of N-S airway Blue 87.)

(5) Red civil airway No. 29 (Elmira, N.Y. to Baltimore, Md.), is revoked. (Note: Redesignated as part of N-S airway Blue 21 to make altitude usage for direction of flight consistent with the standard that as a blue arwy it will be published as odd altitude for northbound and even altitude for southbound directions of flight.)

(6) Red civil airway No. 102 (Lexington, Ky. to Huntington, W. Va.), caption changed and is amended to read: "From the Lexington, Ky. nondirectional rdo bcn to the Huntington, W. Va. nondirectional rdo bcn." (Note: Deletes portion between Shepherdsville Intsxn and Lexington H fac.)

(7) Blue civil airway No. 12 (McGrath, Alaska to Galena, Alaska), is added to read: "From the McGrath, Alaska rdo rng stn to the Galena, Alaska rdo rng stn." (Note: Anchorage Reg. proposes to swing SE course Galena from 329°T and toward stn to 342°T and toward stn, with NW course to be reciprocal).

(8) Blue civil airway No. 21 (Coles Point, Va. to Elmira, N.Y.), is added to read: "From the intsxn of the SE course of the Andrews, Md. rdo rng and the S course of the Baltimore, Md. rdo rng to the Baltimore, Md. rdo rng stn, excluding the portions which overlap restricted areas and excluding that portion which lies more than two miles E of the S course of the Baltimore rdo rng between the intsxn of the S course of the Baltimore rng with the SE course of the Washington, D. C., rdo rng and the intsxn of the S course of the Baltimore rdo rng with the southern bndry of Red civil arwy No. 45. From the intsxn of the S course of the Harrisburg, Pa. rdo rng and the W course of the Baltimore, Md. rdo rng via the Harrisburg, Pa. rdo rng; Williamsport, Pa. rdo rng stn to the intsxn of the N course of the Williamsport, Pa. rdo rng and the SW course of the Elmira, N.Y. rdo rng." (Note: Formerly Red 29).

(9) Blue civil airway No. 87 (Atlanta, Ga. to Detroit, Mich.), is amended to read: "From the intsxn of the S course of the Atlanta, Ga. NAS rdo rng and the NE course of the Atlanta, Ga. rdo rng via the Atlanta NAS rdo rng stn; the intsxn of the N course of the Atlanta NAS rdo rng and the S course of the Knoxville, Tenn. rdo rng; Knoxville, Tenn. rdo rng stn; Corbin, Ky. VHF VAR rdo rng stn; the intsxn of the N course of the Corbin, Ky. VHF VAR rdo rng and a line bearing 150°T from the Lexington, Ky. nondirectional rdo bcn; Lexington, Ky. nondirectional rdo bcn; Cincinnati, Ohio rdo rng stn; the intsxn of the NE course of the Cincinnati, Ohio rdo rng and the S course of the Wright-Patterson AFB rdo rng; Wright-Patterson AFB, Dayton, Ohio rdo rng stn to the intsxn of the N course of the Wright-Patterson AFB rdo rng and the W course of the Columbus, Ohio rdo rng. From the Findlay, Ohio nondirectional rdo bcn via the Toledo, Ohio, rdo rng stn to the intsxn of the N course of the Toledo, Ohio rdo rng and the W course of the Detroit, Mich. rdo rng." (Note: What was formerly Red 27 redesignated as a part of N-S arwy Blue 87.)

(10) VOR civil airway No. 2 (Seattle, Wash. to Boston, Mass.), is amended by changing the portion which reads: "Gardner, Mass. omnirng stn; to the Boston, Mass. omnirng stn." to read: "Gardner, Mass. omnirng stn; intsxn of the Gardner omnirng 098°T radial and the Boston-Bedford Airport ILS lclzr front course; Boston-Bedford, Mass. Arpt ILS lclzr; intsxn of the Boston-Bedford Arpt ILS lclzr back course and the Boston omnirng 014°T radial; to the Boston, Mass. omnirng stn." (Note: Redesignated V2 between Gardner VOR and Boston VOR via Bedford LOM and Bedford ILS lclzr.)

(11) VOR civil airway No. 5. (Jacksonville, Fla. to London, Ont.), caption changed and is redesignated by changing all before the Macon, Ga. omnirng stn to read: "That airspace over United States territory from the Jacksonville, Fla. omnirng stn via the intsxn of the Jacksonville omnirng 319°T and the Alma omnirng 148°T radials; Alma, Ga. omnirng stn, including an E alternate and also a W alternate from the Jacksonville omnirng stn to the Alma omnirng stn; Macon, Ga. omnirng stn;" and by revoking the last sentence which reads: "Those portions of this arwy which overlap the Jacksonville restricted area (R-161), the Lake George restricted area (R-176) and the Sterling restricted areas (R-169 and R-170) are excluded." (Note: Redesignated that portion of V5 between Miami VOR and Jacksonville VOR with a new number V267.)

(12) VOR civil airway No. 12 (Santa Barbara, Calif. to Philadelphia, Pa.), is amended by changing the portion which reads: "Pittsburgh, Pa. omnirng stn, including a N alternate via the intsxn of the Pittsburgh omnirng 067°T and the Johnstown omnirng 290°T radials; Johnstown, Pa. omnirng stn;" to read: "Pittsburgh, Pa. omnirng stn; Johnstown, Pa. omnirng stn, including a N alternate via the intsxn of the Pittsburgh omnirng 067,°T and the Johnstown omnirng 290°T radials;" (Note: No arwy change. Corrected printing error in Federal Register.)

(13) VOR civil airway No. 13 (Houston, Tex to Duluth, Minn.), is amended by changing the portion which reads: "to the Texarkana, Ark. omnirng stn, including a W alternate via the intsxn of the Shreveport omnirng 275°T and the Texarkana omnirng 188°T radials." to read: "to the Texarkana, Ark. omnirng stn, including a W alternate via the intsxn of the Shreveport omnirng 275°T and the Texarkana omnirng 184°T radials." (Note: Redesignated V13W due to relocation of Texarkana VOR.)

(14) VOR civil airway No. 14 (Roswell, N. Mex. to Boston, Mass.), is amended by changing the portion which reads: "Tulsa, Okla. omnirng stn, including a N alternate via the intsxn of the Oklahoma City omnirng 040°T and the Tulsa omnirng 257°T radials, and also a S alternate via the intsxn of the Oklahoma City omnirng 107°T and the Tulsa omnirng 222°T radials; Neosho, Mo. omnirng stn, including a N alternate via the intsxn of the Tulsa omnirng 050°T and the Neosho omnirng 260°T radials and also a S alternate via the intsxn of the Tulsa omnirng 091°T and the Neosho omnirng 228°T radials;" to read: "Tulsa, Okla. omnirng stn, including a N alternate via the intsxn of the Oklahoma City omnirng 040°T and the Tulsa omnirng 260°T radials, and also a S alternate via the intsxn of the Oklahoma City omnirng 107°T and the Tulsa omnirng 228°T radials; Neosho, Mo. omnirng stn, including a N alternate and also a S alternate via the intsxn of the Tulsa omnirng 088°T and the Neosho omnirng 223°T radials;" (Note: Redesignated V14, V14N, and V14S Oklahoma City VOR to Tulsa VOR to Neosho VOR due to relocation of Tulsa VOR.)

(15) VOR civil airway No. 15 (Galveston, Tex. to Minot, N. Dak.), is amended by changing the portion which reads: "intsxn of the Dallas omnirng 345°T and the Ardmore omnirng 161°T radial;" to read: "intsxn of the Dallas omnirng 357°T and the Ardmore omnirng 159°T radials;" and by changing the portion which reads: "to the Tulsa, Okla. omnirng stn, including an E alternate and also a W alternate via the point of intsxn of the Oklahoma City, Okla. omnirng 107°T and the Tulsa omnirng 222°T radials:" to read: "to the Tulsa Okla. omnirng stn, including an E alternate and also a W alternate via the point of intsxn of the Oklahoma City, Okla. omnirng 107°T and the Tulsa omnirng 228°T radials." (Note: Redesignated V15 between Dallas VOR and Ardmore VOR due to poor Dallas VOR signal coverage and redesignated V15W Ardmore VOR to Tulsa VOR due to relctn of Tulsa VOR).

(16) VOR civil airway No. 54 (Quitman, Tex. to Charlotte, N. C.), is amended by changing the portion which reads: "Little Rock, Ark. omnirng stn, including a N alternate via the intsxn of the Texarkana omnirng 031°T and the Little Rock omnirng 255°T radials;" to read: "intsxn of the Texarkana omnirng 053°T and the Little Rock omnirng 235°T radials; Little Rock, Ark. omnirng stn, including a N alternate via the intsxn of the Texarkana omnirng 033°T and the Little Rock omnirng 255°T radials;" (Note: Redesignated V54 and V54N between Texarkana VOR and Little Rock VOR due to relocation of Texarkana VOR.)

(17) VOR civil airway No. 66 (San Diego, Calif. to Sulphur Springs, Tex.), is amended by changing the portion which reads: "El Paso, Tex. omnirng stn, including a N alternate; Hudspeth, Tex. omnirng stn;" to read: "El Paso, Tex. omnirng stn, including a N alternate; intsxn of the El Paso omnirng 132°T and the Hudspeth omnirng 272°T radials; Hudspeth, Tex. omnirng stn;" (Note:, Redesignated V66 between El Paso VOR and Hudspeth VOR.)

(18) VOR civil airway No. 74 (Dodge City, Kans. to Little Rock, Ark.), is amended by changing the portion which reads: "Tulsa, Okla. omnirng stn, including a S alternate; Fort Smith, Ark. omnirng stn, including a N alternate from the Tulsa omnirng stn to the Fort Smith omnirng stn via the point of intsxn of the Tulsa omnirng 091°T and the Neosho, Mo. omnirng 227°T radials;" to read: "Tulsa, Okla. omnirng stn, including a S alternate via the intsxn of the Ponca City, omnirng 132°T and the Tulsa omnirng 260°T radials; Fort Smith, Ark. omnirng stn, including a N alternate from the Tulsa omnirng stn to the Fort Smith omnirng stn via the point of intsxn of the Tulsa omnirng 088°T and the Neosho, Mo. omnirng 223°T radials;" (Note: Redesignated V74S Ponca City VOR to Tulsa VOR and V74N Tulsa VOR to Fort Smith VOR due to relocation of Tulsa VOR.)

(19) VOR civil airway No. 88 (Tulsa, Okla. to Vichy, Mo.), is amended by changing the portion which reads: "From the Tulsa, Okla. omnirng stn via the intsxn of the Tulsa omnirng 050°T and the Springfield omnirng 261°T radials;" to read: "From the Tulsa, Okla. omnirng stn via the intsxn of the Tulsa omnirng 044°T and the Springfield omnirng 261°T radials;" (Note: Redesignated V88 due to relocation Tulsa VOR.)

(20) VOR civil airway No. 100 (North Platte, Nebr. to Detroit, Mich.), is amended to read: "From the North Platte, Nebr. omnirng stn via the Sioux City, Iowa omnirng stn; Waterloo, Iowa omnirng stn; Rockford, Ill. omnirng stn; Wheeling, Ill. omnirng stn; intsxn of the Wheeling omnirng 093°T and the Keeler omnirng 271°T radials; Keeler, Mich. omnirng stn; point of intsxn of the Litchfield, Mich. omnirng 050°T and the Salem omnirng 257°T radials; to the Salem, Mich. omnirng stn. The portion of this arwy below 1900 ft above mean sea level which overlaps the Savanna Restricted Area (R-498) is excluded." (Note: Added portion to V100 from Waterloo VOR to Rockford VOR. Redesignated former portion of V100 between Waterloo VOR and Polo VOR as V158)

(21) VOR civil airway No. 106 (Charleston, W. Va. to Kennebunk, Me.), is amended by changing the portion which reads: "intsxn of the Gardner omnirng 060°T and the Kennebunk, Me. omnirng 223°T radials;" to read" point of intsxn of the Gardner omnirng 051°T and the Concord, N.H. omnirng 146°T radials;" (Note: Redesignated V106 between Gardner VOR and Kennebunk VOR via the point of intsxn of the Gardner 051°T and Concord 146°T radials).

(22) VOR civil airway No. 129 (Rockford, Ill. to Eau Claire, Wis.), is amended to read: "From the Rockford, Ill. omnirng stn via the intsxn of the Rockford omnirng 278°T and the Lone Rock omnirng 162°T radials; Lone Rock, Wis. omnirng stn; LaCrosse, Wis. omnirng stn; to the Eau Claire, Wis. omnirng stn." (Note: Changed Rockford 276°T to 278° T and Lone Rock 163°T to 162°T to place the Freeport Intsxn on centerline of redesignated V100, V63 and V129).

(23) VOR civil airway No. 140 (Amarillo, Tex. to New York, N.Y.), is amended by changing the portion which reads: "Fayetteville, Ark. omnirng stn, including a N alternate via the intsxn of the Tulsa omnirng 065°T and the Fayetteville omnirng 287°T radials;" to read: "Fayetteville, Ark. omnirng stn, including a N alternate via the intsxn of the Tulsa omnirng 059°T and the Fayetteville omnirng 284°T radials;" (Note: Redesignated V140N between Tulsa VOR and Fayetteville VOR due to relocation of Tulsa VOR.)

(24) VOR civil airway No. 158 (Waterloo, Iowa to Polo, Ill.), is added to read: "From the Waterloo, Iowa omnirng stn via the point of intsxn of the Waterloo omnirng direct radial to the Rockford, Ill. omnirng stn with the Polo omnirng 297°T radial; to the Polo, Ill. omnirng stn. The portion of this arwy between 1900 ft above mean sea level which overlaps the Savanna Restricted Area (R-498) is excluded." (Note: New arwy. This airspace formerly a part of V100.)

(25) VOR civil airway No. 163 (Brownsville, Tex. to Oklahoma City, Okla.), is amended by changing the portion which reads: "and also an E alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the point of intsxn of the Oklahoma City omnirng 107°T and the Tulsa, Okla. omnirng 222°T radials." to read: "and also an E alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the point of intsxn of the Oklahoma City omnirng 107°T and the Tulsa, Okla. omnirng 228°T radials." (Note: Redesignated V163E between Ardmore VOR and Oklahoma City VOR due to relocation of Tulsa VOR.)

(26) VOR civil airway No. 267 (Miami, Fla. to Jacksonville, Fla.), is added to read: "From the Miami, Fla. omnirng stn via the intsxn of the Miami omnirng 338°T and the Orlando omnirng 164°T radials; Orlando, Fla. omnirng stn; to the Jacksonville, Fla. omnirng stn, including an E alternate from the Orlando omnirng stn to the Jacksonville omnirng stn via the Daytona Beach, Fla. omnirng stn and the point of intsxn of the Daytona Beach, Fla. omnirng 311°T with the Jacksonville omnirng direct radial to the Orlando omnirng stn. The portions of this arwy which overlap the Jacksonville Restricted Area (R-161i), the Lake George Restricted Area (R-176) and the Sterling Restricted Area (R-169) and R-170) are excluded." (Note: New arwy. This was formerly a part of V5.)

PART 601 - AMENDMENT 6 - Effective May 9, 1957:

CONTROL AREAS:

(1) Red civil airway No. 14 (Lone Rock, Wis. to Indianapolis, Ind.), caption changed.

(2) Red civil airway No. 27 (Atlanta, Ga. to Detroit, Mich.), is revoked.

(3) Red civil airway No. 29 (Elmira, N.Y. to Baltimore, Md.), is revoked.

(4) Red civil airway No. 102 (Lexington, Ky. to Huntington, W. Va.), caption changed, and is amended to read: "All of Red civil arwy No. 102".

(5) Blue civil airway No. 12 (McGrath, Alaska to Galena, Alaska), is added to read: "All of Blue civil arwy No. 12."

(6) Blue civil airway No. 21 (Coles Point, Va. to Elmira, N.Y.), is added to read: "All of Blue civil arwy No. 21".

(7) Blue civil airway No. 87 (Atlanta, Ga. to Detroit, Mich.), caption changed and is amended to read: "All of Blue civil arwy No. 87."

(8) VOR civil airway No. 5 (Jacksonville, Fla. to London, Ont.), caption changed.

(9) VOR civil airway No. 158 (Waterloo, Iowa to Polo, Ill.), is added to read: "All of VOR civil arwy No. 158".

(10) VOR civil airway No. 267 (Miami, Fla. to Jacksonville, Fla.), is added to read: "All of VOR civil arwy No. 267."

CONTROL AREA EXTENSIONS:

(1) (Augusta, Ga.), is amended by adding the following portion: "and within 5 miles either side of the N (back) course of the Augusta ILS lclzr extending from the lclzr to a point 33 miles N."

(2) (Fresno, Calif.), is amended by changing the words which read: "extending to a point at lat 38-20-00, long. 120-20-00" to read: "extending to a point at lat 38-20-00, long. 120-00-00,".

(3) (Louisville, Ky.), is amended in last portion by changing the words which read: "bounded on the SE by Amber civil arwy No. 6," to read: "bounded on the SE by VOR civil arwy No. 5."

(4) (Knoxville, Tenn.), is amended by changing the words "Red civil arwy No. 27" to read: "Blue civil arwy No. 87" wherever they appear." (Note: Due to redesignation of Red 27 as Blue 87.)

(5) (Washington, D. C.), is amended by changing the words which read: "Red civil arwy Nos. 29 and 45," to read: "Blue civil airway No. 21 and Red civil airway No. 45,".

(6) (West Palm Beach, Fla.), is amended to read: "Within 5 miles either side of the 36° T radial of the West Palm Beach omnirng extending from the omnirng stn to its intsxn with the 109°T radial of the Orlando, Fla. omnirng thence northwestward within 5 miles either side of the Orlando omnirng 109°T radial to its intsxn with the centerline of Wilmington, N. C. control area extension No. 1150, excluding the portion below 2000 ft MSL which lies outside the continental limits of the United States."

(7) (Lexington, Ky.), is revoked.

(8) (Tampa, Fla.), is amended by adding the following sentence to present control area extension: "The portion of this control area above 20,000 feet MSL lying between N latitude 24-50-00 and the southern boundary of the Miami Control area extension No. 1230 is excluded."

(9) (Tulsa, Okla.), is amended by changing the last portion to read: "that airspace S of Tulsa bounded on the W and NW by VOR civil airway No. 15E; on the E and SE by lines 5 miles E of and parallel to the 008°T radial of the McAlester, Okla. omnirng extending from the southern boundary of VOR civil airway No. 74 to the McAlester omnirng stn, on the E and SE by a line 5 miles E of and parallel to a direct line extending between the McAlester omnirng stn and the Dallas, Tex. omnirng stn, and on the S by the Sherman, Tex. Perrin AFB control area extension No. 1330."

(10) (Altus, Okla.), is amended by adding the following portion to present control area extension: "including the airspace N of Altus AFB bounded on the W by long. 99-38-00, on the NE by VOR civil airway No. 17 and on the SE by VOR civil arwy No. 14."

(11) (Myrtle Beach, S.C.), is amended by adding the following to present control area extension: "and excluding the portion which overlaps Restricted Area (R-515)."

(12) (Texarkana, Ark.), is amended to read: "Within 5 miles either side of the 309°T radial of the Texarkana omnirng extending from the omnirng stn to a point 15 miles NW."

CONTROL ZONES:

(1) Five mile radius zones, is amended by changing "Yuma, Ariz.: Yuma County Arpt" to read: "Yuma, Ariz., Vincent AFB."

(2) (Tulsa, Okla.), is amended by changing the portion which reads: "and within 2 mi either side of the 340°T and 160°T radials of the Tulsa omnirng extending from the Tulsa Municipal Arpt to a point 10 miles NW of the omnirng stn." to read: "and within 2 miles either side of the 88°T and 268°T radials of the Tulsa omnirng extending from the Tulsa Municipal Arpt to a point 10 miles E of the omnirng stn."

(3) (Casper, Wyo.), is amended by changing the name "Natrona County Arpt" to read: "Casper Air Terminal" wherever it appears."

(4) (Louisville, Ky.), is amended by changing the portion which reads: "extending 2 mi either side of the E course of the Louisville rdo rng to the Eastwood fan mrkr" to read: "extending 2 miles either side of a line bearing 87°T from Bowman Fld to a point 11 miles E of the field,"

(5) (Augusta, Ga.), is amended by adding the following portion to present control zone: "and within 2 miles either side of the Augusta ILS lclzr N (back) course extending to a point 8 miles N of the lclzr."

(6) (Williamsport, Pa.), is amended by changing the name "Williamsport Municipal Arpt" to read: "Lycoming County Arpt."

(7) (El Toro, Calif.), is amended by deleting the words which read: "Amber civil arwy No. 2 and" (Note: Due to recission portion Amber 2 from Long Beach to Daggett, Calif. El Toro control zone automatically extends to Green 2).

(8) (Great Falls, Mont.), is amended by changing the words "Great Falls Air Force Base" to read: "Malmstrom Air Force Base" wherever they appear.

(9) (Gulfport, Miss.), is amended by deleting the following words: "shall be designated a control zone during the period beginning at 0001 c.s.t. June 1 to 2400 c.s.t. September 15, 1955, and annually thereafter." (Note: Above deletion redesignates Gulfport control zone on a 24-hour daily basis.)

(10) (Texarkana, Ark.), is amended to read: "Within a 5 mile radius of the Texarkana Municipal Arpt, within 2 miles either side of the 129°T and 309°T radials of the Texarkana omnirng extending from the 5 mile radius zone to a point 10 miles NW of the omnirng stn, and within 2 miles either side of the N course of the Texarkana rdo rng extending from the rdo rng stn to a point 10 miles N."

REPORTING POINTS:

(1) Green civil airway No. 2 (Seattle, Wash. to Boston, Mass.), is amended after "Helena, Mont. rdo rng stn;" by adding the following reporting point: "Bozeman, Mont. rdo rng stn;"

(2) Amber civil airway No. 6 (Jacksonville, Fla. to United States-Canadian Border), is amended by deleting the following reporting point: "Louisville, Ky. rdo rng stn." and by adding the following reporting point in lieu thereof: "Lexington, Ky., nondirectional rdo bcn".

(3) Red civil airway No. 14 (Lone Rock, Wis. to Indianapolis, Ind.), caption changed.
(4) Red civil airway No. 27 (Atlanta, Ga. to Detroit, Mich.), is revoked.
(5) Red civil airway No. 29 (Elmira, N.Y. to Baltimore, Md.), is revoked.
(6) Red civil airway No. 102 (Lexington, Ky. to Huntington, W. Va.), is amended to read "No reporting point designation."
(7) Blue civil airway No. 12 (McGrath, Alaska to Galena, Alaska), is added to read: "No reporting point designation."
(8) Blue civil airway No. 21 (Coles Point, Va. to Elmira, N.Y.), is added to read: "No reporting point designation."
(9) Blue civil airway No. 87 (Atlanta, Ga. to Detroit, Mich.), is amended to read: "Corbin, Ky. VHF VAR rdo rng stn."

VOR REPORTING POINT:

Domestic VOR reporting point is amended by adding the following reporting point: Charlo Intsxn - the intsxn of the Mullan Pass, Idaho, omnirng 089°T and the Missoula, Mont. omnirng 354°T radials.

✓ CIVIL AIRWAY AND CONTROL AREA AMENDMENTS: Effective as indicated, unless otherwise advised the following civil airways and control areas are added as follows:

PART 600 - AMENDMENT 6 - Effective May 9, 1957:

CIVIL AIRWAYS:

(1) VOR civil airway No. 1500 (San Francisco, Calif. to New York, N.Y.), is added to read: "From the point of intsxn of the Oakland omnirng 217°T and the Salinas omnirng 319° T radials via the Oakland, Calif. omnirng stn; Sacramento, Calif. omnirng stn; intsxn of the Sacramento omnirng 055°T and the Reno omnirng 230°T radials; Reno, Nev. omnirng stn; to the Lovelock, Nev. omnirng stn. From the Burley, Idaho omnirng stn to the Pocatello, Idaho, omnirng stn. From the Watertown, S. Dak. omnirng stn via the Minneapolis, Minn. omnirng stn; Eau Claire, Wis. omnirng stn; Wausau, Wis. omnirng stn; Green Bay, Wis. omnirng stn; to the White Cloud, Mich. omnirng stn. From the Erie, Pa. omnirng stn via the Bradford, Pa. omnirng stn; Selinsgrove, Pa. omnirng stn; point of intsxn of the Selinsgrove omnirng 104°T and the Allentown, Pa. omnirng 211°T radials; Colts Neck, N.J. omnirng stn; point of intsxn of the Colts Neck omnirng 078°T and the Idlewild omnirng 212°T radials; to the Idlewild, N.Y. omnirng stn." (Note: Assignment of V1500 to existing VOR airways as initial step in designation of transcontinental airway.)

(2) VOR civil airway No. 1502 (San Francisco, Calif. to New York, N.Y.), is added to read: "From the point of intsxn of the Oakland omnirng 217°T and the Salinas, Calif. omnirng 319°T radials via the Oakland, Calif. omnirng stn; Sacramento, Calif. omnirng stn; intsxn of the Sacramento omnirng 055°T and the Reno omnirng 230°T radials; Reno, Nev. omnirng stn; to the Lovelock, Nev. omnirng stn. From the Burley, Idaho omnirng stn to the Pocatello, Idaho omnirng stn. From the Rapid City, S. Dak. omnirng stn via the Philip, S. Dak. omnirng stn; Pierre, S. Dak. omnirng stn; Huron, S. Dak. omnirng stn; to the Redwood Falls, Minn. omnirng stn. From the Lone Rock, Wis. omnirng stn via the intsxn of the Lone Rock omnirng 103°T and the Milwaukee omnirng 273°T radials to the Milwaukee, Wis. omnirng stn. From the Lansing, Mich. omnirng stn to the Salem, Mich. omnirng stn. From the Erie, Pa. omnirng stn via the Bradford, Pa. omnirng stn; Selinsgrove, Pa. omnirng stn; point of intsxn of the Selinsgrove omnirng 104°T and the Allentown, Pa. omnirng 211°T radials; Colts Neck, N.J. omnirng stn; point of intsxn of the Colts Neck omnirng 078° T and the Idlewild omnirng 212°T radials; to the Idlewild, N.Y. omnirng stn." (Note: Assignment of V1502 to existing VOR airways as initial step in designation of transcontinental airway.)

(3) VOR civil airway No. 1504 (San Francisco, Calif. to Washington, D.C.), is added to read: "From the point of intsxn of the Oakland omnirng 217°T and the Salinas, Calif. omnirng 319°T radials via the Oakland, Calif. omnirng stn; Sacramento, Calif. omnirng stn; intsxn of the Sacramento omnirng 055°T and the Reno omnirng 230°T radials; Reno, Nev. omnirng stn; Lovelock, Nev. omnirng stn; Battle Mountain, Nev. omnirng stn; Elko, Nev. omnirng stn; to the Wells, Nev. omnirng stn. From the Lone Rock, Wis. omnirng stn via the point of intsxn of the Lone Rock omnirng 103°T and the Milwaukee omnirng 273°T radials; Milwaukee, Wis. omnirng stn; Pullman, Mich. omnirng stn; Litchfield, Mich. omnirng stn; intsxn of the Litchfield omnirng 098°T and the Carleton omnirng 264°T radials; to the Carleton, Mich. omnirng stn. From the Cleveland, Ohio omnirng stn via the Wheeling, W. Va. omnirng stn; Grantsville, Md. omnirng stn; Front Royal, Va. omnirng stn; intsxn of the Front Royal omnirng stn 112°T and the Washington terminal omnirng 245°T radials; to the Washington, D. C. terminal omnirng stn. (Note: Assignment of V1504 to existing VOR airways as initial step in designation of transcontinental airways.)

(4) VOR civil airway No. 1506 (San Francisco, Calif. to Washington, D.C.), is added to read: "From the point of intsxn of the Oakland omnirng 217°T and the Salinas, Calif. omnirng 319°T radials via the Oakland, Calif. omnirng stn; to the Modesto, Calif. omnirng stn. From the Bonneville, Utah, omnirng stn via the Salt Lake City, Utah omnirng stn; Fort Bridger, Wyo. omnirng stn; Rock Springs, Wyo. omnirng stn; Cherokee, Wyo. omnirng stn; Rock River, Wyo. omnirng stn; to the Chadron, Nebr. omnirng stn. From the Sioux City, Iowa omnirng stn via the Waterloo, Iowa omnirng stn; Rockford, Ill. omnirng stn; Wheeling, Ill. omnirng stn; intsxn of the Wheeling omnirng 093°T and the Keeler omnirng 271°T radials; Keeler, Mich. omnirng stn; point of intsxn of the Keeler omnirng 085°T and the Litchfield omnirng 293°T radials; Litchfield, Mich. omnirng stn; Waterville, Ohio omnirng stn; Mansfield, Ohio omnirng stn; Morgantown, W. Va. omnirng stn; Front Royal, Va. omnirng stn; intsxn of the Front Royal omnirng 112°T and the Washington terminal omnirng 245°T radials to the Washington, D.C. terminal omnirng stn." (Note: Assignment of V1506 to existing VOR airways as initial step in designation of transcontinental airways).

(5) VOR civil airway No. 1508 (Los Angeles, Calif. to New York, N.Y.), is added to read: "From the Los Angeles, Calif. omnirng stn via the intsxn of the Los Angeles omnirng 057°T and the Daggett omnirng 235°T radials; Daggett, Calif. omnirng stn; Las Vegas, Nev. omnirng stn; Mormon Mesa, Nev. omnirng stn; to the Milford, Utah omnirng stn. From the Sioux City, Iowa omnirng stn via the Waterloo, Iowa omnirng stn; Rockford, Ill. omnirng stn; Wheeling, Ill. omnirng stn; intsxn of the Wheeling omnirng 093°T and the Keeler omnirng 271°T radials; Keeler, Mich. omnirng stn; point of intsxn of the Keeler omnirng 085°T and the Litchfield omnirng 293°T radials; Litchfield, Mich. omnirng stn; intsxn of the Litchfield omnirng 098°T and the Carleton omnirng 264°T radials; to the Carleton, Mich. omnirng stn. From the Jefferson, Ohio omnirng stn via the Fitzgerald, Pa. omnirng stn; Philipsburg, Pa. omnirng stn; Selinsgrove, Pa. omnirng stn; point of intsxn of the Selinsgrove omnirng 104°T and the Allentown, Pa. omnirng 211°T radials; Colts Neck, N.J. omnirng stn; point of intsxn of the Colts Neck omnirng 078°T and the Idlewild omnirng 212°T radials; to the Idlewild, N.Y. omnirng stn." (Note: Assignment of V1508 to existing VOR airways as initial step in designation of transcontinental airways).

(6) VOR civil airway No. 1510 (Los Angeles, Calif. to New York, N.Y.), is added to read: "From the Los Angeles, Calif. omnirng stn via the intsxn of the Los Angeles omnirng 057°T and the Daggett omnirng 235°T radials; Daggett, Calif. omnirng stn; Las Vegas, Nev. omnirng stn; Mormon Mesa, Nev. omnirng stn; Bryce Canyon, Utah, omnirng stn; Hanksville, Utah omnirng stn; Grand Junction, Colo. omnirng stn; Kremmling, Colo. omnirng stn; point of intsxn of the Kremmling omnirng 081°T and the Denver, Colo. omnirng 334°T radials; Akron, Colo. omnirng stn; Imperial, Nebr. omnirng stn; Grand Island, Nebr. omnirng stn; Omaha, Nebr. omnirng stn; Des Moines, Iowa omnirng stn; Iowa City, Iowa omnirng stn; Moline, Ill. omnirng stn; Naperville, Ill. omnirng stn; South Bend, Ind. omnirng stn; intsxn of the South Bend omnirng 092°T and the Waterville omnirng 288°T radials; Waterville, Ohio omnirng stn, including a S alternate from the Iowa City omnirng stn to the Waterville omnirng stn via the point of intsxn of the Iowa City omnirng 093°T and the Joliet omnirng 265°T radials, the Joliet, Ill. omnirng stn, the Chicago Heights, Ill. omnirng stn and the Goshen, Ind. omnirng stn; Cleveland, Ohio omnirng stn; Youngstown, Ohio omnirng stn; Philipsburg, Pa. omnirng stn; Selinsgrove, Pa. omnirng stn; point of intsxn of the Selinsgrove omnirng 104°T and the Allentown, Pa. omnirng 211°T radials; Colts Neck, N.J. omnirng stn; point of intsxn of the Colts Neck omnirng 078°T and the Idlewild omnirng 212°T radials; to the Idlewild, N.Y. omnirng stn." (Note: Assignment of V1510 to existing VOR airways as initial step in designation of transcontinental airways).

(7) VOR civil airway No. 1512 (Los Angeles, Calif. to New York, N.Y.), is added to read: "From the Los Angeles, Calif. omnirng stn via the intsxn of the Los Angeles omnirng 057°T and the Daggett omnirng 235°T radials; to the Daggett, Calif. omnirng stn. From the Russell, Kans. omnirng stn via the Salina, Kans. omnirng stn; Topeka, Kans omnirng stn; Kansas City, Mo. omnirng stn; Quincy, Ill. omnirng stn; to the Springfield, Ill. omnirng stn, including a S alternate from the Kansas City, Mo. omnirng stn to the Indianapolis, Ind. omnirng stn via the Columbia, Mo. omnirng stn, the St. Louis, Mo. omnirng stn, the Vandalia, Ill. omnirng stn and the Terre Haute, Ind. omnirng stn. From the Indianapolis, Ind. omnirng stn via the Dayton, Ohio omnirng stn; Appleton, Ohio omnirng stn; Wheeling, W. Va. omnirng stn; Pittsburgh, Pa. omnirng stn; to the Johnstown, Pa. omnirng stn. From the Selinsgrove, Pa. omnirng stn via the point of intsxn of the Selinsgrove omnirng 104°T and the Allentown, Pa. omnirng 211°T radials; Colts Neck, N.J. omnirng stn; point of intsxn of the Colts Neck omnirng 078°T and the Idlewild omnirng 212°T radials; to the Idlewild, N.Y. omnirng stn." (Note: Assignment of V1512 to existing VOR airways as initial step in designation of transcontinental airways. Note break in main V1512 between Springfield, Ill. VOR and Indianapolis VOR.)

(8) VOR civil airway No. 1514 (San Francisco, Calif. to New York, N.Y.), is added to read: "From the point of intsxn of the Oakland omnirng 217°T and the Salinas, Calif. omnirng 319°T radials via the Oakland, Calif. omnirng stn; to the Modesto, Calif. omnirng stn. From the Pueblo, Colo. omnirng stn to the Lamar, Colo. omnirng stn. From the Russell, Kans. omnirng stn via the Salina, Kans. omnirng stn; Topeka, Kans. omnirng stn; Kansas City, Mo. omnirng stn; Quincy, Ill. omnirng stn, to the Springfield, Ill., omnirng stn, including a S alternate from the Kansas City, Mo. omnirng stn to the Indianapolis, Ind. omnirng stn via the Columbia, Mo. omnirng stn, the St, Louis, Mo. omnirng stn, the Vandalia, Ill. omnirng stn and the Terre Haute, Ind. omnirng stn. From the Indianapolis, Ind. omnirng stn via the Dayton, Ohio omnirng stn; Appleton, Ohio, omnirng stn; Wheeling, W. Va. omnirng stn; Pittsburgh, Pa. omnirng stn; Johnstown, Pa. omnirng stn; Harrisburg, Pa. omnirng stn; point of intsxn of the West Chester, Pa. omnirng 314°T and the Allentown, Pa. omnirng 228°T radials; Pottstown, Pa. omnirng stn; point of intsxn of the Pottstown omnirng 104°T and the Colts Neck omnirng 242°T radials; Colts Neck, N.J. omnirng stn; point of intsxn of the Colts Neck omnirng 078°T and the Idlewild omnirng 212°T radials; to the Idle-

wild, N.Y. omnirng stn." (Note: Assignment of V1514 to existing VOR airways as initial step in designation of transcontinental airway. Note break in main V1514 between Springfield, Ill. VOR and the Indianapolis VOR).

(9) VOR civil airway No. 1516 (San Francisco, Calif. to Washington, D.C.), is added to read: "From the point of intsxn of the Oakland omnirng 217°T and the Salinas, Calif. omnirng 319°T radials via the Oakland, Calif. omnirng stn; Modesto, Calif. omnirng stn; to the Fresno, Calif. omnirng stn. From the point of intsxn of the Gage, Okla. omnirng 059°T and the Ponca City, omnirng 280°T radials via the Ponca City, Okla. omnirng stn; intsxn of the Ponca City omnirng 076°T and the Springfield omnirng 261°T radials; Springfield, Mo. omnirng stn; Farmington, Mo. omnirng stn; Evansville, Ind. omnirng stn; intsxn of the Evansville omnirng 080°T and the Louisville omnirng 269°T radials; Louisville, Ky. omnirng stn; York, Ky. omnirng stn; Elkins, W. Va. omnirng stn; Front Royal, Va. omnirng stn; intsxn of the Front Royal omnirng 112°T and the Washington terminal omnirng 245°T radials; to the Washington, D.C. terminal omnirng stn." (Note: Assignment of V1516 to existing VOR airways as initial step in designation of transcontinental airways.)

(10) VOR civil airway No. 1518 (Los Angeles, Calif. to Washington, D.C.), is added to read: "From the Los Angeles, Calif. omnirng stn via the intsxn of the Los Angeles omnirng 057°T and the Daggett omnirng 235°T radials; Daggett, Calif. omnirng stn; Needles, Calif. omnirng stn; Prescott, Ariz. omnirng stn; Winslow, Ariz. omnirng stn; Zuni, N. Mex. omnirng stn; Grants, N. Mex. omnirng stn; Albuquerque, N. Mex. omnirng stn; Otto, N. Mex. omnirng stn; Anton Chico, N. Mex. omnirng stn; Tucumcari, N. Mex. omnirng stn; Amarillo, Tex. omnirng stn; Sayre, Okla. omnirng stn; to the point of intsxn of the Sayre omnirng 071° T and the Oklahoma City omnirng 282°T radials. From the point of intsxn of the Oklahoma City, Okla. omnirng 021°T and the Vance, Okla. omnirng 143°T radials via the Tulsa, Okla. omnirng stn; Fayetteville, Ark. omnirng stn; Flippin, Ark. omnirng stn; Walnut Ridge, Ark, omnirng stn; Dyersburg, Tenn. omnirng stn; Nashville, Tenn. omnirng stn; intsxn of the Nashville omnirng 059°T radial and the Corbin VAR west aural course; Corbin, Ky. VAR stn; Paynesville, W. Va. nondirectional rdo bcn; Montebello, Va. omnirng stn; Gordonsville, Va. omnirng stn; point of intsxn of the Gordonsville omnirng 056°T and the Washington term. omnirng 197°T radials; to the Washington, D.C. term omnirng stn." (Note: Assignment of V1518 to existing VOR airways as initial step in designation of transcontinental airways.)

(11) VOR civil airway No. 1520 (Los Angeles, Calif. to Washington, D.C.), is added to read: "From the Los Angeles, Calif. omnirng stn via the intsxn of the Los Angeles omnirng 057°T and the Daggett omnirng 235°T radials; Daggett, Calif. omnirng stn; Needles, Calif. omnirng stn; to the Prescott, Ariz. omnirng stn. From the Little Rock, Ark. omnirng stn via the Memphis, Tenn. omnirng stn; to the Jackson, Tenn. omnirng stn. From the Crossville, Tenn. omnirng stn via the intsxn of the Crossville omnirng 104°T and the Knoxville omnirng 249°T radials; Knoxville, Tenn. omnirng stn; Tri-City, Tenn. omnirng stn; Pulaski, Va. omnirng stn; Montebello, Va. omnirng stn; Gordonsville, Va. omnirng stn; point of intsxn of the Gordonsville omnirng 056°T and the Washington term omnirng 197°T radials; to the Washington, D.C. terminal omnirng stn." (Note: Assignment of V1520 to existing VOR airways as initial step in designation of transcontinental airways.)

(12) VOR civil airway No. 1522 (Los Angeles, Calif. to Washington, D.C.), is added to read: "That airspace over United States territory from the Los Angeles, Calif. omnirng stn via the Ontario, Calif. omnirng stn; intsxn of the Ontario omnirng 091°T and the Blythe, omnirng 288°T radials; Blythe, Calif. omnirng stn; to the Hassayampa, Ariz. omnirng stn. From the Tucson, Ariz. omnirng stn via the Cochise, Ariz. omnirng stn; Columbus, N. Mex. omnirng stn; El Paso, Tex. omnirng stn; Salt Flat, Tex. omnirng stn; Wink, Tex. omnirng stn; Midland, Tex. omnirng stn; Big Spring, Tex. omnirng stn; Abilene, Tex. omnirng stn; Mineral Wells, Tex. omnirng stn; Dallas, Tex. omnirng stn; to the Sulphur Springs, Tex. omnirng stn. From the Birmingham, Ala. omnirng stn via the Anniston, Ala. omnirng stn; intsxn of the Anniston, omnirng 084°T and the Atlanta Arpt ILS lclzr W course; Atlanta, Ga. Arpt. ILS lclzr; intsxn of the Atlanta Arpt ILS lclzr E course and the Atlanta, Ga. omnirng 048°T radial; intsxn of the Atlanta omnirng 048°T and the Royston omnirng 236°T radials; Royston, Ga. omnirng stn; Spartanburg, S.C. omnirng stn; Greensboro, N.C. omnirng stn; South Boston, Va. omnirng stn; Gordonsville, Va. omnirng stn; point of intsxn of Gordonsville omnirng 056°T and the Washington terminal omnirng 197°T radials; to the Washington, D.C. terminal omnirng stn." (Note: Assignment of V1522 to existing VOR airways as initial step in designation of transcontinental airways.)

PART 601 - AMENDMENT 7 - Effective May 9, 1957:

CONTROL AREAS:

(1) VOR civil airway No. 1500 (San Francisco, Calif. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 1500".

(2) VOR civil airway No. 1502 (San Francisco, Calif. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 1502.".

(3) VOR civil airway No. 1504 (San Francisco, Calif. to Washington, D.C.), is added to read: "All of VOR civil arwy No. 1504".

(4) VOR civil airway No. 1506 (San Francisco, Calif. to Washington, D.C.), is added to read: "All of VOR civil airway No. 1506".

(5) VOR civil airway No. 1508 (Los Angeles, Calif. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 1508)'.

(6) VOR civil airway No. 1510 (Los Angeles, Calif. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 1510, but excluding the airspace between the main arwy and its S alternate between the Iowa City, Iowa omnirng stn and the Waterville, Ohio omnirng stn."

(7) VOR civil airway No. 1512 (Los Angeles, Calif. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 1512, but excluding the airspace between the main arwy and its S alternate between the Kansas City, Mo. omnirng stn and the Indianapolis, Ind. omnirng stn."

(8) VOR civil airway No. 1514 (San Francisco, Calif. to New York, N.Y.), is added to read: "All of VOR civil airway No. 1514, but excluding the airspace between the main arwy and its S alternate between the Kansas City, Mo. omnirng stn and the Indianapolis, Ind. omnirng stn."

(9) VOR civil airway No. 1516 (San Francisco, Calif. to Washington, D.C.), is added to read: "All of VOR civil arwy No. 1516".

(10) VOR civil airway No. 1518 (Los Angeles, Calif. to Washington, D.C.), is added to read: "All of VOR civil arwy No. 1518".

(11) VOR civil airway No. 1520 (Los Angeles, Calif. to Washington, D.C.), is added to read: "All of VOR civil arwy No. 1520".

(12) VOR civil airway No. 1522 (Los Angeles, Calif. to Washington, D.C.), is added to read: "All of VOR civil arwy No. 1522".

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective as indicated:

DESIGNATE - Effective Immediately:

MANASSAS, VA. (VHF) INTSXN - the intsxn of the 168°T radial of the Herndon, Va. VOR and the 249°T radial of the Washington, D.C. TVOR.

DESIGNATE - Effective April 11, 1957:

THORSBY, ALA. (VHF) INTSXN - the intsxn of the 326°T radial of the Montgomery, Ala. VOR and the 180°T radial of the Birmingham, Ala. VOR.

DESIGNATE - Effective May 9, 1957:

(1) ADAIR, OKLA. (VHF) INTSXN - the intsxn of the 059°T radial of the Tulsa, Okla. VOR and the 284°T radial of the Fayetteville, Ark. VOR.

(2) ANDERSON, TEX. (VHF) INTSXN - the intsxn of the 112°T radial of the College Station, Tex. VOR and the 016°T radial of the Eagle Lake, Tex. VOR.

(3) AUBURN, N.H. (VHF) INTSXN - the intsxn of the 051°T radial of the Gardner, Mass. VOR and the 146°T radial of the Concord, N.H. VOR.

(4) AXIS, ALA. (VHF) INTSXN - the intsxn of the 049°T radial of the Mobile, Ala. VOR and the 309°T radial of the Navy Pensacola, Fla. VOR.

(5) BELTON, TEX. (VHF) INTSXN - the intsxn of the 016°T radial of the Austin, Tex. VOR and the 292°T radial of the College Station, Tex. VOR.

(6) BOLD SPRING, GA. (VHF) INTSXN - the intsxn of the 236°T radial of the Royston, Ga. VOR and the 105°T radial of the Norcross, Ga. VOR.

(7) BROOME, CALIF. (VHF) INTSXN - the intsxn of the W course of the Burbank, Cal. ILS lclzr and the 187°T radial of the Fillmore, Calif. VOR.

(8) BUTLER, TEX. (VHF) INTSXN - the intsxn of the 109°T radial of the Austin, Tex. VOR and the 249°T radial of the College Station, Tex. VOR.

(9) CEDAR, FLA. (VHF) INTSXN - the intsxn of the 170°T radial of the Cross City, Fla. VOR and the 242°T radial of the Gainesville, Fla. VOR.

(10) CEDAR VALLEY, TEX. (VHF) INTSXN - the intsxn of the 237°T radial of the Austin, Tex. VOR and the 299°T bearing from the Bergstrom AFB, Tex. Rbn.

(11) COLLEGE, OKLA. (VHF) INTSXN - the intsxn of the 044°T radial of the Tulsa, Okla. VOR and the 284°T radial of the Fayetteville, Ark. VOR.

(12) CRESCENT, OKLA. (VHF) INTSXN - the intsxn of the 021°T radial of the Oklahoma City VOR and the 143°T radial of the Vance, Okla. VOR.

(13) CREST, GA. (VHF) INTSXN - the intsxn of the 174°T radial of the Atlanta, Ga. VOR and the 297°T radial of the Macon, Ga. VOR.

(14) DOUGLAS, TENN. (VHF) INTSXN - the intsxn of the 090°T radial of the Knoxville, Tenn. VOR and the 300°T radial of the Asheville, Tenn. VOR.

(15) EUDORA, KANSAS (VHF) INTSXN - the intsxn of the 231°T radial of the Kansas City, Mo. VOR and the 190°T radial of the St. Joseph, Mo. VOR.

(16) FABENS, TEX. (VHF) INTSXN - the intsxn of the 132°T radial of the El Paso, Tex. VOR and the 272°T radial of the Hudspeth, Tex. VOR.

(17) HEMSTEAD, TEX. (VHF) INTSXN - the intsxn of the 152°T radial of the College Station, Tex. VOR and the 016°T radial of the Eagle Lake, Tex. VOR.

(18) HUTTO, TEX. (VHF) INTSXN - the intsxn of the 044°T radial of the Austin, Tex. VOR and the 269°T radial of the College Station, Tex. VOR.

(19) JACKSON, NEBR. Rbn.

(20) JENKINSBURG, GA. (VHF) INTSXN - the intsxn of the 330°T radial of the Macon, Ga. VOR and the 077°T radial of the La Grange, Ga. VOR.

(21) MADISON, N.C. (VHF) INTSXN - the intsxn of the 360°T radial of the Greensboro, N.C. VOR and the 251°T radial of the South Boston, Va. VOR.

(22) MANCHACA, TEX. (VHF) INTSXN - the intsxn of the 207°T radial of the Austin, Tex. VOR and the 299°T bearing from Bergstrom AFB, Tex. Rbn.

(23) MARBLE FALLS, TEX. (VHF) INTSXN - the intsxn of the 293°T radial of the Austin, Tex. VOR and the 160°T radial of the Lometa, Tex. VOR.

(24) MAZIE, OKLA. (VHF) INTSXN - the intsxn of the 122°T radial of the Tulsa, Okla. VOR and the 223°T radial of the Neosho, Mo. VOR.

(25) MOUNDS, OKLA. (VHF) INTSXN - the intsxn of the 210°T radial of the Tulsa, Okla. VOR and the 135°T radial of the Ponca City, Okla. VOR.

(26) NAVASOTA, TEX. (VHF) INTSXN - the intsxn of the 127°T radial of the College Station, Tex. VOR and the 016°T radial of the Eagle Lake, Tex. VOR.

(27) NOWATA, OKLA. (VHF) INTSXN - the intsxn of the 026°T radial of the Tulsa, Okla. VOR and the 255°T radial of the Neosho, Mo. VOR.

(28) OAK HILL, TEX. (VHF) INTSXN - the intsxn of the 222°T radial of the Austin, Tex. VOR and the 299°T bearing from Bergstrom AFB, Tex. Rbn.

(29) OSKALOOSA, KANS. (VHF) INTSNX - the intsxn of the 079°T radial of the Topeka, Kans VOR and the 195°T radial of the St. Joseph, Mo. VOR.

(30) OTTER, FLA. (VHF) INTSXN - the intsxn of the 150°T radial of the Cross City, Fla. VOR and the 242°T radial of the Gainesville, Fla. VOR.

(31) PAIGE, TEX. (VHF) INTSXN - the intsxn of the 109°T radial of the Austin, Tex. VOR and the 233°T radial of the College Station, Tex. VOR.

(32) PRYOR, OKLA. (VHF) INTSXN - the intsxn of the 088°T radial of the Tulsa, Okla. VOR and the 223°T radial of the Neosho, Mo. VOR.

(33) RALEIGH, N.C. LOM

(34) REVERE, MASS. (VHF) INTSXN - the intsxn of the E course of the Boston-Bedford Mass. ILS lclzr and the 014°T radial of the Boston, Mass. VOR.

(35) ROGERS, TEX. (VHF) INTSXN - the intsxn of the 181°T radial of the College Station, Tex. VOR.

(36) ROUND ROCK, TEX. (VHF) INTSXN - the intsxn of the 016°T radial of the Austin, Tex. VOR and the 269°T radial of the College Station, Tex. VOR.

(37) SAPULPA, OKLA. (VHF) INTSXN - the intsxn of the 228°T radial of the Tulsa, Okla. VOR and the 135°T radial of the Ponca City, Okla. VOR.

(38) SARGENT, GA. (VHF) INTSXN - the intsxn of the 262°T radial of the Atlanta, Ga. VOR and the 037°T radial of the La Grange, Ga. VOR.

(39) TONGANOXIE, KANS. (VHF) INTSXN - the intsxn of the 095°T radial of the Topeka Kans. VOR and the 195°T radial of the St. Joseph, Mo. VOR.

(40) VINITA, OKLA. (VHF) INTSXN - the intsxn of the 044°T radial of the Tulsa, Okla. VOR and the 255°T radial of the Neosho, Mo. VOR.

(41) WAGONER, OKLA. (VHF) INTSXN - the intsxn of the 122°T radial of the Tulsa, Okla. VOR and the 230°T radial of the Neosho, Mo. VOR.

(42) WALBURG, TEX. (VHF) INTSXN - the intsxn of the 016°T radial of the Austin, Tex. VOR and the 283°T radial of the College Station, Tex. VOR.

(43) WESTVILLE, IND. (VHF) INTSXN - the intsxn of the 089°T radial of the Chicago Heights, Ill. VOR and the 229°T radial of the Keeler, Mich. VOR.

(44) WILLISTON, FLA. (VHF) INTSXN - the intsxn of the 125°T radial of the Cross City, Fla. VOR and the 242°T radial of the Gainesville, Fla. VOR.

(45) WINCHESTER, KANS. (VHF) INTSXN - the intsxn of the 064°T radial of the Topeka, Kans. VOR and the 199°T radial of the St. Joseph, Mo. VOR.

(46) WINESAP, TENN. (VHF) INTSXN - the intsxn of the 283°T radial of the Crossville, Tenn. VOR and the 357°T radial of the Chattanooga, Tenn. VOR.

REDESIGNATE: Effective May 9, 1957:

(1) BAUXITE, ARK. (VHF) INTSXN - the intsxn of the 297°T radial of the Pine Bluff, Ark. VOR and the 235°T radial of the Little Rock, Ark. VOR.

(2) BRADLEY, LA. (VHF) INTSXN - the intsxn of the 150°T radial of the Texarkana, Ark. VOR and the 023°T radial of the Shreveport, La. VOR.

(3) CADDO LAKE, TEX. (VHF) INTSXN - the intsxn of the 275°T radial of the Shreveport, La. VOR and the 184°T radial of the Texarkana, Ark. VOR.

(4) CHATTAHOOCHEE, GA. (VHF) INTSXN - the intsxn of the W course of the Atlanta, Ga. ILS and the 307°T radial of the Atlanta, Ga. VOR.

(5) CONYERS, GA. (LF) INTSXN - the intsxn of the E course of the Atlanta, Ga. ILS and the 124°T bearing from Lost Mountain, Ga. Rbn.

(6) DONCASTER, MD. (VHF) INTSXN - the intsxn of the 056°T radial of the Gordonsville, Va. VOR and the 197°T radial of the Washington, D. C. TVOR.

(7) DRUMRIGHT, OKLA. (VHF) INTSXN - the intsxn of the 245°T radial of the Tulsa, Okla. VOR and the 150°T radial of the Ponca City, Okla. VOR.

(8) FALLIS, OKLA. (VHF) INTSXN - the intsxn of the 065°T radial of the Oklahoma City, Okla. VOR and the 176°T radial of the Ponca City, Okla. VOR.

(9) FREEPORT, ILL. (VHF) INTSXN - the intsxn of the 278°T radial of the Rockford, Ill. VOR and the 239°T radial of the Janesville, Wis.

(10) GAP, PA. (VHF) INTSXN - the intsxn of the 237°T radial of the Pottstown, Pa. VOR and the 288°T radial of the West Chester, Pa. VOR.

(11) GRAPEVINE, ARK. (VHF) INTSXN - the intsxn of the 197°T radial of the Little Rock, Ark. VOR and the 249°T radial of the Pine Bluff, Ark. VOR.

(12) LAKESIDE, ARK. (VHF) INTSXN - the intsxn of the 235°T radial of the Little Rock, Ark. VOR and the 180°T bearing from Little Rock, Ark. LOM.

(13) LONGMONT, COLO. (VHF) INTSXN - the intsxn of the 334°T radial of the Denver, Colo. VOR and the 272°T radial of the Akron, Colo. VOR.

(14) MALVERN, ARK. (VHF) INTSXN - the intsxn of the 275°T radial of the Pine Bluff, Ark. VOR and the 235°T radial of the Little Rock, Ark. VOR.

(15) OKEMAH, OKLA. (VHF) INTSXN - the intsxn of the 100°T radial of the Oklahoma City, Okla. VOR and the 029°T radial of the Ardmore, Okla. VOR.

(16) PINE APPLE, ALA (VHF) INTSXN - the intsxn of the 049°T radial of the Evergreen, Ala. VOR and the 167°T radial of the Craig, AFB, Ala. VOR.

(17) PRAGUE, OKLA. (VHF) INTSXN - the intsxn of the 087°T radial of the Oklahoma City, Okla. VOR and the 228°T radial of the Tulsa, Okla. VOR.

(18) PROSPER, TEX. (VHF) INTSXN - the intsxn of the 357°T radial of the Dallas, Tex. VOR and the 091°T radial of the Ft. Worth, Tex. VOR.

(19) SAND SPRINGS, OKLA. (VHF) INTSXN - the intsxn of the 245°T radial of the Tulsa, Okla. VOR and the 127°T radial of the Ponca City, Okla. VOR.

(20) SEALY, TEX. (VHF) INTSXN - the intsxn of the 290°T radial of the Houston, Tex. VOR, the 152°T radial of the College, Station, Tex. VOR and the 056°T radial of the Eagle Lake, Tex. VOR.

(21) SHAWNEE, OKLA. (VHF) INTSXN - the intsxn of the 107°T radial of the Oklahoma City, Okla. VOR and the 005°T radial of the Ardmore, Okla. VOR.

(22) SHELL LAKE, OKLA. (VHF) INTSXN - the intsxn of the 260°T radial of the Tulsa, Okla. VOR and the 132°T radial of the Ponca City, Okla. VOR.

(23) SPRING HILL, LA. (VHF) INTSXN - the intsxn of the 140°T radial of the Texarkana, Ark. VOR and the 060°T radial of the Shreveport, La. VOR.

(24) TIOGA, TEX. (VHF) INTSXN - the intsxn of the 159°T radial of the Ardmore, Okla. VOR and the 073°T radial of the Ft. Worth, Tex. VOR.

(25) WACO, MO. (VHF) INTSXN - the intsxn of the 044°T radial of the Tulsa, Okla. VOR and the 261°T radial of the Springfield, Mo. VOR.

CANCEL: Effective May 9, 1957:

(1) BEGGS, OKLA. (VHF) INTSXN - the intsxn of the 198° mag radial of the Tulsa, Okla. VOR and the 330° mag radial of the McAlester, Okla. VOR.

(2) BOZEMAN, MONT. (LF) INTS LFR (Changed to compulsory)

(3) BURNET, TEX. (VHF) INTSXN - the intsxn of the NW course of the Austin, Tex. ILS lclzr and the 205° mag radial of the Austin, Tex. VOR.

(4) CHARLO, MONT. (VHF) INTSXN - the intsxn of the 068° mag radial of the Mullan Pass, Mont. VOR and the 334° mag radial of the Missoula, Mont. VOR. (Chgd to compulsory)

(5) CHELSEA, OKLA. (VHF) INTSXN - the intsxn of the 056° mag radial of the Tulsa, Okla. VOR and the 279° mag radial of the Fayetteville, Ark. VOR.

(6) COWETA, OKLA. (VHF) INTSXN - the intsxn of the 114° mag radial of the Tulsa, Okla. VOR and the 219° mag radial of the Neosho, Mo. VOR.

(7) DRIFTWOOD, TEX. (VHF) INTSXN - the intsxn of the 213° mag radial of the Austin, Tex. VOR and the 280° mag bearing from the Bergstrom AFB, Tex. Rbn.

(8) FRANKFORT, KY. (LF) INTSXN - the intsxn of the E course of the Louisville, Ky. LFR and the 133° mag bearing toward the Lexington, Ky. Rbn.

(9) GEORGETOWN, KY. (LF) INTSXN - the intsxn of the E course of the Louisville, Ky. LFR and the 187° mag bearing toward Lexington, Ky. Rbn.

(10) HOWARDSTOWN, KY. (LF) INTSXN - the intsxn of the S course of the Louisville, Ky. LFR and the NE course of the Bowling Green, Ky. LFR.

(11) LANESVILLE, IND. (LF) INTSXN - the intsxn of the S course of the Indianapolis, Ind. LFR and the W course of the Louisville, Ky. LFR.

(12) PLATEAU, TEX. (VHF) INTSXN - the intsxn of the NW course of the Austin, Tex. ILS lclzr and the 260° mag radial of the Austin, Tex. VOR.

(13) RED FORK, OKLA. (VHF) INTSXN - the intsxn of the 198° mag radial of the Tulsa, Okla. VOR and the 121° mag radial of the Ponca City, Okla. VOR.

(14) SALINA, OKLA. (VHF) INTSXN - the intsxn of the 082° mag radial of the Tulsa, Okla. VOR and the 219° mag radial of the Neosho, Mo. VOR.

(15) SHEPHERDSVILLE, KY. (LF) INTSXN - the intsxn of the S course of the Louisville, Ky. LFR and the 262° mag bearing toward Ft. Knox, Ky. Rbn.

(16) VERDIGRIS, OKLA. (VHF) INTSXN - the intsxn of the 082° mag radial of the Tulsa, Okla. VOR and the 208° mag bearing to Tulsa, Okla. LOM.

(17) WHEELER, IND. (VHF) INTSXN - the intsxn of the 087° mag radial of the Chicago Heights, Ill. VOR and a 314° mag bearing toward McCool, Ind. Rbn.

(18) WHITE OAK, OKLA. (VHF) INTSXN - the intsxn of the 041° mag radial of the Tulsa, Okla. VOR and the 252° mag radial of the Neosho, Mo. VOR.

★ NOTE:

Minimum altitudes and related data for the 1500 series airways are identical to other coinciding VOR airways.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are designated, redesignated or cancelled and shall become effective May 9, 1957:

DESIGNATE:

(1) CONCORD, GA. (VHF) INTSXN - direction of holding - S on 174°T radial of Atlanta Ga. VOR; direction of turns - LEFT; time - two minute; minimum altitude - 2200'.

(2) CRANDALL, GA. (VHF) INTSXN - direction of holding - E on the 088°T radial of the Chattanooga, Tenn. VOR; direction of turns - RIGHT; time - one minute; minimum altitude - 6000'.

(3) RALEIGH, N.C. LOM - direction of holding - SW on the SW course of the ILS ld zr; direction of turns - LEFT; time - one minute; minimum altitude - 1600'.

(4) SHELL LAKE, OKLA. (VHF) INTSXN - direction of holding - W on the 260°T radial of the Tulsa, Okal. VOR; direction of turns - LEFT; time - two minutes; minimum altitude-3000'.

(5) STONE MOUNTAIN, GA. (VHF) INTSXN - direction of holding - NE on the 048°T radial of the Atlanta, Ga. VOR; direction of turns - RIGHT; time - one minute; minimum altitude - 2700'.

(6) VASHON, WASH. (VHF) INTSXN - direction of holding - SW on the 247°T radial of the Seattle, Wash. VOR; direction of turns - RIGHT; time - one minute; minimum altitude - 3000'.

REDESIGNATE:

(1) BAUXITE, ARK. (VHF) INTSXN - direction of holding - SW on the 235°T radial of the Little Rock. Ark. VOR; direction of turns 1 RIGHT; time - one minute; minimum altitude - 1600'.

CANCEL:

(1) LOST MOUNTAIN, GA. RBN - direction of holding - NW on the 104° mag inbound bearing; direction of turns - LEFT; time - two minutes; minimum altitude - 2800'.

(2) RED FORK, OKLA. (VHF) INTSXN - direction of holding - S on the 198° mag rad radial of the Tulsa, Okla. VOR; direction of turns - LEFT; time - two minutes; minimum altitude - 3400'.

(3) SAND SPRINGS, OKLA. (VHF) INTSXN - direction of holding - SW on the 233° mag radial of the Tulsa, Okla. VOR; direction of turns - LEFT; time - two minutes; minimum altitude - 3100'.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Corpus Christi	Prescott	WAC 192	WAC 467
Douglas	Roswell	WAC 407	WAC 468
El Paso	JN 45	WAC 408	WAC 469

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) Month and day item was reported.
** New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg., test basis only, at lat 33-40-11, long. 86-53-58 about 10 n mi Birmingham Mun arpt. (12-14)
BIRMINGHAM ARPT: Caution-tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)
HUNTSVILLE-RADIO: VORradials 005°-030° have roughness and bends out of tolerance.
✱MOBILE-BATES FLD-TOWER: ILS Glide Path decmsnd. (3-20) FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in Montgomery-Maxwell area should avoid Maxwell AFB and Dannelly Fld control zones unless in contact with and cleared by the appropriate twr. Extensive flying engaged in at both arpts including practice inst apchs and simulated "flame-outs" by jets from 6500' to Dannelly Fld. (1-22)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi;190°-215° 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
DOUGLAS-BISBEE-DOUGLAS INTNL ARPT: Until about Apr 15, const on various taxiways-caution. (3-4)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

ARIZONA: GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

PHOENIX-SPECIAL NOTICE: Extreme caution - area between Phoenix VOR and Hassayampa VOR on Victor arwy 16 and Green 5. Extensive high performance, jet acft cross these arwys when departing and arriving Luke AFB in connection with training conducted Gila Bend Restricted Area (R-309, R308). This tfc generally crosses V16 and Green 5 between Hassayampa VOR and town of Tolleson (11 mi W of Phoenix) at alts of 5000' MSL and below - 0715 thru 1600, Mon thru Fri. (3-1)

** PHOENIX-PARADISE ARPT: Open on racing days only. Private arpt. (3-13)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (-2-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000';135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000';050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi ll,000';075-085°, 21 n mi ll,000';090°-170°, 40 n mi 12,0000; 225°-230°, 40 n mi 7,000';330°-345°, 35 n mi ll,000';345°-360°, 25 n mi ll,000'.(7-17)

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000';(b) SW quad 10,000';(c) SE quad 12,000' (d) NE quad 13,000'.

VALLE-RADIO: About Apr 20, VOR will be cmsnd. Freq: 115.2 mc. Ident: VLE. Lctd lat 35-37-00, long. 112-09-30. Elev: 6000' MSL. Class: VORW. (3-1)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: FLIPPIN- RADIO: Feb 12, VOR shut down until approx April 16. (2-12)

PINE BLUFF-RADIO: About May 6, VOR will be shut down until approx June 6. (3-20) During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR except V-16S TXK to PBF unusable. Ints and alts as charted. (3-22)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends. Jan 28, VOR shut down until approx March 28 - relctd lat 33-30-50, long 94-04-20. (2-27) VOR flgt authorized to use TXK LFR in lieu of VOR. (1-3)

CALIFORNIA: ARCATA ARPT-RADIO: About April 2, ILS lclzr and glide slope will be shut down until approx May 10 - relctn. lclzr. (3-28)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (ll-24)

BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°;30 n mi 280°-300°; 20 n mi 300°-320°;35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CAVE MOUNTAIN, BCN SITE 15, LAX-SLC: Bcn changed to 12 rpm. (3-9)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000';43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DIXON ARPT: Closed. (8-30)

★DONNER SUMMIT-RADIO: Mar 15, H fac freq changed to 375 kc.

**DOWNEY ARPT: Closed - land use changed. (3-14)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000';280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000';10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500';150°-335°, over water, not checked.

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sun set (10-5)

**HELENDALE, BCN SITE 10, LAX-AMA: Bcn changed to 12 rpm. (3-14)

KLAMATH-McBETH ARPT: Closed (6-13)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000': 340°-040°. 12.000': 040°-070°. 8000': 070°-100°. 7000': 100°-280°. 4000'. (9-13)

LONG BEACH ARPT-TOWER: About May 1, rcvr 122.5 mc will be discontd and concurrently 122.6 mc will be cmsnd. ILS glide slope subject to indef shutdown periods during arpt const. FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail. lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800' - caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. Daylgt opern of cranes with 80' booms adj to apch end rnwy 30. Take-offs not affected. (3-28)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined (2-1)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INT'L ARPT-TOWER: About April 12, Del Rey FM on back course ILS lclzr will be decmsnd. (3-27) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum o 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above ceiling permitting, directly over arpt, or btwn LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy.(7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should aboid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

Oakland-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000';60°-80°, 35 n mi at 5000';280°-290°, 35 n mi at 4000';340°-350°, 35 n mi at 6000';350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only. (8-20)

CALIFORNIA: OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Concrete paving construction in progress in former gravel area btwn rnwy 27R-9L and taxiway along S side of hangars 3,4 & 5. Area hazard mrkd. Taxi with caution. (12-8)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-260°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise ctn acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea.

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lngds prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

POINT REYES-SPECIAL NOTICE: Effect. April 11, Warning Area W-513 revised as follows: Time of Use: Continuous. Altitude: Surface to 3000' MSL from 2000 to 0800. Surface to unlimited from 0800 to 2000'. (1-23)

RED BLUFF-RADIO: DME coverage 225°-245°, 35 nmi at 10,000'. (6-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20° 95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20° 43 n mi at 7000'.

SAN CARLOS-SAN MATEO COUNTY ARPT: Mound of dirt adj taxiway at N end has barricades and lgtd with flares. (1-18)

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)

SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)

[redacted]: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

ALICE-RADIO: VOR radials 85°-105° unreliable. About April 8, VOR will be shut down until April 29 - modernization. (2-8) During shutdown VOR flights authorized to use LFR in lieu VOR. Intersections and altitudes as charted. (2-13)

ALICE ARPT: Bndry lights rnwy 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flight over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)

AUSTIN-MUELLER ARPT: Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat. - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green range lgts on rnwy 30 designates touchdown point nights. (10-4)

BEAUMONT-JEFFERSON CO. ARPT-TOWER: About April 1, ILS will be cmsnd. Lclzr freq: 109.5 mc, ident: BUJ. Glide slope freq: 332.6 mc. Apch bear: 113°. LMM freq: 206 kc; ident: UJ. LOM freq 236 kc; ident BU. MM lctd 0.4 mi, OM 4.8 mi from apch end rnwy. (3-22) FLD: Rnwy 11-29 clsd - const. (9-19) Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13)

BIG SPRING-RADIO: VOR courses 280°-325° and 345°-30° out of tolerance acct bends. DME coverage 130°-190°, 35 n mi at 4000'. (11-19) About April 8, VOR will be shut down until approx Aug 8 - relctn to lat 32-23-06, long 101-29-00. (3-7) Durg this period VOR flights are authorized to use BGS LFR in lieu of BGS VOR. On all arwys bearings and MEA's remain as charted. Johnson Int use 182° bearings from BGS LFR; Mustang Int use 266° from BGS LFR. (4-1)

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

COLLEGE STATION-RADIO: DME coverage 60° to 90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

COTULLA-RADIO: Feb 5, VOR shut down.

DALLAS-RADIO: Radial 325° - 345° out of tolerance due to severe scalloping. (2-21)

DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution-acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions.

EDINBURG ARPT: Clsd until approx April 13, due rnwys and taxiways under const. (3-8)

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylight hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; right hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, durg darkness. Single point JP-4 plus gas turbine compressor starting equip. avail. Tetrahedron uncontrollable, unreliable-not to be used as traffic direction indicator.

FORT WORTH-CARTER FLD: Const on a 2050' rnwy extension on SE end of rnwy 13-31. Hvy equip. and men will be in the area approx 90 days. Rnwy 31 threshold lgts relctd to a point approx 50 NW of SE end of rnwy 31. 500' SE end of rnwy 13-31 will be clsd periodically during daylgt hrs when men and hazards will be properly marked. (3-21)

GALVESTON-RADIO: Soon VOR will be shut down until approx Apr 17 - modernisation. During modification shutdown Galveston VOR flights authorized to use LFR in lieu VOR. Intersections and altitudes as charted. (2-13)

GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop. (6-5)

✱GREGG COUNTY-RADIO: LF voice fac changed from 357 kc to 236. (3-29)

GUTHRIE-RADIO: About Apr 15, VOR will be shut down until approx May 15. (3-20) During shutdown, GTH VOR, flgts authorized to use V-102 LBB VOR - SPS VOR MEA 6000' MSL. (3-20)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 n mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqud. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained during normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial.

HOUSTON-CLOVER ARPT: Caution on lndgs and take-offs. 80' (AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron uncontrollable and unreliable - not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt ' signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for take-off to E only; no lndg. (3-11)

HUECO MOUNTAIN-RADIO: About Apr 8, MHW will be cmsnd. Freq: 317 kc, ident: HCO. Lctd lat 31-49-06, long. 105-59-42. (3-18)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnace Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement.

KERMIT-ROBINSON ARPT: Clsd due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4) Rnwy 13-31 clsd for installation of hi-intensity rnwy lgts. (2-6)

**LUBBOCK ARPT-SPECIAL NOTICE: ILS procedure #1, straight in minima 400-1 until further notice. (3-2)

LUBBOCK ARPT-TOWER: Mar 4, ILS glide slope shut down until approx Sept. 1. (2-25) FLD: W 300' of E ramp open as taxiway. E 500' of E ramp closed to acft for cotton storage. (10-9) N 1000' rnwy 17-35 clsd to all acft until about Sept 1, for major const and ext of rnwy. Rnwy 17 threshold lgts moved 1000' S. Men and hvy equip working during daylgt hrs in the apch zone of rnwy 17. Rnwy 17-35 clsd to Convair and larger acft during const period xcpt during IFR wea conditions or with N or S winds of 20 knots or more. (3-14)

LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305°-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700'; 335°-015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700'; 060°-125°, 35 n mi at 1500'. Mar 27, VOR shut down until approx Apr 8 - during this period VOR flgts authorized to use LFK Rbn in lieu VOR xcpt V13E LFK to SHV unusable. Intersections, altitude and reporting points as charted. (3-29)

MARFA-RADIO: Auto. rebroadcast feature cmsnd. Rcvg 122.1, 126.7, 135.9, 255.4 mc.

MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW. (7-18)

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sun. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

McALLEN-MILLER INTNL ARPT: Rnwy 18 clsd for take-off and lndg. (11-26)

McKINNEY-SPECIAL NOTICE: 166' lgtd temp. drilling derrick erected 3.5 n mi NW. (10-12)

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300' MSL. (6-15)

**MULESHOE-WARREN ARPT: 168' (3967' MSL) lgtd twr erected 0.8 n mi W (270°T) at lat 34-13-46, long. 102-43-50. (3-13)

NEWMAN-RADIO: About Apr 8, MHW will be decmsnd and relctd to Hueco Mountain.

ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 clsd. (5-16)

**PLAINS-YOAKUM CO. ARPT: 208' (3853' MSL) lgtd twr erected 1.4 n mi SSE (166°T) at lat 33-11-11, long. 102-49-21. (3-13)

PORT ISABEL ARPT: Clsd all operns - const. (7-26)

ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)

SAN MARCOS ARPT: NE/SW strip rough - caution. (8-6)

SHAMROCK ARPT: Bcn and rnwy lgts inop. (7-9)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.

SUTTON, 21, CIN-DCA ARPT: Closed to all operations for unknown duration.. (2-28)

WISCONSIN: EAGLE RIVER ARPT: 800' S end of N/S rnwy ruf, soft - unusable. Arpt clsd until May 1. (10-12)

FOND DU LAC ARPT: Caution - use center of rnwys - due soft rnwys and shoulders durg winter and early spring. Snow will be rolled on the center of rnwys. (12-21)

LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn. (11-3)

LODI-LAKELAND ARPT: New arpt reported: Lat 43-19-40, long. 89-30-55, lctd 0.5 mi NE of Lodi; 1 strip - E/W 2640' x 200'; 87 oct gas; remarks - unattended. (1-14)

★MADISON-TRUAX FLD-TOWER: Mar 22, 119.9 mc changed to 119.3 mc. (3-29) FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm closed to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. (10-17)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd - itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusing rnwy 1 with parallel taxiway to left. (8-15)

OCONTO ARPT: E/W rnwy plowed 2850' x 175' - open to wheeled acft. NE/SW rnwy open to ski-equipped acft only. (1-16)

OSHKOSH-WINNEBAGO CO ARPT: Caution - bldg const on fld - use rnwys only. Use only N/S and E/W rnwys durg winter months. (2-21)

WOODRUFF-ARBOR VITAE-RADIO: H fac operg on request basis. (12-28)

WISCONSIN: WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather is VFR. (12-28)

WYOMING: CASPER AIR TERMINAL TOWER: ILS glide slope has moderate to severe roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Two 200' fences SW end of ramp not obstn lgtd. (11-16)

CHEROKEE-RADIO: About April 8, VOR will be shut down until approx May 3, modernization. During shutdown following arwys will be affected: V14, V14N, V-6, V-6N, RKS-CKW V-4 CKW-LAR; V-6, V-6N CKW-RKR; V-26 CKW-CPR all unusable. (3-15)

CHEYENNE ARPT: Overrun lgts (apch lgts) rnwy 26 inop. (10-18)

GILLETTE ARPT: 50'-75' shoulder 1500' from N end N/S strip soft - clsd to hvy acft.

KEMMERER ARPT: Arpt unsafe for opern of acft with wheels acct snow. (1-28)

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LFR.

ROCK SPRINGS ARPT: Caution - first 500' NW end rnwy 12-30 clsd - mrkd. (3-21)

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution.

PUERTO RICO: ★SAN JUAN-ISLA GRANDE ARPT-TOWER: Hrs opern: 0600-2200. (3-26) FLD: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' - 60' high operating intermittently approx 1000' off E end rnwy 9R-27L.

SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

WILMINGTON, N.C. - NEW HANOVER CO. ARPT: ILS/ADF, Proced. #1, Amdt. 2, dated 4 May 1957: Being withheld temporarily from publication. Use Amdt. #1, dated 16 July 1955, until further advised.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE Terminal VOR

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7) = Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
■ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TVOR. . . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(16 Apr 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit: "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____) IFR (or) VFR FLIGHT PLAN, OVER"

The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.

Continued on next page.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

(a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.

(b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
"(aircraft identification) THIS IS (name of radar site), (instructions)"
The instructions will normally consist of one of the following:

(a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)

(b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).

(c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).

(d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).

(e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
(a) radio contact with the director is lost.
(b) notified by the radar director that radar contact has been lost.
(c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) . .-.. .--. -... .- -. --. (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

TROY, ILLINOIS VOR SHUTDOWN: Until approximately April 22, 1957, the Troy, Illinois VOR will be shut down for modernization. During the interim period, the following MEA's can be utilized:

When route of flight includes changing to any airway with a higher MEA, flight will be cleared to higher MEA prior to crossing intersection so that intersection will be received to enable pilot to make turn.

Airways, alternate airways and intersections formed by the shutdown VOR will not be utilized except where noted to clear aircraft.

Air carriers should check to determine need to request any direct routes using combination facilities if they desire lower altitudes or require added transitions to approach procedures.

FCC AIRCRAFT RADIO STATION LICENCES: The Federal Communications Commission calls attention to the fact that all radio transmitters used aboard civil aircraft must be licenced by the FCC and that the station licence must be carried aboard the aircraft at all times. Application for renewal of expiring or expired licences should be submitted on FCC Form 404. Copies of this form may be obtained from the FCC, Washington 25, D. C., or from any FCC field office.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 53. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

(16 Apr 1957)

NOTE: Minimum altitudes and related data for the 1500 series airways are identical to other coinciding VOR airways.

✓ MINIMUM RECEPTION ALTITUDE DATA OFF-SHORE ROUTES:

NOTE: The following data list the altitudes over the routes and MRA at certain intersections at which flights would have acceptable navigation signal. They are furnished as information for flights navigating by reference to the listed VOR stations. Where charted they should carry a notation to this effect.

This corrects Page 30, Airman's Guide, Volume 11, No. 23, dated January 22, 1957

✓ ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated or redesignated and shall become effective May 9, 1957:

DESIGNATE:

(1) MACKEREL, FLA. (VHF) INTSXN - the intsxn of the 109°T radial of the Orlando, Fla. VOR and the 043°T radial of the Vero Beach, Fla. VOR. (MRA 6000')

REDESIGNATE:

(1) SHARK, FLA. (VHF) INTSXN - the intsxn of the 036°T radial of the W. Palm Beach, Fla. VOR and the 109°T radial of the Orlando, Fla. VOR. (MRA 14,000')

(2) TARPON, FLA. (VHF) INTSXN - the intsxn of the 014°T radial of the West Palm Beach, Fla. VOR and the 109°T radial of the Orlando, Fla. VOR. (MRA 7000').

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 99 (Airborne) Corpus Christi, Tex. Correct VOR rcvr check point to read: 173°.

(2) Page 103 (Ground) Columbus, Ga. (Muscogee County). Add VOR rcvr check point to read: Location #1 - 147.5°; taxiway at junction of approach end runway 12. Location #2-146°; center of intersection formed by taxiways leading to runways 5 and 30.

(3) Page 105 (Ground) Louisville, Ky. (Standiford Fld). Delete VOR rcvr check point Location #1 (297°)

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

APV	Apple Valley, Calif., Apple Valley Airport (Assignment)
HZL	Hazleton, Pa., Hazleton Airport (Assignment)
IBG	Ice Island #2, Eastern Arctic Ocean (Assignment)
ICE	Ice Island #1, Western Arctic Ocean (Name change)
LCH	Lake Charles, La., McFillen Airport (Name change)
VNT	Yuma, Ariz., Vincent AFB (Change from UMH)
3MQ	Marquette, Mich., Coast Guard Lifeboat Stn (Assignment)
HQ	Ottawa (Air Services HQ), Ont. (Assignment)
RS	Point Roberts, B.C. (Assignment)
WK	White Rock, B. C. (Assignment)

✓ RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective April 26, 1957:

(Part 608 - Restricted Area - Amendment 195)

Section 608.30, the Upper Lake Huron, Oscoda, Michigan area (R-91), amended in 21 F.R. 5619, July 26, 1956, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 44-55-00, long. 83-15-00; thence E to lat 44-55-00, long. 82-52-00; thence S to lat 44-11-00, long. 82-58-00; thence W to lat 44-11-00, long. 83-21-00; thence direct to a point one mile offshore due E of Sable Point, thence northward parallel to and one mile from the shoreline to a point at lat 44-22-30, long. 83-18-00; thence E to lat 44-22-30, long. 83-13-00; thence N to lat 44-34-15, long. 83-13-00; thence W to lat 44-34-15, long. 83-17-30; thence northward parallel to and one mile from the shoreline to a point due E of Sturgeon Point thence due N to the point of beginning".

Section 608.30, the Upper Lake Huron, Oscoda, Michigan, area No. 2 (R-491), amended in 21 F.R. 5619, July 26, 1956, is further amended by changing the "Description by Geographical Coordinates" column to read: "From lat 45-20-00N, long. 83-06-00W; to lat 45-20-00 N, long. 82-37-00W; to lat 45-16-00N, long. 82-30-00W; to lat 44-07-00N, long. 82-14-00W; to lat 44-07-00N, long. 83-20-00W; to lat 44-22-30N, long. 83-17-30W; to lat 44-22-30N, long. 83-13-00W; to lat 44-34-15N, long. 83-13-00W; to lat 44-34-15N, long. 83-15-00W; to point of beginning".

Section 608.61, the Eagle River, Alaska, area (R-348), amended in 22 F.R. 2041, March 28, 1957, is further amended by changing the phrase "beginning at lat 61-27-00" to read as follows: "Beginning at lat 61-27-15.....".

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 123rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

FLIGHT ADVISORY AREA - SPOKANE RAPCON CENTER: Effective April 22, 1957, the Flight Advisory Area for the Spokane RAPCON Center will be as follows:

From a point 49°N 115°W southward to a point on Green 2, 25 miles E of Mullan Pass; thence S to 46°N 115°W; thence W to 46°N 117°30'W; thence NW to a point on the eastern boundary of Red 53, 25 miles NE of Walla Walla MF Radio Range; thence to a point on the W boundary of Victor 112, 25 miles NE of Lamar Intsxn; thence SW to the southeastern corner of Prohibited Area P-246; thence W and northwesterly along the southern and southwestern boundaries of Prohibited Area P-246; thence along the western boundary of Prohibited Area P-246 and the eastern boundary of Restricted Area R-247 to the northeastern corner of Restricted Area R-247; thence to a point on Green 2 and Victor 2, 25 miles E of the Ellensburg MF Range; thence N to 49°N 120°W; thence E along 49°N to point of beginning.

Also, note that the voice call is changed to Spokane center or Spokane approach control, whichever is applicable.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

✓ ATLANTA AND WASHINGTON CENTERS CONTROL AREA BOUNDARIES: Effective immediately, establish the Atlanta and Washington Centers boundaries as follows:

Victor 103 - Establish the Atlanta-Washington Center boundary as an arc of 45 mi radius the center of which is at the Greensboro, North Carolina VOR.

Victor 37 and Victor 261 - Establish the Atlanta-Washington Center boundary as an arc of 20 mile radius the center of which is at the Pulaski, Virginia VOR.

✓ WASHINGTON, D.C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1956, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

✓ AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 12, No. 2, dated April 2, 1957, as follows:

Page 9 - On-Request Reporting Points: Item (17) under Designate, Effective May 9, 1957, Correct spelling of intsxn to read: "HEMPSTEAD, TEX. (VHF) INTSXN".

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) Month and day item was reported.

** New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

✱ New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

[redacted]: ANNISTON-RADIO: VOR courses 360°-07° bends and roughness out of tolerance.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod lndg strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 88-53-58, about 10 n mi NW Birmingham Mun arpt (12-14)

ALABAMA: BIRMINGHAM ARPT: Caution-tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single eng conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9)

DOTHAN-NAPIER FLD: Caution-helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and theshold lgts inop. (2-6)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness & bends out of tolerance.

✱MOBILE-BATES FLD-TOWER: April 11, ILS glide slope (333.8mc) flgt-checked and recmsnd. Path angle: 2.9° intercept alt at OM 1450'MSL. FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)

MONTGOMERY-SPECIAL NOTICE: All acft operg in Montgomery-Maxwell area should avoid Maxwell AFB and Dannelly Fld control zones unless in contact with and cleared by the appropriate twr. Extensive flying engaged in at both arpts including practice instr apchs and simulated "flame-outs" by jets from 6500' to Dannelly Fld. (1-22)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150°, and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

DOUGLAS-BISBEE-DOUGLAS INTNL ARPT: Const on various taxiways-caution. (3-4)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

**NEWMAN PEAK, BCN SITE 6, PHX-ELP: Bcn changed to 12 rpm. (4-8)

PHOENIX-SPECIAL NOTICE: Extreme Caution-area between Phoenix VOR and Hassayampa VOR on Victor arwy 16 and Green 5. Extensive high performance, jet acft cross these arwys when departing and arriving Luke AFB in connection with training conducted Gila Bend Restricted Area(R-309, R-308). This tfc generally crosses V-16 and Green 5 between Hassayampa VOR and town of Tolleson (11 mi W of Phoenix) at alts of 5000'MSL and below 0715 thru 1600, Mon thru Fri. (3-1)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000';135°-145° and 165°-185°, 39 n mi at 10,000'.

**PRESCOTT(TABLE MOUNTAIN), BCN SITE 37, LAX-AMA: Bcn changed to 12 rpm.(4-4)

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SAN SIMON-RADIO: About June 1, VOR will be cmsnd. Freq: 115.4mc. Ident: SSO. Lctd lat 32-16-12, long. 109-15-45. Elev: 3607'MSL. Class: VORW. Disregard spurious signals. (4-1)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi at 11,000';050°-060°, 22 n mi 11,000';060°-075°, 35 n mi 11,000';075°-085°, 21 n mi 11,000';090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000';330°-345°, 35 n mi 11,000';345°-360°, 25 n mi 11,000'.(7-17)

TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF-steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000';(b) SW quad 10,000';(c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable & tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: FLIPPIN-RADIO: Feb. 12, VOR shut down until approx. April 16. (2-12)

**HOT SPRINGS-MEMORIAL ARPT: 216' lgtd transmitting antenna erected 14 n mi ESE(115° T) at lat 34-22-50, long. 92-49-55. (4-4)

PINE BLUFF-RADIO: About May 6, VOR will be shut down until approx June 6. (3-20) During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR except V-16S TXK to PBF unusable. Ints and alts as charted. (3-22)

TEXARKANA-RADIO: VOR shut down until approx May 9-relctn to lat 33-30-50, long. 94-04-20. (4-1) VOR flgts authorized to use TXK LFR in lieu of VOR. (1-3)

CALIFORNIA: ARCATA ARPT-RADIO: Apr 2 ILS lclzr & glide slope shut down until approx May 10- relctn, lclzr. (4-8)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BAKERSFIELD-KERN CO. ARPT-TOWER: Effect April 28 hrs opern: 0500-2100. (4-3)

BLUE CANYON, SITE 13, SFO-SLC ARPT: Closed due to snow. (1-15)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°, 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345, -015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on airway radials only.

DIXON ARPT: Closed. (8-30)

**DOWNEY ARPT: Closed - land use changed. (3-14)

ELSINORE ARPT: Ctn-glider activity week ends. Squirrel holes S edge of landing area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000';280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course rufness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000';350°-10°, 43 n mi at 8000';10°-30°, 43 n mi at 9000';30°-120°, 35 n mi at 9000';120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

KLAMATH-McBETH ARPT: Closed. (6-13)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000';340°-040°, 12,000';040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutd own periods during arpt const. About May 1, rcvr 122.5mc will be discontd and concurrently 122.6mc will be cmsnd. (3-4) FLD: Several 230'MSL portable derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800'-caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only-500'/1 mi. Day-lgt opern of cranes with 80' booms adj to apch end rnwy 30. Tk-offs not affected. (3-28)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down-modernization. Manual bdcast continues on VOR and both VOR & LF combined. (2-1)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

✱LOS ANGELES INTERNATIONAL ARPT-TOWER: April 12, Del Rey FM on back course ILS localizer decommissioned. (4-12) FLD: Use paved areas only. New lighted runway 16-34 approximately 4000' W of Sepulveda Boulevard open VFR traffic only. Equipment on and adjacent to construction area. Pilots are urged to use extreme caution when operating off-shore just W of arpt. All jet aircraft departing runways 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000'MSL, approximately the intersection of the extended centerlines of the above runways with the shoreline. Aircraft proceeding E-bound from Malibu intersection in VFR conditions making a track which approximates the extended centerlines of the above runways are cautioned not to descend below 4000' MSL until passing the shore line or Del Rey FM

10,000' of cable & tow target on W/67 type acft in Yuma area. (2-11)

[redacted]: LOS ANGELES INTL ARPT-Continued: unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or between LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

LUCERNE VALLEY-DOUBLE J RANCH ARPT: Length of strip reported increased to 3000'.

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Franxisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, AlamedaNAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n imi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.(8-20)

OAKLAND-METROLPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Concrete paving construction in progress in former gravel area between rnwy 27R-9L and taxiway along S side of hangars 3, 4, & 5. Area hazard mrkd. Taxi with caution. (12-8)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise ctn acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea.

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000' 150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

**POINT REYES-SPECIAL NOTICE: Effect. April 11, Warning Area W513 revised as follows: Time of Use: Continuous. Altitude: Surface to 3000' MSL from 2000 to 0800. Surface to unlimited from 0800 to 2000. (1-23)

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000';

[redacted]: 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)

SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCICO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)

SAN FRANCISCO INTNL ARPT: 130' high pile-driver lctd 2000' W of term bldg-mrkd day and ngt. (2-13) Men and equip. working turf areas adj concourses B and D. All acft and equip. should be parked 20' or more from existing W edge of paved area concourse B and existing S edge of paved area concourse D. Mrkd day and ngt. (3-26) 120' high pile-driver lctd 400' W of S end of rnwy 1L-19R - mrkd day and ngt. (4-9)

HURON-HOWES ARPT: Rnwys 17-35 and 8-26 clsd to acft over 12,500lbs gross weight xcpt portion of rnwy 8-26 from intsxn E to taxi strip. Sod areas clsd xcpt 150' adj to rnwys inside of bndry lgts; usable for lgt acft at pilots' discretion. (4-25)

PHILIP ARPT, SITE 31, CYS-HON: 24' unlgtd p-line N from bcn to transmission line.

PIERRE-RADIO: About April 15, VOR will be shut down until approx. May 27. (3-22)

SIOUX FALLS-FOSS FLD-TOWER: Audio interference may be noted lclzr SE thru SW. Approach procedures and lclzr alignment not affected. (12-5)

TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 via Knoxville is invited to the proximity of the W course of Knoxville radio rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.

BRISTOL-TRI-CITY ARPT: Hangar const in progress 350' W of N end rnwy 20-2. Height 45' unlgtd. (1-28)

CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. NE and NW courses LF range have moderate to severe multiples. (7-27)

CHATTANOOGA-LOVELL FLD: All acft within arpt tfc ctl zone between sunset-sunrise must be equipped with transmitter & receiver capable of rcvg instructions from ctl twr; during daylgt, all acft must be equipped with rcvr capable of rcvg instr from ctl twr. (8-23)

JACKSON-RADIO: Effect. April 25, name and ident LFR and VOR will be changed to Jack's Creek, JKS, respectively. (3-25) ATCS will remain Jackson, Tenn.

KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution-VOR has occasional momentary course disturbance in mountainous areas.

TENNESSEE: KNOXVILLE-McGHEE TYSON ARPT-TOWER: ILS glide slope inop.
NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250° have bends and roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi, 180° 270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEASs and routing as follows: V-16 GHM VOR to BNA LFR via GHM 066° MEA 3000'; V-16 BNA LFR direct Smithville VHF Int via CSV 284° MEA 3500'; V-16 Smithville I nt to CSV VOR via CSV 284° MEA 5000'. V-140 DYR VOR to McEwen Int via DYR 083° MEA 5000'; V-140 McEwen Int to BNA VOR via BNA 266° MEA 3500'; Min hold alt at McEwen 3500'; V-140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V-140 Hartsville Int to Highway Int via BNA 056° MEA 7000'. V-7 BNA LFR to Lewisburg Int MEA 3000'. (2-28)
NASHVILLE- BERRY FLD: Taxiway btwn ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy - use as a taxiway. (12-28)
SEWANEE-UNIVERSITY OF THE SOUTH ARPT: Clsd due to rough and muddy fld. (2-19)
TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)
ALICE-RADIO: VOR radials 85°-105° unreliable. About Apr 15, VOR will be shut down until May 7 - modernization. (4-4) During shutdown VOR flgts authorized to use LFR in lieu VOR. Intersections and altitudes as charted. (2-13)
ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)
AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.
AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)
AUSTIN-MUELLER ARPT-TOWER: April 15, ILS MM shut down - relctn. (4-15) During this period, ILS landing minimum rnwy 30 left raised to 300-1. (4-11) FLD: Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat. - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstn on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green rng lgts on rnwy 30 designates touchdown point ngts. (10-4)
BEAUMONT-JEFFERSON CO. ARPT-TOWER: About May 1, ILS will be cmsnd. Lclzr freq: 109.5 mc, ident: BUJ. Glide slope freq; 332.6 mc. Apch bear: 113°. LMM freq: 206 kc; UJ. LOM freq 236kc; identBU. MM lctd 0.4 mi, OM 4.8 mi from apch end rnwy. (4-2) FLD: Rnwy 11-29 clsd-const. Due non-visibility twr unable to ctl tfc on ramp N of Hangar #1.
BIG SPRING-RADIO: April 8, VOR shut down until approx Aug 8 - relctn to lat 32-23-06, long. 101-29-00. (3-7) During this period, VOR flgts are authorized to use BGS LFR in lieu of BGS VOR. On all arwys MEA's remain as charted. Rowena Int use 105° bear. from BGS LFR, Jack Int use 108° bear. from BGS LFR, Sterling Int use 131° bear. from BGS LFR, King Int use 186° bear. from BGS LFR, Johnson Int use 203° bear from BGS LFR. Mustang Int use 266° bear. from BGS LFR. (4-5)
BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.
COLLEGE STATION-RADIO: DME coverage 60°-90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)
CULBERSON-RADIO: About May 20, VOR/DME will be shut down until approx June 20.
DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21)
DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution - acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions.
EAGLE LAKE-RADIO: About May 20 VOR will be shut down until approx June 20. (4-5)
EDINBURG ARPT: Clsd due rnwys and taxiways under const. (3-8)
EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separati on with acft on final apch to rnwy 03 Biggs AFB. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip avail.

TEXAS: FORT STOCKTON-RADIO: About May 7, VOR will be cmsnd. Freq: 117.8 mc. Lctd: lat 30-57-20, long. 102-58-30. Monitoring category (I). (4-8)
FORT WORTH-CARTER FLD: Const on a 2050' rnwy extension on SE end of rnwy 13-31. Hvy equip. and men will be in the area approx 90 days. Rnwy 31 threshold lgts relctd to a point approx 50' NW of SE end of rnwy 31. 500' SE end of rnwy 13-31 will be clsd periodically during daylgt hrs when men and hazards will be properly mrkd. (3-21)
FT. WORTH-MEACHAM FLD-TOWER: About May 6 ILS lclzr and glide slope will be shut down until approx July 6. (4-3) Effect May 1, twr hrs opern: 0600-2200. (4-15)
GALVESTON-RADIO: Mar 27, VOR shut down until approx Apr 17 - modern. During modification shutdown Galveston VOR flights authorized to use LFR in lieu VOR. Intersections and altitudes as charted. (4-8)
GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop. (6-5)
GUTHRIE-RADIO: About April 15. VOR will be shut own until approx May 15. (3-20) During shutdown, GTH VOR, flgts authorized to use V-102 LBB VOT-SPS VOR MEA 6000' MSL. (3-20)
HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)
HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial.
HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80'(AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)
HOUSTON INTNL ARPT: Tetrahedron uncontrollable and unreliable - not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for tk-offs to E only; no lndgs. (3-11)
HUECO MOUNTAIN-RADIO: About April 30, MHW will be cmsnd. Freq: 317 kc. Ident: HCO. Lctd lat 31-49-06, long. 105-59-42. (4-12)
JEFFERSON-CYPRESS RIVER ARPT: Rough-use extreme caution. (4-25)
KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000' -photo flash explosions daily 0700-1700. (11-3)
KELLY AFB-RADIO: VOR restricted for civilian use -erratic course displacement.
KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)
LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4) Rnwy 13-31 clsd for installation of hi-intensity rnwy lgts.
**LUBBOCK ARPT-SPECIAL NOTICE: ILS procedure #1, straight in minima 400-1 until further notice. (3-2)
LUBBOCK ARPT-TOWER: Mar 4 ILS glide slope shut down until approx Sept 1. (2-25) FLD: N 1000' rnwy 17-35 clsd to all acft until about Sept 1, for major const and ext of rnwy. Rnwy 17 threshold lgts moved 1000' S. Men and hvy equip. working during daylgt hrs in the apch zone of rnwy 17. Rnwy 17-35 clsd to Convair and larger acft during const period xcpt during IFR wea conditions or with N or S winds of 20 knots or more. (3-14)
LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305°-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700'; 335° 015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700'; 060°-125°, 35 n mi at 1500'. Mar 27 VOR shut down until approx Apr 22 - during this period VOR flgts authorized to use LFK rbn in lieu VOR except V13E LFK to SHV unusable. Intersections, altitude and reporting points as charted. (4-15)
MARFA-RADIO: Auto rebdcast feature cmsnd. Rcvg 211.1, 126.7, 135.9, 255.4 mc. (1-29)
MARSHALL-SPECIAL NOTICE: 166' lighted temporary drilling tower erected 6.1 nautical miles SW. (7-18)

[illegible] Lucin on Inde lgts 5 mi out, during daytime. Single point [illegible] plus gas turbine compressor [illegible] committed [illegible] steering using acft.

TEXAS: MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)
McALLEN INTNL ARPT: Rnwy 18 clsd to take-off and lndg. (11-26)
McKINNEY-SPECIAL NOTICE: 166' lgtd temp drilling derrick erected 3.5 n mi NW. (7-18)
MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)
MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300' MSL. (6-15)
NEWMAN-RADIO: About Apr 30, MHW will be decmsnd and relctd at Hueco Mountain.
ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 clsd. (5-16)
PORT ISABEL ARPT: Clsd to operns - const. (7-26)
ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)
SAN MARCOS ARPT: NE/SW strip rough - caution. (8-6)
SHAMROCK ARPT: Bcn and rnwy lgts inop. (7-9)
✱SNOOK-RADIO: USAF H fac cmsnd. Freq 371 kc. Ident: SOK. Lctd: lat 30-29-00, long. 96-29-25. Class: MHW. Bear. & dist to Bryan AFB: 355°, 8.0 n mi. (1-29)
SNYDER-WINSTON FLD: 150' (2577'MSL) lgtd rotary drilling rig erected 2552' SE N/S rnwy. (10-4)
TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hrs on Green Arwy #5 approx 13.4 n mi WSW of Texarkana LF rng.
TYLER-POUNDS FLD-TOWER: ILS glide slope out of tolerance from MM to touchdown - acct of severe scalloping and roughness.
UVALDE-LEONA RANCH STRIP: New lndg area reported: Lctd 35 n mi NW; lat 29-30, long. 100-22; elev: 1720'; 1 strip - 2800' long. (1-28)
WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.
UTAH: BONNEVILLE-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'.
BRYCE CANYON-RADIO: VOR has lgt roughness below 13,000'.
DELTA-RADIO: VOR coverage 40°-80° and 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'.
LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280°-300°, 35 n mi; 350°-30° and 180°-220°, 25 n mi. (11-26)

PREFERENTIAL ROUTINGS
OUTBOUND FLIGHTS
DEPARTING FROM:
*IDLEWILD
LA GUARDIA
*NEWARK/TETERBORO
IDL/LGA/EWR/TEB
FIRST FIX
Route to the first fix shown will be assigned in the departure clearance.
Limit of short range clearance.
*Stillwater first fix with radar hand-off out of IDL and EWR
All operators and pilots are requested to file IFR flight plans in conformance with Preferential Routings. Pilots operating non-VOR equipped aircraft are requested to file IFR flight plans using low-frequency routes that overlie the VOR routes, whenever possible.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods:(a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of 4° be indicated through use of the ground check or +6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 111.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Columbus, Ga.-Muscogee County

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED! IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS; IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

DOTHAN, ALA., DOTHAN MUN. ARPT: TVOR-16 dated 11 Feb. 1956, proceed. cancelled effective 11 April 1957.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

				A-dn%	800-2	800-2	800-2
				A-dn-22	900-2	900-2	900-2

Radar terminal area transition altitudes - all bearings are from the radar site with sector azimuths progressing clockwise.

%Runways 4-11-29

*Runway 4 only - 200½ or runway visual range of 2600'; provided, that approaches conducted on the basis of reported runway visual range shall be governed by the following: (1) All components of the approach lights and high intensity runway lights shall be in normal operation and (2) descent below the authorized landing minimum altitude of 218' MSL shall not be made unless (a) visual contact with the approach lights has been established or (b) the aircraft is clear of clouds.

#Runway 4 only - runway visual range of 2600' may be utilized in lieu of 200-½ when 200-½ is authorized.

If visual contact not established upon descent to authorized landing minimums or if landing not accomplished . . . . . climb to 1000' on NE crs Newark LFR, then make left climbing turn to 3000' direct to Paterson RBn, or when directed by ATC, make climbing left turn to 2000' direct to Chatham RBn.

Notices to Airmen - page 2

VOL. 12, NO. 4 **APRIL 30, 1957**

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --- -.-. .... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 23, 1956

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 30. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

FLIGHT ADVISORY AREA - SPOKANE RAPCON CENTER: Effective April 22, 1957, the Flight Advisory Area for the Spokane RAPCON Center will be as follows:

From a point 49°N 115°W southward to a point on Green 2, 25 miles E of Mullan Pass; thence S to 46°N 115°W; thence W to 46°N 117°30'W; thence NW to a point on the eastern boundary of Red 53, 25 miles NE of Walla Walla MF Radio Range; thence to a point on the W boundary of Victor 112, 25 miles NE of Lamar Intsxn; thence SW to the southeastern corner of Prohibited Area P-246; thence W and northwesterly along the southern and southwestern boundaries of Prohibited Area P-246; thence along the western boundary of Prohibited Area P-246 and the eastern boundary of Restricted Area R-247 to the northeastern corner of Restricted Area R-247; thence to a point on Green 2 and Victor 2, 25 miles E of the Ellensburg MF Range; thence N to 49°N 120°W; thence E along 49°N to point of beginning.

Also, note that the voice call is changed to Spokane center or Spokane approach control, whichever is applicable.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

WASHINGTON, D.C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

AFD	Ardmore, Okla., Ardmore AFB (Name change)
CWO	Mineral Wells, Tex., Camp Wolters AAF (Assignment May 15)
HVN	New Haven, Conn., New Haven Airport (Change from NHV May 15)
LCH	Lake Charles, La. McFillen Airpark (name change)
MTI	Martin, Tenn., Gill-Dove Airport (Assignment May 15)

I CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective June 6, 1957, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Red civil airway No. 43 (Chicago, Ill. to LaFayette, Ind.), is revoked. (Note: Harvey, Ill. radio range to be discontinued concurrently.)

(2) Red civil airway No. 52 (Memphis, Tenn. to Birmingham, Ala.), is amended to read: "From the Memphis, Tenn. rdo rng stn via the Muscle Shoals, Ala. rdo rng stn to the intsxn of the SE course of the Muscle Shoals, Ala. rdo rng and the N course of the Birmingham, Ala. rdo rng." (Note: W course of Muscle Shoals to be realigned to 99°T and toward the stn to lie on Memphis rng stn concurrently)

(3) Red civil airway No. 75 (United States-Canadian Border, Vancouver, B.C. to United States-Canadian Border, Abbotsford, B.C.), is amended to read: "That airspace over United States territory from the intsxn of the NW course of the Bellingham, Wash., rdo rng and the W course of the Abbotsford, B. C. rdo rng via the Abbotsford, B. C. rdo rng stn to the intsxn of the E course of the Abbotsford, B.C. rdo rng and the NE course of the Bellingham, Wash. rdo rng." (Note: Corrects wording for Federal Register only; no change to U.S. portion of Red 75; however, Canadian portion extended W from White Rock intsxn to Point Roberts intsxn, with MEA of 1500 ft. Apr 1, 1957 per Canadian International NOTAM RSVV Vancouver Mar 262121Z)

(4) Blue civil airway No. 20 (Millville, N. J. to Allentown, Pa.), is amended by changing all after Philadelphia, Pa. to read: "Philadelphia, Pa. rdo rng stn; the intsxn of the N course of the Philadelphia, Pa. rdo rng and a line bearing 192°T from the Allentown, Pa. rdo rng to the Allentown, Pa. rdo rng stn."

(5) Blue civil airway No. 22 (Memphis, Tenn. to Wichita, Kans.), is revoked.

(6) Blue civil airway No. 58 (Nantucket, Mass. to Squantum, Mass.), is amended by deleting the words which read: "excluding the portion in conflict with Cotuit restricted area (R-79)".

(7) VOR civil airway No. 5 (Jacksonville, Fla. to London, Ont.), is amended by changing the portion which reads: "Cincinnati, Ohio omnirng stn, including an E alternate;" to read: "Cincinnati, Ohio omnirng stn, including an E alternate via the point of intsxn of the Nabb, Ind. omnirng direct radial to the York, Ky. omnirng stn with the Cincinnati omnirng 175°T radial;" (Note: Redesignated V5E between Louisville VOR and Cincinnati VOR via the redesignated Dry Ridge Intsxn).

(8) VOR civil airway No. 6 (Oakland, Calif. to New York, N.Y.), is amended by changing the portion which reads: "Iowa City, Iowa omnirng stn including a N & also a S alternate via the intsxn of the Des Moines omnirng 112°T and the Iowa City omnirng 252°T radials;" to read: "Iowa City, Iowa, omnirng stn including a N alternate via the intsxn of the Des Moines omnirng 071°T and the Iowa City omnirng 283°T radials and also a S alternate via the intsxn of the Des Moines omnirng 112°T and the Iowa City omnirng 252°T radials;" (Note: Redesignated V6N between Des Moines VOR and Iowa City VOR to provide 15° separation between V6/V8 and V6N.)

(9) VOR civil airway No. 7 (Miami, Fla. to Green Bay, Wis.), is amended by changing the portion which reads: "Graham, Tenn. omnirng stn;" to read: "Graham, Tenn. omnirng stn, including an E alternate from the Birmingham omnirng stn to the Graham omnirng stn via the point of intsxn of the Huntsville, Ala. omnirng 264°T and the Graham omnirng 158°T radials;" (Note: Added V7E between Birmingham VOR and Graham VOR via the Tanner Intsxn.)

(10) VOR civil airway No. 10 (Pueblo, Colo. to New York, N.Y.), is amended by changing the portion which reads: "Garden City, Kans. omnirng stn, including a N alternate;" to read: "Garden City, Kans. omnirng stn, including a N alternate via the intsxn of the Lamar omnirng 085°T radial with the Garden City omnirng direct radial to the Hugo, Colo. omnirng stn;" (Note: Minor redesignation of V10N to place it over V74.)

(11) VOR civil airway No. 15 (Galveston, Tex. to Minot, N. Dak.), is amended by changing the portion which reads: "From the Galveston, Tex. omnirng stn via the Houston, Tex. omnirng stn; College Station, Tex. omnirng stn;" to read: "From the Galveston, Tex. omnirng stn via the Houston, Tex. omnirng stn; intsxn of the Houston omnirng 323°T and the College Station omnirng 127°T radials; College Station, Tex. omnirng stn;" and by changing the portion which reads: "to the Tulsa, Okla. omnirng stn, including an E alternate and also a W alternate via the point of intsxn of the Oklahoma City, Okla. omnirng 107°T and the Tulsa omnirng 222°T radials." to read: "Tulsa, Okla. omnirng stn, including an E alternate and also a W alternate via the point of intsxn of the Oklahoma City, Okla. omnirng 107°T and the Tulsa omnirng 228°T radials; to the Chanute, Kans. omnirng stn." (Note: Added new portion to V15 from Tulsa VOR to Chanute VOR. Put dog-leg in V15 between Houston VOR and College Station VOR.)

(12) VOR civil airway No. 17 (Laredo, Tex. to Goodland, Kans.), is amended by changing the portion which reads: "Waco, Tex. omnirng stn, including an E alternate" to read: "Waco, Tex. omnirng stn, including an E alternate via the intsxn of the Austin omnirng 044° T and the Waco omnirng 181°T radials;" (Note: Redesignated V17E between Austin VOR and Waco VOR).

(13) VOR civil airway No. 44 (Centralia, Ill. to Baltimore, Md.), caption changed and is amended by changing all before the Parkersburg, W. Va. omnirng stn to read: "From the Centralia, Ill. omnirng stn via the Nabb, Ind. omnirng stn; York, Ky. omnirng stn; Parkersburg, W. Va. omnirng stn;" (Note: Added new portion to V-44 from Centralia VOR to York VOR via Nabb VOR. Removed V44 number from airway portion Louisville VOR to York VOR.)

(14) VOR civil airway No. 47 (Louisville, Ky. to Detroit, Mich.), is amended by changing the portion which reads: "From the Louisville, Ky. omnirng stn via the intsxn of the Louisville omnirng 356°T and the Cincinnati omnirng 241°T radials;" to read: "From the Lousiville, Ky. omnirng stn via the Nabb, Ind. omnirng stn;" (Note: Redesignated V47 between Louisville VOR and Cincinnati VOR via Nabb VOR).

(15) VOR civil airway No. 51 (Miami, Fla. to Chicago, Ill.), is amended by changing the portion which reads: "Louisville, Ky. omnirng stn; intsxn of the Louisville omnirng 356° T and the Indianapolis omnirng 137°T radials; Indianapolis, Ind. omnirng stn; Lafayette, Ind. omnirng stn;" to read: "Louisville, Ky. omnirng stn; Nabb, Ind. omnirng stn; point of intsxn of the Cincinnati, Ohio omnirng stn 318°T and the Nabb omnirange 359°T radials; Lafayette, Ind. omnirng stn;" (Note: Redesignation of V51 between Louisville VOR and Lafayette VOR to by-pass Indianapolis VOR).

(16) VOR civil airway No. 53 (Charleston, S.C. to Chicago, Ill.), is amended by changing the portion which reads: "Indianapolis, Ind. omnirng stn;" to read: "Indianapolis, Ind. omnirng stn, including an E alternate from the Louisville omnirng stn to the Indianapolis omnirng stn via the Nabb, Ind. omnirng stn and the point of intsxn of the Indianapolis omnirng 137°T and the Nabb omnirng 359°T radials;" (Note: Added V53E between Louisville VOR and Indianapolis VOR.)

(17) VOR civil airway No. 57 (Evergreen, Ala. to Lexington, Ky.), is amended to read: "From the Evergreen, Ala. omnirng stn via the intsxn of the Evergreen omnirng 049°T and the Birmingham omnirng 180°T radials; Birmingham, Ala. omnirng stn; Muscle Shoals, Ala. omnirng stn; Graham, Tenn. omnirng stn; Bowling Green, Ky. omnirng stn; point of intsxn of the Bowling Green omnirng 063°T and the Louisville, Ky. omnirng 168°T radials; to the Lexington, Ky. omnirng stn." (Note: Redesignated V57 by adding new portion from Bowling Green VOR to Lexington VOR via the Campbellsville Intsxn. The portion of arwy from Bowling Green VOR to Scotland VOR which was formerly part of V57 was renumbered in this amendment as a part of V243.)

(18) VOR civil airway No. 68 (Albuquerque, N. Mex. to Brownsville, Tex.), is amended by changing the portion which reads: "Junction, Tex. omnirng stn, including a S alternate via the intsxn of the San Angelo omnirng 181°T and the Junction omnirng 310°T radials; San Angelo, Tex. omnirng stn, including a N alternate via the point of intsxn of the San Antonio omnirng 334°T and the Lometa, Tex. omnirng 192°T radials;" to read: "Junction, Tex. omnirng stn, including a S alternate via the intsxn of the San Angelo omnirng 181°T and the Junction omnirng 310°T radials and also a N alternate via the intsxn of the San Angelo omnirng 112°T and the Junction omnirng 342°T radials; San Antonio, Tex. omnirng stn;" (Note: Added V-68N between San Angelo VOR and Junction VOR. Revoked V-68N between Junction VOR and San Antonio VOR.)

(19) VOR civil airway No. 76 (Lubbock, Tex. to Galveston, Tex.), is amended to read: "From the Lubbock, Tex. omnirng stn via the intsxn of the Lubbock omnirng 180°T and the Big Spring omnirng 331°T radials; Big Spring, Tex. omnirng stn; San Angelo, Tex. omnirng stn, including a N alternate via the intsxn of the Big Spring omnirng 121°T and the San Angelo omnirng 024°T radials; Austin, Tex. omnirng stn; Houston, Tex. omnirng stn; to the Galveston, Tex. omnirng stn." (Note: Amended V-76N between Big Spring and San Angelo VOR).

(20) VOR civil airway No. 97 (Miami, Fla. to Minneapolis, Minn.), caption changed and is amended by changing the portion which reads: "Indianapolis, Ind. omnirng stn, including an E and a W alternate;" to read: "Indianapolis, Ind. omnirng stn, including an E alternate and also a W alternate via the point of intsxn of the Nabb, Ind. omnirng 359°T and the Indianapolis omnirng 137°T radials;" and by changing the portion which reads: "Minneapolis-St. Paul, Minn. Intnl Arpt ILS lclzr; intsxn of the Minneapolis-St. Paul, Intnl Arpt ILS 301°T lclzr course and the Alexandria omnirng 136°T radial; to the Alexandria, Minn. omnirng stn." to read: "to the Minneapolis-St. Paul, Minn. Intnl Arpt ILS lclzr;" (Note: Redesignated the portion of V-97 from the Minneapolis - St. Paul ILS lclzr to Alexandria VOR as a part of V-161).

(21) VOR civil airway No. 123 (Washington, D.C. to Wilton, Conn.), is amended by changing the last sentence to read: "The portions of this arwy which overlap the Washington Prohibited Area (P-56) and the Edgewood Arsenal Restricted Area (R-82) are excluded."

(22) VOR civil airway No. 128 (Chicago, Ill. to New Bern, N.C.), is amended by changing the portion which reads: "York, Ky. omnirng stn, including a S alternate via the intsxn of the Cincinnati omnirng 120°T and the York omnirng 271°T radials;" to read: "York, Ky. omnirng stn, including a S alternate via the intsxn of the Cincinnati omnirng 120°T radial with the York omnirng direct radial to the Nabb, Ind. omnirng stn;" (Note: Redesignation of V128S between Cincinnati VOR and York VOR to place the York V128S radial on V44 between York VOR and Nabb VOR.)

(23) VOR civil airway No. 132 (Cheyenne, Wyo. to Springfield, Mo.), is amended to read: "From the Cheyenne, Wyo. omnirng stn via the Akron, Colo. omnirng stn; Goodland, Kans, omnirng stn; Hutchinson, Kans. omnirng stn; point of intsxn of the Wichita, Kans.

omnirng 046°T and the Emporia, Kans. omnirng 259°T radials; Chanute, Kans. omnirng stn; intsxn of the Chanute omnirng 100°T and the Springfield omnirng 276°T radials; to the Springfield, Mo. omnirng stn, including a S alternate from the Chanute omnirng stn to the Springfield omnirng stn via the intsxn of the Chanute omnirng 117°T and the Springfield omnirng 261°T radials." (Note: Added new portion to V132 from Hutchinson VOR to Springfield VOR and added V132 S from Chanute VOR to Springfield VOR.)

(24) VOR civil airway No. 140 (Amarillo, Tex. to New York, N.Y.), is amended by changing the portion which reads: "From the Amarillo, Tex. omnirng stn via the Sayre, Okla. omnirng stn, including a N alternate; Oklahoma City, Okla. omnirng stn, including a N alternate; Tulsa, Okla. omnirng stn;" to read: "From the Amarillo, Tex. omnirng stn via the Sayre, Okla. omnirng stn, including a N alternate; intsxn of the Sayre omnirng 071°T and the Tulsa omnirng 260°T radials; Tulsa, Okla. omnirng stn;" (Note: Redesignated V140 between Sayre VOR and Tulsa VOR to by-pass Oklahoma City VOR).

(25) VOR civil airway No. 161 (Fort Worth, Tex. to Alexandria, Minn.), caption changed and is amended by changing the portion which reads: "to the Minneapolis-St. Paul, Minn. Intnl Arpt ILS lclzr." to read: "Minneapolis-St. Paul, Minn. Intnl Arpt ILS lclzr; intsxn of the Minneapolis-St. Paul Intnl Arpt ILS lclzr 301°T course and the Alexandria omnirng 136°T radial; to the Alexandria, Minn. omnirng stn." (Note: Extended V-161 from Minneapolis-St. Paul ILS lclzr to Alexandria VOR. This new portion of V-161 was formerly a part of V-97).

(26) VOR civil airway No. 163 (Brownsville, Tex. to Oklahoma City, Okla.), is amended by changing the portion which reads: "Alice, Tex. omnirng stn; San Antonio, Tex. omnirng stn;" to read: "Alice, Tex. omnirng stn; intsxn of the Alice omnirng 350°T and the San Antonio omnirng 168°T radials; San Antonio, Tex. omnirng stn;" (Note: Minor redesignation of V163 between Alice VOR and San Antonio VOR).

(27) VOR civil airway No. 172 (Des Moines, Iowa to Chicago, Ill.), is amended to read: "From the Des Moines, Iowa omnirng via the point of intsxn of the Des Moines omnirng 071°T and the Iowa City, Iowa omnirng 283°T radials; Cedar Rapids, Iowa omnirng stn; Polo, Ill. omnirng stn; to the Chicago, Ill. Intnl (O'Hare) Arpt terminal omnirng stn." (Note: Dog-legged V172 via Frinnell Intsxn between Des Moines VOR and Cedar Rapids VOR to provide 15° separation between V172 and V6/V8 at Des Moines).

(28) VOR civil airway No. 176 (Centralia, Ill. to Scotland, Ind.), is revoked.

(29) VOR civil airway No. 194 (Lafayette, La. to Norfolk, Va.), caption changed and is amended by adding a new first portion to read: "From the Lafayette, La. omnirng stn via the Baton Rouge, La. omnirng stn; McComb, Miss. omnirng stn; to the Meridian, Miss. omnirng stn." (Note: Added new portion to V194 from Lafayette VOR to Meridian VOR. Portion Lafayette VOR to Baton Rouge VOR is also a part of V70).

(29) VOR civil airway No. 219 (Ogden, Utah to Malad City, Idaho), is added to read: "From the Ogden, Utah omnirng stn via the point of intsxn of the Ogden omnirng 316°T and the Malad City omnirng 200°T radials; to the Malad City, Idaho omnirng stn. (Note: New airway).

(30) VOR civil airway No. 222 (Culberson, Tex. to Houston, Tex.), is amended to read: "From the Culberson, Tex. omnirng stn via the Fort Stockton, Tex. omnirng stn; Junction, Tex. omnirng stn; point of intsxn of the San Antonio omnirng 334°T and the Lometa, Tex. omnirng 192°T radials; San Antonio, Tex. omnirng stn; point of intsxn of the Austin, Tex. omnirng 109°T and the College Station, Tex. omnirng 202°T radials; to the Houston, Tex. omnirng stn." (Note: Added new portion to V222. San Antonio VOR to Junction VOR to Fort Stockton VOR to Culberson VOR).

(31) VOR civil airway No. 243 (Chattanooga, Tenn. to Scotland, Ind.), is amended to read: "From the Chattanooga, Tenn. omnirng stn via the Bowling Green, Ky. omnirng stn; to the Scotland, Ind. omnirng." (Note: Added new portion to V243 from Bowling Green VOR to Scotland VOR. This was formerly numbered V57).

(32) VOR civil airway No. 253 (Utah Lake, Utah to Twin Falls, Idaho), is amended to read: "From the Utah Lake, Utah omnirng stn to the point of intsxn of the Utah Lake omnirng 315°T and the Salt Lake City, Utah omnirng 265°T radials. From the Bonneville, Utah omnirng stn via the Lucin, Utah omnirng stn; to the Twin Falls, Idaho omnirng stn." (Note: Added new portion to V253 from Bonneville VOR to Twin Falls VOR via Lucin VOR.)

(33) VOR civil airway No. 269 (Wells, Nev. to Twin Falls, Idaho), is added to read: "From the Wells, Nev. omnirng stn to the Twin Falls, Idaho omnirng stn." (Note: New airway.)

(34) VOR civil airway No. 271 (Bonneville, Utah to Burley, Idaho), is added to read: "From the Bonneville, Utah omnirng stn via the Lucin, Utah omnirng stn; intsxn of the Lucin omnirng 353°T and the Burley omnirng 192°T radials; to the Burley, Idaho omnirng stn." (Note: New arwy).

(35) VOR civil airway No. 272 (Sayre, Okla. to Oklahoma City, Okla.), is added to read: "From the Sayre, Okla. omnirng stn to the Oklahoma City, Okla. omnirng stn, including a N alternate". (Note: New arwy. This arwy portion was formerly a part of V140 and V140N).

(36) VOR civil airway No. 1518 (Los Angeles, Calif. to Washington, D.C.), is amended by changing the portion which reads: "Sayre, Okla. omnirng stn; to the point of intsxn of the Sayre omnirng 071°T and the Oklahoma City omnirng 282°T radials. From the point of intsxn of the Oklahoma City, Okla. omnirng 021°T and the Vance, Okla. omnirng 143°T radials via the Tulsa, Okla. omnirng stn; Fayetteville, Ark. omnirng stn;" to read: "Sayre, Okla. omnirng stn; intsxn of the Sayre omnirng 071°T and the Tulsa omnirng 260°T radials; Tulsa, Okla. omnirng stn; Fayetteville, Ark. omnirng stn;" (Note: Added new portion to V1518 between Weatherford Intsxn and Crescent Intsxn between Sayre VOR and Tulsa VOR).

CONTROL AREAS:

(1) Red civil airway No. 43 (Chicago, Ill. to LaFayette, Ind.), is revoked.

(2) Blue civil airway No. 22 (Memphis, Tenn. to Wichita, Kans.), is revoked.

(3) VOR civil airway No. 44 (Centralia, Ill. to Baltimore, Md.), is amended to read: "All of VOR civil arwy No. 44."

(4) VOR civil airway No. 53 (Charleston, S.C. to Chicago, Ill.), is amended to read: "All of VOR civil arwy No. 53 including an E alternate, but excluding the airspace between the E alternate and the main arwy."

(5) VOR civil airway No. 57 (Evergreen, Ala. to Lexington, Ky.), is amended to read: "All of VOR civil arwy No. 57."

(6) VOR civil airway No. 97 (Miami, Fla. to Minneapolis, Minn.), caption changed.

(7) VOR civil airway No. 132 (Cheyenne, Wyo. to Springfield, Mo.), is amended to read: "All of VOR civil arwy No. 132, including a S alternate.

(8) VOR civil airway No. 161 (Fort Worth, Tex. to Alexandria, Minn.), is amended to read: "All of VOR civil arwy No. 161."

(9) VOR civil airway No. 176 (Centralia, Ill. to Scotland, Ind.), is revoked.

(10) VOR civil airway No. 194 (Lafayette, La. to Norfolk, Va.), is amended to read: "All of VOR civil arwy No. 194, including a S alternate."

(11) VOR civil airway No. 219 (Ogden, Utah to Malad, City, Idaho), is added to read: "All of VOR civil arwy No. 219."

(12) VOR civil airway No. 222 (Culberson, Tex. to Houston, Tex.), is amended to read: "All of VOR civil arwy No. 222."

(13) VOR civil airway No. 243 (Chattanooga, Tenn. to Scotland, Ind.), is amended to read: "All of VOR civil arwy No. 243."

(14) VOR civil airway No. 253 (Utah Lake, Utah to Twin Falls, Idaho), is amended to read: "All of VOR civil arwy No. 253."

(15) VOR civil airway No. 269 (Wells, Nev. to Twin Falls, Nev.), is added to read: "All of VOR civil arwy No. 269."

(16) VOR civil airway No. 271 (Bonneville, Utah to Burley, Idaho), is added to read: "All of VOR civil arwy No. 271."

(17) VOR civil airway No. 272 (Sayre, Okla. to Oklahoma City, Okla.), is added to read: "All of VOR civil arwy No. 272, including a N alternate."

CONTROL AREA EXTENSIONS:

(1) (Sumter, S.C.), is amended to read: "That airspace within a 30 mile radius of Shaw Air Force Base, Sumter, S.C. rdo rng stn, excluding the portion below 26,000 ft MSL which overlaps restricted area (R-114) and excluding the portion below 26,000 ft MSL between sunrise and sunset which overlaps restricted area (R-384)."

(2) (Columbia, S.C.), is amended by changing the words which read: "excluding the portion which overlaps restricted area (R-384)." to read: "excluding the portion below 26,000 ft. MSL between sunrise and sunset which overlaps restricted area (R-384)."

(3) (Fort Smith, Ark.), is amended by adding the following portion to present control area extension: "that airspace SW of Fort Smith within a 25 mile radius of the Fort Smith Mun. Arpt. extending clockwise from the western boundary of Blue civil arwy No. 13 to the southern bndry of VOR civil arwy No. 74."

(4) (Oahu, T.H.), is added to read: "That airspace from 700 ft upwards beginning at a point at lat 21-25-30N, long. 158-00-30W, extending to a point at lat 21-30-30N, long. 158-09-00; thence counterclockwise along the arc of a circle 8.4 s mi from a point centered at lat 21-24-30N, long. 158-13-40W, to a point at lat 21-22-25N, long. 158-21-10W, thence along the northern bndry of VOR civil arwys Nos. 2 and 4 to point of beginning, excluding the portions which lie within and overlap Restricted Areas R-315 and R-335, and excluding the portion below 6000 ft MSL which lies within Warning Area W-322."

CONTROL ZONES:

(1) (Chicago, Ill.), is amended to read: "Within a 6 mile radius of the Chicago-Midway Arpt; within 2 miles either side of the NW course of the Chicago rdo rng extending from the rdo rng stn to its intsxn with the NE course of the Joliet, Ill. rdo rng excluding the portion which overlaps the O'Hare Intnl Arpt control zone; within 2 miles either side of the front and back courses of the Chicago-Midway ILS lclzr extending from the intsxn of the lclzr back course with the 44°T radial of the Chicago omnirng to a point 12 miles NW of the Chicago-Midway outer marker on the lclzr front course excluding the portion which overlaps the O'Hare Intnl Arpt control zone; within 2 miles either side of the 007°T, 124°T and 223°T radials of the Chicago-Midway term omnirng extending from the term omnirng stn to points 12 miles N, SE and SW." (Note: Deletes portion on SE course LF rng to the E course of Harvey (being discontinued), and amends portion on ILS back course to intersect 044°T radial of Chicago Heights VOR in lieu of E course Harvey).

(2) (Chanute, Kans.), is amended to read: "Wtihin a 5 mile radius of the Chanute Arpt, within 2 miles either side of the E course of the Chanute rdo rng extending from the rdo rng stn to a point 12 miles E, and within 2 miles either side of the 62°T and the 242°T radials

of the Chanute omnirng extending from the arpt to a point 12 miles SW of the omnirng stn." (3) (Fort Bragg, N. C.), is amended to read: "Within a 5 mile radius of Pope Air Force Base, Fort Bragg, N.C., and within 2 miles either side of the 227°T and 47°T radials of the Pope AFB omnirng extending from the 5 mile radius zone to a point 9 miles NE of the omnirng stn." (Note: Correct lctn Pope VOR given on A. F. drawing as: 35-17-03N, 78-52-24W. USAF requests that VOR be shown on aeronautical charts and in publications).

(4) (La Grange, Ga.), is added to read: "Within a 5 mile radius of Callaway Arpt, La Grange, Ga., and within 2 miles either side of the 110°T and 290°T radials of the La Grange omnirng extending from the 5 mile radius zone to a point 5 miles W of the omnirng stn."

REPORTING POINTS:

(1) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska), is amended by deleting the following reporting point: "the intsxn of the E course of the Stockton, Calif. rdo rng and the SE course of the Sacramento, Calif. rdo rng." (Note: Added to Red 60).

(2) Red civil airway No. 14 (Lone Rock, Wis. to Indianapolis, Ind.), is amended to read "Rockford, Ill. rdo rng stn; Chicago, Ill. rdo rng stn." (Note: Deletes Thornton intsxn as compulsory reporting point - due to discontinuance Harvey.)

(3) Red civil airway No. 43 (Chicago, Ill. to Lafayette, Ind.), is revoked.

(4) Red civil airway No. 60 (Oakland, Calif. to Stockton, Calif.), is amended to read: "Stockton, Calif. rdo rng stn; the intsxn of the E course of the Stockton, Calif. rdo rng and the SE course of the Sacramento, Calif. rdo rng."

(5) Blue civil airway No. 22 (Memphis, Tenn. to Wichita, Kans.), is revoked.

VOR REPORTING POINTS:

(1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Fort Stockton, Tex, omnirng stn (depict for "all altitudes"). (b) Andalusia Intsxn - the intersection of the Evergreen, Ala. omnirng 108°T (104° mag) and the Crestview, Fla. omnirng 013°T 009° mag) radials. (Depict for 'all altitudes') (c) Barberville Intsxn - the intsxn of the Orlando, Fla. omnirng 354°T (353° mag) and the Gainesville, Fla. omnirng 117°T (115° mag) radials. (Depict for "all altitudes").

(2) Domestic VOR reporting points is amended by changing the following reporting points to read: (a) Annawan Intsxn - the intsxn of the Iowa City, Iowa, omnirng 093°T radial the Moline, Ill. omnirng 139°T radial and the Moline, Ill. ILS lclzr back course. (b) Avalon Intsxn - the intsxn of the Oceanside, Calif. omnirng 280°T and the Long Beach, Calif. omnirng 200°T radials (To correct typographic error in Federal Register. No change to Avalon Intsxn.).

(3) Domestic VOR reporting points is amended by revoking the following reporting point: Seguin Intsxn - the intsxn of the San Antonio, Tex. omnirng 089°T (080° mag) and the Austin, Tex. omnirng 189°T (180° mag) radials. (To be published as an on-request reporting point).

ON REQUEST REPORTING POINTS: The following on-request reporting points are renamed, designated, redesignated or cancelled and shall become effective as indicated:

RENAMED: Effective June 6, 1957:

RAYMOND, GA. (VHF) INTSXN - the intsxn of the 018°T radial of the Columbus, Ga. VOR and the 232°T radial of the Atlanta, Ga. VOR. (Formerly Madras Intsxn)

DESIGNATED: Effective June 6, 1957:

(1) BROOKVILLE, IND. (VHF) INTSXN - the intsxn of the 318°T radial of the Cincinnati, Ohio VOR and the 030°T radial of the Nabb, Ind. VOR.

(2) CANAL, ILL. (VHF) INTSXN - the intsxn of the 075°T radial of the Naperville, Ill. VOR and the 334°T radial of the Chicago Heights, Ill. VOR.

(3) CASSODAY, KANS. (VHF) INTSXN - the intsxn of the 299°T radial of the Chanute, Kans. VOR and the 061°T radial of the Wichita, Kans. VOR.

(4) CHARLOTTESVILLE, IND. (VHF) INTSXN - the intsxn of the 359°T radial of the Nabb, Ind. VOR and the 318°T radial of the Cincinnati, Ohio VOR.

(5) COFFEYVILLE, KANS. (VHF) INTSXN - the intsxn of the 186°T radial of the Chanute, Kans. VOR and the 078°T radial of the Ponca City, Okla. VOR.

(6) CROYDON, IND. (VHF) INTSXN - the intsxn of the 284°T radial of the Louisville, Ky. VOR and the 221°T radial of the Nabb, Ind. VOR.

(7) CYPRESS, FLA. (VHF) INTSXN - the intsxn of the NW course of the Miami, Fla. LFR and the 038°T bearing from Tamiami, Fla. Rbn.

(8) DUNLAP, TENN. (VHF) INTSXN - the intsxn of the 333°T radial of the Chattanooga, Tenn. VOR and the 211°T radial of the Crossville, Tenn. VOR.

(9) EDNA, KANS. (VHF) INTSXN - the intsxn of the 026°T radial of the Tulsa, Okla. VOR and the 078°T radial of the Ponca City, Okla. VOR.

(10) GRATZ, KY. (VHF) INTSXN - the intsxn of the 054°T radial of the Louisville, Ky. VOR and the 331°T radial of the Lexington, Ky. VOR.

(11) HAYSTACK, COLO. (VHF) INTSXN - the intsxn of the 175°T radial of the Pueblo, Colo. VOR and the 262°T radial of the Lamar, Colo. VOR.

(12) JOHNSON CITY, TEX. (VHF) INTSXN - the intsxn of the 002°T radial of the San Antonio, Tex. VOR and the 257°T radial of the Austin, Tex. VOR.

(13) KNOLLS, UTAH (VHF) INTSXN - the intsxn of the 084°T radial of the Bonneville, Utah VOR and the 147°T radial of the Lucin, Utah VOR.

(14) LINVILLE, N.C. (VHF) INTSXN - the intsxn of the 146°T radial of the Tri-City, Tenn. VOR and the 019°T radial of the Asheville, N.C. VOR.

(15) McCUNE, KANS. (VHF) INTSXN - the intsxn of the 117°T radial of the Chanute, Kans. VOR and the 026°T radial of the Tulsa, Okla. VOR.

(16) MORRIS, IND. (VHF) INTSXN - the intsxn of the 303°T radial of the Cincinnati, Ohio VOR and the 030°T radial of the Nabb, Ind. VOR.

(17) MUSTANG, COLO. (VHF) INTSXN - the intsxn of the 145°T radial of the Pueblo, Colo. VOR and the 262°T radial of the Lamar, Colo. VOR.

(18) NEW CASTLE, KY. (VHF) INTSXN - the intsxn of the 054°T radial of the Louisville, Ky. VOR and the 122°T radial of the Nabb, Ind. VOR.

(19) NEW LIBERTY, KY. (VHF) INTSXN - the intsxn of the 087°T radial of the Nabb, Ind. VOR and the 204°T radial of the Cincinnati, Ohio VOR.

(20) OSGOOD, IND. (VHF) INTSXN - the intsxn of the 286°T radial of the Cincinnati, Ohio VOR and the 030°T radial of the Nabb, Ind. VOR.

(21) PENDLETON, KY. (VHF) INTSXN - the intsxn of the 269°T radial of the York, Ohio VOR and the 135°T radial of the Cincinnati, Ohio VOR.

(22) PETERS, CALIF. (VHF) INTSXN - the intsxn of the 341°T radial of the Modesto, Calif. VOR and the E course of the Stockton, Calif. LFR.

(23) POMONA, TENN. (VHF) INTSXN - the intsxn of the 349°T radial of the Crossville, Tenn. VOR and the 280°T radial of the Knoxville, Tenn. VOR.

(24) SEGUIN, TEX. (VHF) INTSXN - the intsxn of the 089°T radial of the San Antonio, Tex. VOR and the 189°T radial of the Austin, Tex. VOR. (Formerly Compulsory)

(25) SHELBYVILLE, IND. (VHF) INTSXN - the intsxn of the 122°T radial of the Indianapolis, Ind. VOR and the 359°T radial of the Nabb, Ind. VOR.

(26) STILLWATER, OKLA. (VHF) INTSXN - the intsxn of the 040°T radial of the Okla. City, Okla. VOR and the 261°T radial of the Tulsa, Okla. VOR.

(27) SWEETWATER, FLA. (LF) INTSXN - the intsxn of the NW course of the Miami, Fla. LFR and the N course of the Perrine, Fla. VOR.

(28) VANNATTA, TEX. (VHF) INTSXN - the intsxn of the 121°T radial of the Big Spring, Tex. VOR and the 332°T radial of the San Angelo, Tex. VOR.

(29) WALNUT, KANS. (VHF) INTSXN - the intsxn of the 100°T radial of the Chanute, Kans. VOR and the 026°T radial of the Tulsa, Okla. VOR.

(30) WIMBERLY, TEX. (VHF) INTSXN - the intsxn of the 042°T radial of the San Antonio, Tex. VOR and the 257°T bearing from Bergstrom AFB, Tex. Rbn.

(31) YALE, OKLA. (VHF) INTSXN - the intsxn of the 260°T radial of the Tulsa, Okla. VOR and the 150°T radial of the Ponca City, Okla. VOR.

REDESIGNATED: Effective immediately:

BLYTHEWOOD, S.C. (VHF) INTSXN - the intsxn of the 004°T radial of the Columbia, S.C. VOR and the 055°T radial of the Augusta, Ga. VOR.

REDESIGNATED: Effective May 9, 1957:

ROUND ROCK, TEX. (VHF) INTSXN - the intsxn of the 016°T radial of the Austin, Tex. VOR and the 266°T radial of the College Station, Tex. VOR.

REDESIGNATED: Effective June 6, 1957:

(1) COLEBROOK, CONN. (VHF) INTSXN - the intsxn of the 058°T radial of the Poughkeepsie, N.Y. VOR and the 346°T radial of the Hartford, Conn. VOR.

(2) COURTNEY, TEX. (VHF) INTSXN - the intsxn of the 127°T radial of the College Station, Tex. VOR and the 033°T radial of the Eagle Lake, Tex. VOR.

(3) CRESCENT, OKLA. (VHF) INTSXN - the intsxn of the 021°T radial of the Oklahoma City, Okla. VOR and the 071°T radial of the Sayre, Okla. VOR.

(4) CYPRESS, TEX. (VHF) INTSXN - the intsxn of the 323°T radial of the Houston, Tex. VOR and the 056°T radial of the Eagle Lake, Tex. VOR.

(5) DECKER, IND. (VHF) INTSXN - the intsxn of the 085°T radial of the Centralia, Ill. VOR and the 013°T radial of the Evansville, Ind. VOR.

(6) DRY RIDGE, KY. (VHF) INTSXN - the intsxn of the 054°T radial of the Louisville, Ind. VOR and the 175°T radial of the Cincinnati, Ohio VOR.

(7) ELIZABETH, IND. (VHF) INTSXN - the intsxn of the 269°T radial of the Louisville, Ky. VOR and the 221°T radial of the Nabb, Ind. VOR.

(8) FAIRBANKS, TEX. (VHF) INTSXN - the intsxn of the 323°T radial of the Houston, Tex. VOR and the 081°T radial of the Eagle Lake, Tex. VOR.

(9) FREDERICKSBURG, TEX. (VHF) INTSXN - the intsxn of the 334°T radial of the San Antonio, Tex. VOR and the 112°T radial of the Junction, Tex. VOR.

(10) GRAPEVINE, ARK. (VHF) INTSXN - the intsxn of the 197°T radial of the Little Rock, Ark. VOR and the 248°T radial of the Pine Bluff, Ark. VOR.

(11) GRINNELL, IOWA (VHF) INTSXN - the intsxn of the 071°T radial of the Des Moines Iowa VOR and the 283°T radial of the Iowa City, Iowa VOR.

(12) HARTSVILLE, IND. (VHF) INTSXN - the intsxn of the 137°T radial of the Indianapolis, Ind. VOR and the 359°T radial of the Nabb, Ind. VOR.

(13) HENRYVILLE, IND. (VHF) INTSXN - the intsxn of the 333°T radial of the Louisville, Ky. VOR and the 243°T radial of the Nabb, Ind. VOR.

RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective May 21, 1957:

(Part 608 - Restricted Area - Amendment 196)

Section 608.12, the Willcox Dry Lake, Arizona area (R-311) amended in 20 F.R. 7902, October 20, 1955 is rescinded.

Section 608.30, the Lower Lake Huron, Michigan area (R-60) amended in 21 F.R. 3496, May 25, 1956 is further amended by changing the "Controlling Agency" column to read: "Commander, First Fighter Wing, Selfridge Air Force Base, Michigan".

Section 608.44, the Fort Sill, Oklahoma area (R-208 formerly D-208) amended in 16 F.R. 11066, October 31, 1951 is further amended by changing the "Description by Geographical Coordinates: column to read: "Beginning at lat 34-47-00, long. 98-17-00; South to lat 34-38-00; West to long. 98-46-00; North to lat 34-47-00; East to long. 98-38-00; South to lat 34-44-00; East to long. 98-36-00; South to lat 34-43-00; East to long, 98-22-00; Northeast to lat 34-44-00, long. 98-21-00; North to lat 34-47-00; East to lat 34-47-00, long. 98-17-00, point of beginning".

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 26 - Winnemucca, Nev. Correct CAA telephone number to read: MAdison 3-3202 and WB telephone number to read: MAdison 3-2203.

(2) Page 98 - Radiated Test Signal. Correct New York (La Guardia Fld) to read: 108.6 mc.

(3) Page 106 - (Ground) Add VOR rcvr check point to read: Roanoke, Va. (Woodrum Fld): Location #1 - 141° (TVOR); fillet area of runway 33. Location #2 - 099°; fillet area of runway 27.

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 12, No. 2, dated April 2, 1957, as follows:

Page 7 - Control Zones: Item (7). Correct to read: Green 5 instead of Green 2.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have vends and roughness out of tolerance. (12-1)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg, test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recommissioned at new lctsn. (4-18)
BIRMINGHAM ARPT-TOWER: About June 1 MM and LMM will be shut down - relctn. FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane will be shut down on about May 1 until approx thru Nov due rnwy ext. (4-22)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-BATES FLD-SPECIAL NOTICE: Air Carrier Safety Miami advises unlgtd trees penetrate apch zone to all rnwys. Use caution. 200' and 1/2 mi is absolute take-off min for all acft. (4-22)
MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE apch end rnwy 21. Twr unable to ctl taxiing E/W taxiway adj ANG hangar to W end -Caution.
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2) About June 6, W course LFR will be realigned from 102° to 095°. (4-24)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail ngts upon prior req. Emerg only. (4-23)
**CONNELL MTN, BCN SITE 34, LAX-AMA: Bcn changed to 12 rpm. (4-18)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
DOUGLAS-BISBEE-DOUGLAS INTNL ARPT: Const on various taxiways - caution. (3-4)
FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. 2-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civilian acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
** JEROME, BCN SITE 39, LAX-AMA: Bcn changed to 12 rpm. (4-18)
PHOENIX-SPECIAL NOTICE: Extreme Caution-area between Phoenix VOR and Hassayampa VOR on Victor arwy 16 and Green 5. Extensive high performance, jet acft cross these arwys when departing and arriving Luke AFB in connection with training conducted Gila Bend Restricted Area(R-309,R308). This tfc generally crosses V 16 and Green 5 between Hassayampa VOR and town of Tolleson (11 mi W of Phoenix) at alts of 5000'MSL and below - 0715 thru 1600, Mon thru Fri. (3-1)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185° 39 n mi at 10,000'.
SALOME, SITE #27B,LAX-PHX: Caution-puncture vines. (6-18)
SAN SIMON-RADIO: About June 1, VOR will be cmsnd. Freq: 115.4 mc. Ident:SSO. Lctd lat 32-16-12, long. 109-15-45. Elev: 3607'MSL. Class: VORW. Disregard spurious signals.
** SCHNEBLEY HILL, BCN SITE42,LAX-AMA: Bcn changed to 12 rpm. (4-18)
SCOTTSDALE-THUNDERBIRD#2 ARPT: Closed. (3-26)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000';050°-060°,22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°,40 n mi 12,000';225°-230°, 40 n mi 7,000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)
TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)
✱TUCSON ARPT-TOWER: April 19, trans and rcvr 348.6 mc cmsnd.
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c)SE quad 12,000'; (d) NE quad 13,000'.
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: BENTON ARPT: Temp clsd to transient acft due hazardous conditions.(4-16)
**CAMDEN-HARRELL ARPT: NE/SW strip to be used in emerg only. (4-8)
FLIPPEN-RADIO: Feb 12 VOR shut down until approx May 3. (4-23)
PINE BLUFF-RADIO: About May 6, VOR will be shut down until approx June 6.(3-20) During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR except V-16S TXK to PBF unusable. Ints and alts as charted. (3-22)
TEXARKANA-RADIO: VOR shut down until approx May 9 - relctn to lat 33-30-50, long. 94-04-20.(4-1) VOR flgts authorized to use TXK LFR in lieu of VOR. (1-3)

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DINUBA-ALTA ARPT: Clsd until May 20. Unlgtd until June 20. (4-22)
DIXON ARPT: Closed. (8-30)
**DOWNEY ARPT: Closed - land use changed. (3-14)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
FILLMORE-RADIO: VOR coverage 320°-355, 35 n mi at 11,000; 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-chkd.

have ... GILA BEND RADIO: ... FT. JONES RADIO: VOR has lgt course roughness all quads. Only arwy radials ...

CALIFORNIA: FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-16) DME coverage 335°-350°, 43 n mi at 3000';350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000';30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°-7000'; 340°-040°, 12,000'; 040°-070°, 8000';070-100°, 7000';100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) About May 1, rcvr 122.5 mc will be discontinued and concurrently 122.6 mc will be cmsnd. (3-4) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800' - caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. Daylgt opern of cranes with 80' booms adj to apch end rnwy 30. Tk-offs not affected. (3-28)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down-modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

★LOS ANGELES INTERNATIONAL ARPT-TOWER: April 17, VHF/DF flight-checked and cmsnd. Freq coverage 118.1 to 135.9 mc. Unreliable 045° -060° below 13,000'MSL beyond 30 n mi. (4-19) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or between LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) November 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

LUCERNE VALLEY DOUBLE J RANCH ARPT: Length of strip reported increased to 3000'.

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

**NEEDLES, 25A, LAX-AMA ARPT: Fuel no longer avail. (4-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flight should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

CALIFORNIA: OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000';350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT - SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

GEORGIA: ALBANY ARPT: Jet acft operg from Turner AFB particularly SE of arpt. Ctc Turner twr on 126.18 mc for advisory info. If unable to ctc Turner twr ctc Albany rdo for relay.

ALMA-RADIO: About Mar 25 VOR shut down -modernization. During modification shutdown VOR flights are authorized to use the Alma LFR in lieu of the VOR on all airway segments. MEA's remain as charted. Harris Neck, Cabins, St. Mary's Int unusable. Augusta radial 215° usable at Dublin Int. MRA 5000'. Augusta 170° radial usable at Lott's Int. MRA 5000'.

ALMA-SITE 43, MIA-ATL ARPT: Sod rnwys soft when wet- caution advised. (4-12)

ATLANTA-RADIO-SPECIAL NOTICE: ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun arpt. (2-26) Center advises high altitude sector with jurisdiction over airspace 25,000' and above within Atlanta Control Area now activated. All jet type acft operg on IFR flgt plans at or above 25,000' or 1,000'on top should guard 301.4mc. Within Atlanta area, this channel will be utilized to obtain traffic clearances and to forward progress reports. Weather and other information not pertinent to traffic control should be handled on 255.4mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)

ATLANTA-RADIO: VOR courses 060°-090° out of tolerance acct bends and roughness. (11-3)

ATLANTA ARPT: Arriving acft make initial ctc with Atlanta Apch Ctl on 120.7mc regardless of wea or flgt plan. Acft not equipped for 2-way commun on 120.7mc will use other avail freq. Rnwys 33R-15L & 27R-9L clsd;15-33 clsd at twr's discretion - const. (

BRUNSWICK ARPT: Caution-intensive blimp training in vicinity.

BRUNSWICK-McKINNON ARPT: Rnwy 15-33 clsd to ngt operns until further notice. (2-15)

COLUMBUS-RADIO: Caution-all courses LFR have moderate to severe multiples. (8-29)

MACON-RADIO: VOR/DME usable dist. 35 n mi at MEA. (5-10)

NORCROSS-RADIO: VOR courses 200°-230° out of tolerance account scalloping.

ROME-RADIO: LF rng operg as unmonitored fac. Use of LF rng as en route or apch aid must be ADF disregarding on-course signals & pilot must monitor fac durg such use.

SAVANNAH-TRAVIS FLD-TOWER: ILS BC-restricted-excessive bends. Lclzr not to be used above 5000' MSL. (3-19)

GEORGIA: SWAINSBORO-THOMPSON ARPT: Closed-new runway under construction. (11-20)

VALDOSTA-RADIO: VOR unusable 240° clockwise thru 360° to 110° account excessive roughness and course displacement with exception of arpt apch course 003°, usable to 10 n mi. (8-31)

**VALDOSTA-MOODY AFB-SPECIAL NOTICE: Controlling Agency of Warning Area W-470 has been changed from Moody AFB, Ga. to Tyndall AFB, Fla.

IDAHO: BOISE AIR TERMINAL-TOWER: UHF/DF NE and NW quads unreliable below 14,000' beyond 40 n mi. SW & SE quads unreliable below 10,500' beyond 40 n mi. (11-9)

BURLEY-RADIO: VOR coverage 130°-150°, 26 n mi at min terrain clearance altitude.

IDAHO FALLS-FANNING ARPT: Rnwy 16-34 clsd to ngt operns-unlgtd. (4-23)

JEROME-COUNTY ARPT: Clsd due thawing conditions. Field muddy. (2-24)

MALAD CITY-RADIO: VOR coverage 360°-20° and 50°-60°, 35 n mi at 12,000'

STREVELL ARPT: All lgts inop. (6-29)

TWIN FALLS-RADIO: VOR rads 115° to 150° usable dist lmtd to 35 n mi at min terrain clearance altitude. (1-4)

TWIN FALLS-JOSLIN ARPT: Excavation 15' deep, 30' wide lctd 165' off NW end rnwy 12-30. Mrkd by line of red flags extending 36" above gnd on SE edge of excavation paralleling rnwy. Men and equip. operg vcnty. (4-4)

ILLINOIS: ALTON-CIVIC MEMORIAL ARPT: Aerobatic area for student trng in following described area: Bounded by long. 89-48, and 90-00; lat 38-57 and 39-03. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL.

BRADFORD-RADIO: VOR coverage limited to 36 n mi MEA from 265° clockwise to 30°.

**CARBONDALE-SOUTHERN ILLINOIS ARPT: Formerly carried as Murdale Arpt. (3-27)

CHAMPAIGN ARPT: Effective May 15, E/W runway permanently closed. (4-12) 20' poles erected approx 150' N and adj to E/W runway. (9-5)

CHAMPAIGN-UNIVERSITY OF ILLINOIS ARPT: Aug 15, hvy lcl tfc Mon-Sat. Use caution while in area. (1-15) Glider operns Sat and Sun in VFR wea using N/S rnwy and 600' tfc pat. with rgt or left turns depending on tfc. (4-13)

CHICAGO AREA-SPECIAL NOTICE: Effect. Mar 31, all helicopter operns in the Chicago metropolitan area will be required to fly prescribed routes of flgt with the MDW, ORD, and Glenview Arpt Tfc Ctl Zones when the following wea conditions exist: Less than 1000' ceiling and/or less than 3 mi visibility. Charts and procedures detailing these routes are available from the following CAA offices: Midway, O'Hare and Meigs Twrs, Aviation Safety Offices at Du Page Co. Arpt and 5449 S Kildare, Chicago, Illinois. (3-1) 170' maximum height twrs supporting 28 mi of transmission line being erected west of Orland Park, Illinois thence southeasterly and easterly to a point on the Indiana-Illinois State Line, passing 0.7 mi E of Frankfort, Illinois and 2.7 miles southwesterly or Prosperi Arpt; 0.5 miles N of Monee, Illinois and 2.5 mi S of Governors Airpark. Unmarked, unlighted. (4-17)

CHICAGO-RADIO: Multiples NW course LFR. (11-9)

CHICAGO-HOWELL ARPT: 34' above gnd electric/telephone pole being erected 300' NE of NE corner. (3-12)

CHICAGO-MEIGS FLD: About May 1, 450'(1041'MSL) lgtd concrete chimney will be erected 2.5 n mi WSW(252°T) at lat 41-51-02, long. 87-39-11. (3-8) Caution- South end runway distance from threshold lights to seawall 90'. Field will be closed under following wind conditions: (1) Wind 90° to runway, 15 knots or more to aircraft 1500 lbs or less. (2) Wind 90° to runway, 20 knots or more to single-engine aircraft except tricycle or caster gear aircraft. (3) Wind 90° to runway, 25 knots or more to all aircraft.

CHICAGO-MIDWAY ARPT-TOWER: TVOR inoperative due excessive roughness, scalloping and bends on all existing arwys. (3-8) FLD: About May, 375'(968'MSL) lgtd steel stack being erected 2.5 n mi NNE(23°T) at lat 49-49-42, long. 87-43-23. (4-17) Single engine transient airacraft will not be allowed dock space at the North terminal building, must use facilities of South terminal building. Due to non-visibility account parked aircraft, tower unable to control single engine aircraft on many portions of all outer ramps. Use extreme caution on East ramp and in vicinity of both terminal buildings. All aircraft will remain North of white line on South side of runway 27R while running up, parking or taxiing. (5-9) One experimental oscillating flasher guidance light installed on each side of green threshold lights on approach end runway 31L. Building 23' above ground (627'MSL) being erected at 41-47N, 87-45W at NE intersection of 55th St. and Cicero Avenue, adjacent to airport. (3-8)

ILLINOIS: CHICAGO-O'HARE INTNL ARPT-TOWER: About Sept 23, rcvr 122.5 will be changed to 122.6 mc. (3-22) Due to non-visibility twr unable to ctl tfc 300'-800' W rnwy 36, 800'-1600' E apch end rnwy 9, 100'-1100' N rnwy 9-27, 800' SE intsxn rnwy 14-32, and USAF ramp due bldgs and parked acft center taxiway to ramp and black top taxiway to Slick hangar, and terminal gates 1, 2 and 3. All inbound acft equipped with appropriate multiple rdo freq shall make initial ctc with O'Hare apch ctl on 118.3 mc or 348.6 mc if UHF equipped regardless of wea. Landing and take-off prohibited unless acft equipped with functioning rdo capable of 2-way direct commun with ctl twr. (4-27)

CHICAGO HEIGHTS-RADIO: VOR/DME coverage limited to 03°-58°, 70°-130° and 155°-317° 35 n mi at 2000' MSL. (6-12)

DANVILLE-VERMILLION COUNTY ARPT: Caution - men and equip. on fld (10-11)

DIXON ARPT: NE/SW rnwy clsd for const - men and eqpip. on fld daylgt hrs. (4-18)

EAST ST. LOUIS-PARKS METROPOLITAN ARPT: Aerobatic area for student trng in following area: Bounded by long. 90-00 and 90-15; lat 38-25 and 38-35. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL. (5-13)

**EFFINGHAM CO. MEM'L ARPT: 340'(935'MSL) lgtd twr erected 2.5 n mi NW(330°T) at lat 39-06-40, long. 88-33-09.

GALESBURG MUN ARPT: Caution - truck on fld. (2-25)

GILMAN ARPT: Closed. (10-11)

HARVEY-RADIO: About June 6, LFR will be decmsnd. (4-25)

**HIGHLAND-WINET ARPT: On or about Apr 15, NW/SE and NE/SW rnwys plowed and reverted back to farm land. Arpt will remain in opern with 2600' N/S rnwy and parking area. Taxi strip will also be eliminated. (3-26)

JOLIET-RADIO: VOR coverage 35 n mi at all azimuths at minimum en route altitude. Automatic weather cmsnd Aug. 13. (8-13)

JOLIET ARPT: Work in progress on extending 3 existing steel stacks and construction of one new stack 450' above gnd (965'MSL) lctd 2 mi SE - lgtd. (1-7)

KEWANEE ARPT: Men and equip. on fld intermittently - caution. (6-29)

LOMBARD-YORK TOWNSHIP ARPT: Transmission line approx 3000' W. Height of twrs, 123' not mrkd or lgtd. (11-21)

MACOMB ARPT: Operated on limited status. (11-29)

MATTOON-COLES COUNTY MEMORIAL ARPT: NE/SW rnwy and taxiway clsd for constr-uction. 300' S end of N/S rnwy clsd. Outside telephone at SW corner of big hangar. Night attendant in trailer on NE corner of hangar. (1-11)

MILFORD ARPT: NE/SW and E/W lndg strips usable only 100' width. Mrkd flags at ends. (9-17)

MT VERNON ARPT: Work in progress daylgt hrs. W end E/W rnwy clsd. No lgts avail. until May 15. (4-4)

NORTHBROOK-SKY HARBOR ARPT: About May 10, 178'(821'MSL) lgtd twr will be erected 2.1 n mi NNE(34°T) at lat 42-11-10, long. 87-49-28.(3-21) Until June 1, well drilling machine with 57' mast operg 588' W of arpt bndry. Lctd 42-08-39 N, 87-51-53W - not mrkd, painted, or lgtd. Height 752' MSL. (3-1)

PEORIA-RADIO: VOR coverage 190°-70°, 35 n mi at min en route alt. (10-11)

PEORIA-GREATER PEORIA ARPT: No transient jet mil acft permitted to land without prior coordination with and approval by Comdr 126 FI Group at arpt. (4-18) 5' unlgtd fence apch end rnwy 22. (10-15) Beginning May 1 and until approx July 31, NW/SE rnwy will be clsd for reconst including paving, drainage, and lgtg. (4-8)

PEOTONE-RADIO: VOR coverage lmtd between 39 and 43 n mi at most azimuths at min en route alt. (2-4)

POLO-RADIO: VOR coverage 280°-350°, 39 to 43 n mi at min en route alt. (2-21)

QUINCY-RADIO: VOR shut down until approx May 17. During this period the following MEA's can be used: V116: Excello, Mo., Int(Int formed by IRK R154 and 072 bearing to Quincy, Ill., Rbn) to Quincy Rbn (MCA V52 2600' northwest) 2000'; Quincy rbn (MCA V52 2600' northwest to Peoria VOR 2000'. V63: Columbia VOR to Quincy rbn 2000'; Quincy rbn (MCA 2600' V52 northwest) to Burlington VOR 2600', V50: Kirksville VOR to Quincy rbn 2500'; Quincy rbn (MCA V52 2600' northwest) to Springfield VOR 2000'. This area is in use daily when ceiling and visibility exceed 4000' and 5 miles between 2500' and 5500' MSL. (4-17)
PARSONS-SPECIAL NOTICE: Demolition 7.8 mi ESE at lat 37-17-45, long. 95-07-15.
*PRATT ARPT: 306(2257' MSL) lgtd twr erected 3 n mi SSE(170°T) at lat 37-39-20, long. 98-44-24. (4-18)
RUSSELL ARPT: Caution-ditch NE of intsxn rnwy 16-34 and 3-21 - marked. (7-3)
SALINA-RADIO: VOR coverage 202°-257°, 35 n mi at min en route alt. (2-2)
*TOPEKA ARPT: Permanently closed. (3-7)
TOPEKA-PHILIP BILLARD ARPT: Due non-visibility twr unable to ctl tfc on portions of ramp and parking areas to N, E,S, and W of twr; also portions of taxi routes from all hangars to the main ramp and N/S taxiway. Use rnwys and taxiways only. Sod areas unusable. (4-18)
TOPEKA-WILSON ARPT: New lndg strip reported: Lat 39-03-42, long. 95-53-22; lctd 10 mi W; elev 1070'; 1 rnwy (N/S) 2721' x 378' (turf); not lgtd; A&E by appointment; 80/87 oct fuel. (4-9)
WICHITA-RADIO: PPI apch not authorized for either Wichita Mun Arpt or McConnell AFB. Radar vectors to apch fac only. (1-21)
WICHITA ARPT: Const on SE corner clear of rnwys. Taxiway under const E side of rnwy 19 joining rnwy 300' N of S end. Const work in progress W side and 700' S of the N end of taxi strip to rnwy 19. Obstn mrkd. Mowing equip. on fld days. Acft remain on concrete areas. Sod unsafe. (4-17)
WICHITA-BEECH ARPT: N half NW/SE rnwy clsd. Contact twr for lndg instructions.(7-3)
WICHITA-CESSNA ARPT: All acft use new hard surface rnwy 17L-35R along E side of fld for N/S operns. If adverse wind conditions prevail, sod strips are usable. All apchs from and departures to easterly quadrants. Avoid crossing N and S apch and take-off lanes of jet acft to adjoining McConnell AFB. Due to remote lctn, the McConnell twr is lmtd to advisory tfc information only for rdo equipped acft to and from Cessna Arpt. Call McConnell twr on 126.18 mc - listen 126.18 mc. Non-rdo equipped acft must first obtain tfc pattern information by telephone Murray 4-7261, ext 216. Under IFR conditions ctc Wichita Apch Control for tfc clearance prior to entering ctl zone. Transmit 3023.5 kc, 122.5 mc. Listen 124.5 or 125.7 mc or rng voice channels. (8-20)
WICHITA-KEN-MAR ARPT: Until about May 1, const on W half of N/S rnwy. (3-27)
KENTUCKY: BOWLING GREEN-RADIO: About May 7, NE course LFR will be realigned from 216° to 229°; NW course from 096° to 116°. (2-28)
CORBIN-RADIO: VAR N visual course has moderate roughness 3 to 6 n mi and S course 2 to 3 n mi fro m stn.(9-14) About May 20, BJ fac on 263 kc will be changed to London BMH lctd at lat 37-05-25, long. 84-04-30. (4-12)
FORT KNOX-SPECIAL NOTICE: 12.2 n mi NW (4.3 n mi E Brandenburg, Kentucky) plant is processing highly inflammable and explosive compressed gas. Acft warned to avoid flying in this vcnty.
HARLAN ARPT: Due to recent floods, arpt reported unusable and in dangerous condition due to mud and debris. (2-8)
LEXINGTON-RADIO: VOR area 330° clockwise to 015° unreliable acct intermittent interference. Azimuth info not to be used for IFR opern. (3-26)
★LEXINGTON-BLUE GRASS ARPT-TOWER: Effect. April 28, hrs opern: 0700-2300. (3-27) FLD: Due to non-visibility twr unable to ctl tfc on ramp area adj to Terminal Bldg from hangar line SE to taxi ramps NW and NE. Taxi and parking area SE end SE hangar apron unsafe. (2-24)

KENTUCKY: LONDON-RADIO: About May 20, H fac will be cmsnd. Freq: 263 kc. Ident: LOZ. Lcts at lat 37-05-25, long. 84-04-30. Class: BMH. (4-12)

✱LOUISVILLE-BOWMAN FLD-TOWER: Effect. April 28, hrs opern: 0600-2200. FLD: Due to non-visibility twr unable to ctl tfc on first 150' rnwy 6 and outer 150' of the wide NE ramp next to hangar line and in tfc pat. SW of fld.

✱LOUISVILLE-STANDIFORD FLD-TOWER: ILS glide slope and MM shut down. (9-24) April 22, trans and rcvrs 119.0 and 319.2 mc cmsnd. (4-22) FLD: Due to non-visibility twr unable to ctl tfc last 1/2 mi of apch to rnwy 1 and 750' of rnwy 1. Rnwy 1-19 open to normal day and night operns. Apch lgt system shut down for rnwy extension. Const equip. on fld. Caution advised. Due limited servicing and parking facs, strongly recommend all acft having gross lndg wt of less than 25,000 lbs use Bowman Fld 0800C May 2 thru 2400C May 4. (4-12)

PADUCAH-RADIO: VOR has moderate bends in NE quad. (2-12)

YORK-RADIO: VOR has moderate bends 4 to 8 n mi from stn at min en route instr alt from 50°-230° and from 300°-350°. DME coverage 35 n mi at 2500' MSL.

LOUISIANA: SPECIAL NOTICE: Effective Mar 1 thru June 1, 1957, the King Cole Caution Area estab within the following described area: along US highway 190 from its junction with the US highway 165 W along US 190 to the Sabine River near Deweyville; thence N along the Sabine River to Logansport, La.; thence along State Highway 38 to Gloster, La.; thence along State Highway 171 to Shreveport, La.; thence E along the southern bndry of Civil Airway Red 10 to Monroe, La.; thence S along US Highway 165 to point of beginning. Altitude: From surface to 50,000 ft. MSL. Activities Conducted: Cover and ground support acft. Time of Use: Continuous only under VFR weather conditions. Controlling Agency: Manuever Director, Camp Polk, La. (2-13)

**ALEXANDRIA-SPECIAL NOTICE: Controlling Agency of Warning Area W-377 changed to England AFB to coincide with name change of airfield from Alexandria AFB. (4-10)

BATON ROUGE-RYAN FLD: Narrow open ditches both sides rnwy 13-31 outside of rnwy lgts. (7-12)

BOGALUSA ARPT: Caution - obstn lgts twrs being erected 1800' from N end of N/S rnwy.

LAKE CHARLES-RADIO: VOR radials 181°-359° out of tolerance due to scalloping & bends. About May 20, VOR will be shut down until approx June 20. (4-5) During shutdown flgts authorized to use LCH LFR in lieu VOR. Ints and alts as charted. (4-18)

**LAKE CHARLES-McFILLEN AIRPARK: New arpt. Type: "P"; lat 30-07, long. 93-10; lctd 4.0 S; elev. 17'; 1 rnwy (N/S - 2600' - sod); minor A&E; 80/87 oct fuel. (3-29)

MANY-HART ARPT: Use with caution. (7-18)

MINDEN MUN ARPT-SPECIAL NOTICE: Test detonating will be conducted daily 0830-1630, 7.5 n mi S (188° T) within an area 4.3 n mi in radius centered at lat 32-34-10, long. 93-26-00 (3 s mi NNW of Doylene, La.), when ceiling js at least 3000', visibility 5 mi. Pilots should avoid area at altitudes below 2000'. (12-20)

MONROE-RADIO: VOR/DME min reception alt revised as follows: V-18 Shreveport, La. to Monroe, La. 2000' MSL; V-18 N Shreveport to Monroe 2500' MSL; V-18 Monroe to Jackson, Miss. 1600' MSL; V-18S Monroe to Jackson 2400' MSL. VOR has scalloping and bends beyond tolerance between 20°-40° and between 310°-335°. (9-28)

NEW IBERIA-IBERIA PARISH ARPT: Arpt clsd to all acft. All rnwys marked with white corsses. Arpt now owned by U.S. Navy. (2-13)

NEW ORLEANS-RADIO: VOR radials 271°-029° out of tolerance acct scalloping and bends.

NEW ORLEANS ARPT: Hvy acft use rnwys only. Lgt acft take-off on rnwys. Acft transporting any items listed in Part 49 of CAR are prohibited from lndg without permission.

NEW ORLEANS-MOISANT INTERNATIONAL ARPT: Caution stay on hard surface rnwys and taxiways because of incomplete and soft shoulders. Turf extremely hazardous.

SHREVEPORT-BARKSDALE AFB-RADIO: Standard ANC separation will be used between IFR acft instead of radar separation until further notice. Radar fac will be shut down 0730-0930 daily and 0800-1200 Sun. (11-1) Radar separation standards will be applied as specified in MANOP radar procedures for arpt tfc ctl twrs. Arriving acft will normally be cleared to secondary fixes at alts of 6000' or higher and subsequently vectored by radar to appropriate primary fix. Departing acft will normally be cleared along designated departure routes and after radar contact will be vectored by radar aroung other air tfc. (2-2)

WELSH ARPT: E/W rnwy closed ngts. Beacon inop. (7-13)

MAINE: AUGUSTA-RADIO: VOR coverage 80°-160° and 220°-240°, 35 n mi at min en route alt.

MAINE: BANGOR-RADIO: VOR coverage 360°-50°, 17 n mi; 50°-240°, 26 n mi; 240°-360°, 22 n mi at MEA. Roughness beyond 8 mi 360° clockwise to 060°. DME coverage 235°-260°, 35 n mi at 2500'. (3-15)

BREWER ARPT: Extremely muddy. Use gravel strip only at all times. (3-11)

**CRIEHAVEN MACHIAS SEAL ISLAND-SPECIAL NOTICE: Controlling Agency has been changed from Commander, Dow AFB to: Commander, Fresque Isle AFB and Commander, Loring AFB, Maine.

**EAST BALDWIN-BALDWIN ARPT: Abandoned - land reverted to agriculture. (3-22)

HOULTON ARPT: Few scattered rnwy lgts inop on rnwy 5-23, three threshold lgts inop on rnwy 23. Six contact lgts out on W side rnwy 1 replaced with smoke pots. (2-4)

MILLINOCKET ARPT: Apron usable but caution advised due broken pavement and soft spots.

PHILLIPS-PLEASANT VALLEY FARMS: Caution - 300' WSW end of strip under const.

PORTLAND ARPT: Rnwy 10-28 open daylgt hrs only. No lgtg avail. Rnwy now 2400' long. Approx 1200' of S end rnwy 02-20 clsd to acft below 5000 lbs due equip. crossing rnwy. New rnwy 11-29 under const. 20' embankment obstruction 200' from apch end of rnwy 33. Mrkd by lgt 250' from apch end of and in line with southerly edge of rnwy 33.

PRESQUE ISLE-RADIO: VOR coverage 35 n mi at min instr alt. Flyable bends beyond 17 n mi between 80°-120° and 180°-210°.

PRINCETON-RADIO: VOR coverage 150°-240°, 35 n mi and 290°-30°, 30 n mi at min instr alt.

ROCKLAND ARPT: Rnwy 17-35 clsd ngt operns.

WATERVILLE-LA FLEUR ARPT: Rnwy 14-32 rough, not maintained. Use at own risk.

MARYLAND: BALTIMORE-RADIO: DME and VOR coverage 35 n mi at min en route instr alt.

**BALTIMORE-MARTIN ARPT: Rnwy flood lgts on prior request have been discontd. (3-20) Const - men and equip. on fld. Extensive ditching, grading and paving operns in progress entire arpt area. Two-way rdo required. (3-20)

CAMBRIDGE ARPT: Arpt reported - 1.5 mi SE; elev.: 20'.; lat 38-32-02, long. 76-01-45; services minor repairs; 80/87 oct. Unicom (122.8 mc); 1 rnwy (NW/SE) 2500' x 100'.

CAMP SPRINGS-ANDREWS AFB-RADIO: ILS serving rnwy 28 operg for test purposes in conjunction with apch lgt evaluating program for approx 90 days. Lclzr freq: 110.1 mc. Ident: XCS. Glide slope freq: 334.4 mc. LMM freq: 245 kc, ident: CS. LOM freq: 303 kc. Ident: XC. Lclzr lctd 850' from W end of E/W rnwy; glide slope lctd 350' from center line and 725' from apch end E/W rnwy 28 with antenna mast 35' high obstn lgtd. LMM lctd 3400' from apch end of E/W rnwy; OM lctd 6.34 mi from apch end E/W rnwy. (1-25)

CUMBERLAND ARPT: Will be clsd from 1330 May 17 until 0600 May 20 for sport car races will be open on May 17, 18 on prior req. (4-15)

GRANTSVILLE-RADIO: VOR usable dist 20 n mi from 300° clockwise to 310° at MEA. Lgt flag activity approx 2 mi from stn from 100° to 160° and from 220° to 320°. (1-5)

HAGERSTOWN ARPT: All taxi strips W of N/S rnwy clsd-parked mil acft. Taxi strips leading to City hangar remain open to transient tfc. Caution - provide proper clearance over U.S. 11 when apchg to land W on E/W rnwy. Rnwy mrkd to show where 40 to 1 apch clearance line intersects rnwy. Entire rnwy available at pilots' discretion.

LAYTONSVILLE-DAVIS ARPT: Caution - const extending rnwy 500' at ENE end. (7-11)

✱PATUXENT RIVER NAS-RADIO: Navy VOR cmsnd. Freq: 117.6 mc. Ident: NHK. Lctd at fld, lat 38-17-41, long. 76-25-15. Mag var.: 7°W. Class: VORW. (4-16)

RISING SUN-FARMINGTON ARPT: Arpt reported - 3 mi SE; elev.: 140'; lat 39-40, long. 76-00; services minor repairs; 80 octane. 1 rnwy (NE/SW) 2000' x 200'. (12-10)

SALISBURY-RADIO: VOR has flyable bends and roughness on Arwy V-1 to the NE at lower altitudes. (3-19)

WHITE MARSH-QUINN ARPT: Arpt reported - 1 mi SW; elev. 200'; lat 39-24, long. 76-25; services minor repairs; 80 oct. 1 rnwy (E/W) 2460' x 200'. (12-10)

MASSACHUSETTS: SPECIAL NOTICE: Airport condition information available by calling State Police Barracks.

BOSTON-SPECIAL NOTICE: Air Force approach control "VOLSCAN" equip. will be evaluated from May 20 - 29, during hrs 1200-1600. Tests will be conducted under VFR conditions at all times and will involve from one to ten acft including jet and transport types. Operns will be concentrated in area east of Logan Arpt in Massachusetts Bay. (4-25)

BOSTON-RADIO: VOR coverage 26 n mi at min en route alt in all azimuths.

BOSTON-BEDFORD (HANSCOM) ARPT: New traffic procedures: all acft with pat speed below 110 mph, fly 900' MSL; all conventional acft with speed 110 mph and above, fly 1300' MSL; jets fly 1800' MSL. (11-14)

MASSACHUSETTS: BOSTON-LOGAN ARPT-TOWER: VHF/DF min alt coverage within radius of 40 mi: 025°-080°, 2000'; 080°-210°, 2500'; 210°-240°, 3000'; 240°-270°, 3500'; 270°-330°, 3000'; 330°-025°, 2500'. (4-2) FLD: Obstn lgts on 174' stack 1.3 n mi WSW inop. S hangar area W of stn 23 restricted to acft 80,000 lbs or less. Take-offs in northeasterly direction rnwy 4L and lndgs in southwesterly direction rnwy 22R restricted to acft 12,500 lbs or less xcpt in an emerg, as defined by CAR 60.2. Turbojet acft lndgs and take-offs rnwy 4L-22R and take-offs rnwy 33 prohibited. Use mrkd hard surface rnwys and taxiways only. Other areas including grass shoulders unsafe. Caution - seagulls on and adj to lndg areas. All rnwy widths should be corrected to indicate width of 210' with elevated rnwy lgts 10' from usable rnwy edge. Lead-in lgtg sys rnwy 4R consists of green threshold lgts lctd 2502' NE of the SW end of rnwy 4R and bar lgts of clear white units spaced at 100' intervals on the extended rnwy centerline extending from 42'-1100' SW end of rnwy 4R. Cluster of 6 alternate red and white bar lgts lctd at the 1100' point replaced with single bar white lgt. Standard rnwy lgts btwn threshold lgts and bar lgts. Brightness of lgts is determined by prevailing wea conditions and is controlled by twr. Sequenced flashing lgtg sys serving rnwy 4R cmsnd. Clear flasher units are installed at approx 100' intervals along extended rnwy centerline starting 1140' from end of rnwy pavement and ending 40' from end of rnwy pavement. This sys will be operd under reduced visibility conditions in conjunction with existing lead-in lgtg sys. Caution-during daylgt hrs only, men and equip working outboard of rnwy lgts on rnwy 4R for the first 2600'. (11-23) Supplementary lgts added to existing apch lgtg sys serving rnwy 4R. Complete sys consists of green threshold lgts 2502' NE of SW end of rnwy, 3 white lgts on either side of rnwy spaced at approx 100' intervals btwn threshold lgts and SW end of rnwy, white bar lgts spaced at approx 100' intervals on extended rnwy centerline from 42'-1142' SW of end of rnwy, sequenced flashing white lgts spaced at approx 100' along the extended rnwy centerline starting from a point 1142' SW of end of rnwy pavement and ending 42' SW of end of rnwy pavement. Opern of lgts is determined by prevailing wea conditions and is controlled by twr. (1-29) First 1/3 rnwy 4R reported uneven by pilots of hi-speed and hvy acft - ctn advised. Rnwy 4R-22L clsd Mon-Fri 0800-1700 for pavement repairs xcpt when ceiling or visibility falls below 1000' or 3 mi. During such periods as rnwy 4R-22L is clsd for current emerg repairs, the provisions of SAMB special regulation dated May 27, 1955 restricting use of rnwy 4L-22R will be waived whenever the wind is 15 knots or over and within 30° of rnwy heading 22 or rnwy heading 4, xcpt that no waiver will apply to turbojet acft, to turboprop acft or to acft whose performance characteristics do not permit attaining an alt of at least 500' when taking-off or lndg over the houses in the Bayswater St section of Orient Hgts under the conditions existing at the time. (2-27)

BOSTON-REVERE ARPT: Clsd to all ngt operns. Caution advised during daylgt hrs. Const of highway near apch ends of rnwys 13 and 15. (2-6)

CHICOPEE FALLS-WESTOVER AFB-RADIO: VHF/DF unreliable SE and SW quads below 4000' beyond 40 n mi. (11-4)

FALMOUTH-COONAMESSETT RANCH: Exercise extreme caution when ceiling 3000' or below and visibility 5 mi or less. Hvy jet operns vcnty Otis AFB. When IFR contact RAPCON on 122.5 mc; listen 126.18 mc prior entering Otis RAPCON area. (8-28)

HYANNIS-BARNSTABLE ARPT: Major const in progress. Men and equip on all fld areas during daylgt rhs. Equip or hazards obstn lgtd at ngt. Caution. (4-15)

NANTUCKET-MEMORIAL ARPT: No fuel, storage, service avail until June 15. (4-26)

WESTFIELD-RADIO: About June 11, LFR will be shut down until approx June 25. Class will be SBMRLZ. The SE course will be realigned from 302° to 293°. (4-12)

MICHIGAN: BATTLE CREEK-KELLOGG FLD: Men and equip. on fld - days. Trees above obstn lgts on SE edge fld.

BELLAIRE-ANTRIM COUNTY ARPT: Clsd - due rnwy const. Old N/S strip on E side usable. (10-1)

**BENTON HARBOR-ROSS FLD: 125' (761'MSL) unlgtd twr erected 2.1 n mi S (194°T) at lat 42-05-28, long. 86-26-13. (4-15) Embankment all apchs. Use rnwys. Entire 5100' E/W rnwy usable day opern. 1450' E end not lgtd. Use 3650' lgtd section for ngt operns. (9-28)

BIG BEAVER ARPT: N/S rnwy not maintained. (11-8) Fld soft during spring thaw. (3-15)

CARLETON-RADIO: DME coverage at minimum en route alt 39 n mi from 360° clockwise to 250° and 30 n mi from 250° clockwise to 360°. (2-27) VOR coverage lmtd to 39 n mi all azimuths at min en route alt.

DETROIT-CITY ARPT: Due to non-visibility twr unable to ctl tfc on first 1000' rnwy 2. Rnwy 2-20 clsd to large twin eng acft 12,500 lbs gross and over xcpt on pilot's request.

DETROIT-WAYNE MAJOR ARPT: Due to non-visibility twr unable to ctl tfc on ramp N side of old arpt and eastern two-thirds of National Guard ramp on SE side of old arpt.

MICHIGAN: Rnwys 5-23, 14-32 and old arpt clsd to all lndgs and take-offs. Sod area NW of rnwy 5-23 and NE of rnwy 14-32 avail. (6-27) Hangar const in sod area SW of apch end of rnwy 14 old arpt daylgt hrs. 100' crane lowered at ngt. Sod area NE of rnwy 14 not affected. (1-25) Ramp const directly in front of main term bldg. Men and equip. on or adj to ramp. (2-25) Taxiway const to left of and parallel to rnwy 33R. Hangar const to left of apch end of rnwy 5 old section arpt. Usable sod area mrkd yellow plastic cones. (3-11)

DETROIT-WILLOW RUN ARPT: Due to non-visibility twr unable to ctl tfc on N portion W ramp and first 500' of rnwy 9L.

EASTPORT-TORCHPORT ARPT: Caution - NW/SE rnwy under const.

ESCANABA ARPT: Const W end of E/W rnwy. (7-13)

GRAND RAPIDS-KENT CO. ARPT: Trees on apchs to rnwy 36L higher than obstn lgts. Unlgtd acft parked SW side of fld W intsxn rnwys 36L and 4R also just off N edge taxi ramp W admin bldg. Rnwy 18R-36L clsd ngt tfc sunset-sunrise. Overrun S end rnwy 18L-36R clsd all tfc.

GREENVILLE ARPT: Clsd for const until approx July 17. (4-18)

HOUGHTON-SPECIAL NOTICE: Two 185' self supporting steel twrs carrying power line across Portage Lake under const. (9-16)

IONIA COUNTY ARPT: 319' (1500' MSL) lgtd antenna being erected 5 n mi SW (232°T) at lat 42-53-08, long. 85-09-12. (4-22)

JACKSON-REYNOLDS ARPT: Rnwy 9-27 rough, usable for lgt acft. Caution - apch end rnwy 31 crosses hi-way S of fld. Cross road at 50' or above due hazardous surface vehicles. Acft taking-off on rnwy 13 SE, veer 40° rgt after safe alt to avoid dense residential area. (11-14)

KALAMAZOO MUN ARPT: Trees above one obstn lgt NW. (7-16)

L'ANSE-MUZZY'S LODGE ARPT: Closed. (7-2)

LANSING-CAPITAL CITY ARPT-TOWER: Twr trans on 245 kc serviceable approx 5 to 7 n mi - interference. ILS LMM lmtd to usable dist of 9 n mi due to interference. Slope angle 2.9° usable only to MM. (4-3) FLD: Acft parked W side fld E of apron. A processing seed plant 65' (910'MSL) constd 2650' SE end of NW/SE rnwy, lgtd. 1/3 SE end rnwy 14-32 clsd; approx 2200' NW end usable, mrkd. (10-29)

MARQUETTE-SAWYER ARPT: 80' (1260' MSL) unlgtd ctl twr const 2800' E of N/S rnwy. 50' unlgtd silo 300' S of bcn. (9-28)

MT. CLEMENS-MACOMB ARPT: Const on fld. E/W rnwy clsd.

MT. CLEMENS-SELFIRDGE AFB-RADIO: USAF VHF/DF steers unreliable below 3000' in all quads. USAF homing fac on 364 kc unreliable. (3-19)

MUSKEGON-RADIO: VOR coverage lmtd to 35 n mi 330°-075° clockwise, at MEA. (4-29).

MUSKEGON-COUNTY ARPT: Due to non-visibility twr unable to ctl tfc 100' on apch end rnwy 14 and for 50' on apch end rnwy 24. Acft apchg runway 14 over Mona Lake not visible to twr when flying below 100' - trees along bndry. N/S rnwy clsd to night flying. (11-14) 60' wea radar twr about 100' from centerline of NE/SW rnwy on NE end of rnwy. (4-25)

NEWPORT-MARSHALL ARPT: Mar 11, 77' (659'MSL) reactor containment vessel & 182' lgtd derrick being erected 1.8 n mi ENE (85°T) at lat 41-57-36, long. 83-15-30.

NORTH MANITOU ISLAND-SPECIAL NOTICE: April 24 thru Oct 13, 1957, control firing area as follows: lat 45-12, long. 86-01; lat 45-39, long. 86-35; lat 45-50, long. 86-12; lat 45-17, long. 85-46. Max ceiling 35,000' MSL. Firing bi-weekly Wednesday or Thursday daylgt hrs VFR wea conditions. Mission: Surface Naval Gunnery. (4-1)

PELLSTON-EMMETT CO. ARPT: Rnwy 9-27 restricted to 10,000 lbs gross wt single wheel. (3-4)

TRENTON-MERCER CO. ARPT-SPECIAL NOTICE: Air Fair May 4(rain date May 5). All acft without rdo arrive before 1100E. 2-way rdo req btwn 1100-1700E. Twr will oper on N side of fld rcvg and trans VHF only. Lgt acft parking S side of fld. (4-3)

TRENTON-MERCER COUNTY ARPT-TOWER: Rcvr 3023.5kc inop until approx May 1. FLD: Acft using rnwy 24 on take-off cont straight out to Delaware riv before executing left turn. All acft operns should be conducted on paved areas only, due to sink holes in sod.

WRIGHTSTOWN-McGUIRE AFB: VFR tfc controlled by radar up to 3000' within 7 mi radius of arpt & 5 mi both sides of centerline from McGuire LFR(WRI) to, and 10 mi beyond the Medford(MFX) bcn. All VFR acft are requested to call McGuire Apch ctl before entering this zone. Civil freq 126.18mc. Caution-exten jet operns during VFR & IFR wea up to 20,000'. (2-11)

NEW MEXICO: ALBUQUERQUE-SPECIAL NOTICE: Until Sept. 15, captive balloons will be released from SE quad of Sandia Base lctd 34-57-30, 106-28-45. (9-13)

ALBUQUERQUE-KIRTLAND AFB-TOWER: UHF/DF 305.4 mc and ILS lclzr voice fac 110.3 mc out of service pending cmsng RAPCON fac. (3-12) FLD: Jet barrier operational, but unreliable, on W end rnwy 08-26 upon request. Lndg will not be made in overrun area and taxiing across barrier will be held to a min. (11-30) Jet barrier rnwy 21 cmsnd. First 2600' and last 1000' rnwy 21 clsd to all lndgs. Last 1000' rnwy 21 overrun area. Lndgs will not be made in overrun area and taxiing across barrier will be held to a min. First 2500' rnwy 17 and first 2500' of taxiway T-1 not visible from new ctl twr. (2-20)

ANTON CHICO-RADIO: March 28, VOR shut down - modernization. Durg this period, following arwys will be unusable: V-12 OTO-TCC, V-12N ACH-TCC, V-62 San Jose Int - Pleasant Hill Int, V-234 ACH-Conchas Dam Int. (3-28)

CLOVIS AFB: Hvy jet tfc 0600-1500 hrs (MST) daily, Mon-Fri.

COLUMBUS-RADIO: DME coverage 216° thru 360° to 79°, 43 n mi at 10,000'. Coverage in Mexico not checked.

**COLUMBUS, 34, PHX-ELP, ARPT: Sale of aviation fuel perm discontinued. (3-27)

DEMING-RADIO: About June 1, VOR will be cmsnd. Freq: 108.6 mc. Ident: DMN. Lctd lat 32-16-33, long. 107-34-12. Elev: 4175' MSL. Class: VORW. Disregard spurious signals.

DEMING ARPT: Rnwys 26L-8R and 17-35 clsd to all tfc. (12-6)

★FARMINGTON-RADIO: April 26, VOR flight-checked & cmsnd. Freq: 115.3 mc. Ident: FMN Lctd: lat 36-45-00, long 108-05-54. Elev: 5870' MSL. Class: BVOR. (4-27)

FARMINGTON ARPT: Rnwy 6-24 ruf at intsxn W taxiway. (10-11)

GRANTS ARPT: Erosion and loose sand near rnwys.

LAS VEGAS-RADIO: VOR has moderate to severe scalloping all courses beyond 35 n mi.

LAS VEGAS ARPT: Bndry and rnwy lgts inop. (4-4)

OTTO-RADIO: About May 1, VOR will be shut down until approx May 26 - modernization. Durg shutdown, the following arwys will be affected: V-12 MEA ABQ-ACH 12,000'; V-83 MEA SAF-CNX 10,000'; V-60 OTO-San Jose Int unusable; V-60S ABQ-OTO unusable.

PINON-RADIO: About June 21, VOR will be cmsnd. Freq: 110.4 mc. Ident: PIO. Lctd: lat 32-31-44, long 105-18-20. Elev: 6578' MSL. Class: VORW. (4-18)

ZUNI-RADIO: VOR has moderate scalloping SW quadrant. (4-20)

NEW YORK: BETHPAGE-GRUMMAN ARPT: Hrs of opern 0700-1830E, Mon-Sat only. (10-25)

BINGHAMTON-RADIO: Erratic ADF action 4 to 13 n mi SSE of facility at min instr alt.

BINGHAMTON-BROOME COUNTY ARPT-TOWER: Roughness vicinity MM. (10-19) FLD: Const equip and men adj to and on W ramp daily during hangar const program. (10-4)

BUFFALO-RADIO: DME coverage 40°-110°, 39 n mi at min en route alt. (7-6)

**BUFFALO ARPT: N/S rnwy (18-36) abandoned and clsd for all tfc xcpt taxiing. There will be no further use of this strip as a rnwy. (4-4)

CALVERTON-PECONIC RIVER ARPT: Hrs of opern 0800-2400, Mon-Sat only. (10-25)

DELANCY-RADIO: March 14, VOR operating test basis only. Freq: 110.2 mc. Ident: DNY. Lat 42-10-40, long 74-57-27. (3-13)

ELMIRA-RADIO: VOR has scalloping all quads. (3-14)

FARMINGDALE-REPUBLIC ARPT: Private arpt. Manufacturer's plant - official bus. only. Clsd to all operns unless previous arrangements are made by telephone to have twr open and adequate crash facs. Fuel unavail. transient acft. (4-5)

GENEVA-SCENIC AIRE PARK ARPT: Closed. Services discontinued. Rnwy avail for emerg. use - no snow removal. (11-29)

HEMSTEAD-RADIO: About Sept. LFR will be shut down - modernization. (4-25)

HUGUENOT-RADIO: VOR coverage restricted to 18 n mi. 210° clockwise to 230° at MEA.

IDLEWILD-RADIO: VOR coverage 50°-75°, 17 n mi; 75°-50°, 26 n mi at min en route alt. About May 1, LFR will be decmsnd - relctn to vicinity Peconic, N.Y. Concurrently, MHW will be cmsnd at ILS OM site serving rnwy 4. Freq 353 kc. Ident: IDL. Lat 40-35-41, long. 73-48-28. (4-23)

JAMESTOWN ARPT: Const SW end NE/SW rnwy. N/S rnwy clsd-men, equip on rnwys.

LAKE PLACID: Not a seaplane base. Do not land thereon.

LIDO-RADIO: About May 20, MHW will be cmsnd. Freq: 239 kc. Ident: LDO. Lctd lat 40-35-34, long. 73-35-34. (4-29)

MASSENA-RADIO: VOR radials 82°-230° have bends.

MIDDLETOWN-RANDALL'S ARPT: Fld clsd intermittently by "X" during spring wet season acct soft spots. Circle fld - if safe to lnd operator will remove "X". (3-26)

NEWBURGH-STEWART AFB-RADIO: USAF VHF/DF bearings unreliable below 7000' in all quads. (9-23)

NEW YORK CITY AREA - SPECIAL NOTICE: Acft operating VFR be alert for all types of

NEW YORK: tfc from Newark, Teterboro, LaGuardia, Idlewild, NAS Floyd Bennett, Westchester Co. Arpt, Mitchel AFB and Rockaway Arpt. VFR acft apchg Idlewild from S or W remain well off shore until reaching a point abeam SE of Floyd Bennett. VFR departures from R31L at Idlewild, unless cleared otherwise by Idlewild twr, shall climb straight ahead to an alt of 1200' before turning left. Floyd Bennett tfc can normally be avoided by not exceeding a heading of less than 270° mag until abeam Floyd Bennett prior to proceeding on desired course. VFR acft not intending lndg at any of New York metropolitan arpts should avoid apch areas thereto below 2500'. Recommended crossing traffic plan crossing area at 2500' or above, ceiling permitting, avoid shoreline S of Flatbush, Floyd Bennett and Idlewild due hi-density tfc in that area. Acft arriving or departing Idlewild or LaGuardia requested to remain well clear of Mitchel AFB. (10-1)

NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat. within 4.3 n mi radius of arpt; in lndg join tfc pat. at or above 1200' MSL, weather permitting. This applies to New York International (Idlewild) Arpt; La Guardia Fld, N. Y. and Newark Arpt, N. J.

★NEW YORK AIR ROUTE TRAFFIC CONTROL CENTER: Also oper on 306.3 mc. (4-22)

**NEW YORK-HELIPORT #1, PIER 41, MANHATTAN: Open daylight hours on 1-hour advance notice only. Telephone ALgonquin 5-1000, ext. 666. Restricted to float and skid type helicopters. (2-7)

NEW YORK INTERNATIONAL (IDLEWILD) ARPT-TOWER: About May 22, ILS serving rnwy 22 will be cmsnd. Lclzr freq: 110.9 mc. Lctd 475' SW end of NE/SW rnwy 22. Elev: 10' MSL. Bear: 222°. Ident: IWY. Glide slope freq: 330.8 mc. Glide angle: 2.8°. Lctd 300' SE of centerline of NE/SW rnwy and 1248' from apch end of rnwy 22. Elev: 11' MSL. MM lctd 3400' from NE end NE/SW rnwy. Elev: 61' MSL. OM lctd 5.53 mi from NE end of NE/SW rnwy. Elev: 75' MSL. Alt over MM 240' MSL; OM 1500' MSL. Concurrently with cmsng of ILS, Elmont FM on back course ILS serv rnwy 4, will be decmsnd. (4-12) FLD: Lndgs and take-offs prohibited unless aircraft equipped with functioning 2-way radio, capable of direct 2-way commun with control tower. Closed to fighter type, motorless and jet propelled acft. Closed to mil acft except on official business or flag rank or higher. Caution. Use paved surfaces only. Rnwy 1L-19R, 1R-19L and 7L-25R perm closed for landings and take-offs, avail for taxiing. Rolling surface S end runway 7R-25L. NATCC preferential runway system in effect. 185' MSL control tower is highest airport structure. Caution - taxi A - acft running up on closed runways 7L-25R, S of intsxn with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Const in progress adj all paved surfaces. 150' cranes and hvy truck operns within arpt bndry - mrkd. Follow centerline all taxiways. New taxiways temp mrkd by delineators and/or taxiway lgts irregularly spaced. Unstable shoulders. Centerline apch lgtg system serving rnwy 22 cmsnd. System extends 3000' from rnwy pavement out into apch. System consists of green lights across runway at threshold, a red bar light on each side of rnwy 100' from the pavement, a red bar light on runway centerline 200' from the pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. (4-11)

NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia apch control on 119.9 mc regardless of weather. No UHF freqs avail for tower contacts. FLD: Closed to jet propelled aircraft, motorless, fighter type and aircraft over 105,000 lbs, also mil acft except those carrying high government officials. Landings and take-offs prohibited unless aircraft equipped with 2-way radio, capable of direct commun with control tower on ground control 121.7 mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. General trucking, 40' crane, men and equipment operating inside base of dike-days. 500' approach end of runway 31 not usable for lndg aircraft-days. Obstructions and equipment marked - flags days, lighted nights. Equipment parked 250 feet from centerline of runways when not in use. (9-28) Soon, combination left lane apch lgtg system serving rnwy 4 consisting of 1500' hi-intensity lgts with 3600' neon lgts will be decommissioned. Simultaneously, 3000' standard hi-intensity centerline apch lgtg system configuration A will be commissioned. (1-11) Caution-use paved surface only, sod areas unsuitable for acft operns. Amber lenses have been installed on the last 2000' of rnwys 4, 22, 13, 31. Bi-directional lgts have been installed at the apch end of rnwy 22 at a distance of 25'. (3-22) Run-up pads under const adj to SE side taxiway 1 & 9 - flagged by day lgtd at night. (4-17)

NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No night flying permitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)

NEW YORK: **NEW YORK-WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 min advance notice (tel. Longacre 4-2073). Direct commun by two-way rdo on 122.8 mc rqrd before apch and takeoff. Caution - ship tfc in area. (9-27)

NIAGARA FALLS-RADIO: VHF/DF unreliable below 3000' in NE quadrant, 4000' SE & SW quadrant and 4500' in NW quadrant. (6-22)

NIAGARA FALLS ARPT-TOWER: Lclzr and glide slope shut down. (4-25) FLD: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara Riv as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16)

NIAGARA FALLS-COLONIAL VILLAGE ARPT: Clsd due rnwy repairs. (2-23)

OGDENSBURG ARPT: E/W rnwy clsd-const. (4-24)

KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution-VOR has occasional momentary course disturbance in mountainous areas.
✱KNOXVILLE-McGHEE TYSON ARPT-TOWER: ILS glide slope operg test basis. (4-25) UHF/DF guards: 243.0 and 305.4 mc. (4-23)
NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250° have bends & roughness out of tolerance. VOR/DME signal coverage 270,-180°, 43 n mi;180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEA's and routing as follows: V-16 GHM VOR to BNA LFR via GHM 066° MEA 3000';V-16 BNA LFR direct Smithville VHF Int via CSV 284° MEA 3500'; V-16 Smithville Int to CSV VOR via CSV 284° MEA 5000'. V-140 DYR VOR to McEwen Int via DYR 083° MEA 5000'; V-140 McEwen Int to BNA VOR via BNA 266° MEA 3500'; Min hold alt at McEwen 3500'; V-140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V-140 Hartsville Int to Highway Int via BNA 056° MEA 7000'. V-7 BNA LFR to Lewisburg Int MEA 3000'. (2-28)
NASHVILLE-BERRY FLD: Taxiway btwn ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy-use as a taxiway. (12-28)
SEWANEE-UNIVERSITY OF THE SOUTH ARPT: Clsd due to rough and muddy fld. (2-19)
TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)
ALICE ARPT: Boundary lights runway 13-31 unreliable. (5-28)
AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas; Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.
AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)
AUSTIN-MUELLER ARPT-TOWER: April 15, ILS MM shut down-relctn. (4-15) During this period, ILS landing minimum rnwy 30 left raised to 300-1. (4-11) FLD: Acft landing and taking-off are cautioned to avoid Bergstrom AFB tfc pat. - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green rng lgts on rnwy 30 designates touchdown point ngts.
BEAUMONT-JEFFERSON CO. ARPT-TOWER: About May 1, ILS will be cmsnd. Lclzr freq: 109.5mc, ident: BUJ. Glide slope freq: 332.6mc. Apch bear: 113°. LMM freq: 206kc; ident:UJ. LOM freq 236kc;ident BU. MM lctd 0.4 mi, OM 4.8 mi from apch end rnwy. FLD: Rnwy 11-29 clsd-construction. (9-19) Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13)
BIG SPRING-SPECIAL NOTICE: Acft operg in vicinity of Big Spring range and Webb AFB in VFR wea exercise extreme caution due to intensive jet tfc. Alt below 5,000' saturated on Arwy Green 5 and V-16. (4-22)
BIG SPRING-RADIO: April 8, VOR shut down until approx. Aug 8-relctn to lat 32-23-06, long. 101-29-00. (3-7) During this period, VOR flgts are authorized to use BGS LFR in lieu of BGS VOR. On all arwys MEA's remain as charted. Rowena Int use 105° bear. from BGS LFR, Jack Int use 108° bear. from BGS LFR, Sterling Int use 131° bear. from BGS LFR, King Int use 186° bear. from BGS LFR, Johnson Int use 203° bear. from BGS LFR. Mustang Int use 266° bear. from BGS LFR. (4-5)
BIG SPRING-HAMILTON ARPT: Caution all alts- intensive jet trng.
COLLEGE STATION-RADIO: DME coverage 60°-90°, 26 n mi at 2000';95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)
CORSICANA-ALLISON RANCH ARPT: Clsd due to exten const on rnwys. Expected to reopen about June 1. (4-23)
CULBERSON-RADIO: About May 20, VOR/DME will be shut down until approx. June 20. (4-5) During shutdown, following MEA's authorized on V-66, V-79 using HUP VOR. HUP VOR to CXN VOR 10,000'. CXN to ARNO Int 12,500'. Arno Int to Monohans Int 14,500'. Courses as charted. Gore Int CNM radial 177° in lieu CXN 360°. MRA 10,000'. (4-22)
DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21)

TEXAS: DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000'MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution-acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions. (11-14)

EAGLE LAKE-FADIO: About May 20 VOR will be shut down until approx June 20. (4-5)

During shutdown VOR flgts authorized to use following temp MEAs, Routes and Fixes: (1) GLS 278 or HOU 262 and CLL 165° radials authorized as ELA fix in lieu VOR. MEA 4000'. (2) V180 SIH to ELA not usuable. Temp route SIH to Int V198(HOU 262° radial) via AUS 125° radial authorized.MEA 5000'. (3) V180 ELA fix to Richmond VOR Int.authorized via GLS 278° radial MEA 4000'. Richmond VOR Int to Arcola VOR Int. authorized via GLS 278° radial MEA 2000'. (4) V198 Seguin VOR Int.to ELA fix authorized via SAT 080° and HOU 262° radials. MEA 5000'. (5)Route Dacus VOR Int. to Courtney Int not usuable. Temp route Keenan VOR Int. to V15 authorized via LFK 213° radial. MEA 5000'.(6) Courtney and Cypress VOR Ints not usable. Following fixes temp redesignated: Dacus VOR Int Hou 330° and CLL 085° radials; Gulf Coast VOR Int Hou 345° radial and 125° mag bear to MNU Rbn; Fairbanks VOR Int Hou 315° radial and NE course RIC LFR; Richmond VOR Int GLS 278° and HOU 247° radials. No change in MRA's except Richmond VOR Int.which is 2000'.(4-18)

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compresser starting equip avail.

FORT STOCKTON-RADIO: About May 7, VOR will be cmsnd. Freq. 112.8 mc. Ident:FST. Lctd: lat 30-57-20, long 102-58-30. Monitoring Category (1). (4-18)

FORT WORTH-CARTER FLD: Const on a 2050' rnwy extension on SE end of rnwy 13-31. Hvy equip. and men will be in the area approx 90 days. 500' SE end of rnwy 13-31 will be clsd periodically during daylgt hrs when men and hazards will be properly mrkd. (3-21)

FT. WORTH -MEACHAM FLD-TOWER: About May 6 ILS lclzr and glide slope will be shut down until approx July 6.(4-3) Effect May 1, twr hrs opern: 0600-2200. (4-15)

GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop. (6-5)

GUTHRIE-RADIO: April 22, VOR shut down until approx May 22. (4-22) During shutdown, GTH VOR, flgts authorized to use V-102 LBB VOR -SPS VOR MEA 6000' MSL. (3-20)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°,instrument opern and apch procedures utillizing these radials, are not authorized.In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR Inst apch procedure No.1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial. (2-26)

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80' (AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron uncontrollable and unreliable- not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for tk-offs to E only; no lndgs. (3-11)

HUECO MOUNTAIN-RADIO: May 31, MHW will be cmsnd. Freq: 317 kc. Ident: HCO. Lctd lat 31-49-06, long. 105-59-42. (4-22)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

TEXAS: KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement.

KERMIT-ROBINSON ARPT: Clsd due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 100' E of rnwys 17-35 and 500' S E/W taxiway. (12-4) Rnwy 13-31 clsd for installation of hi-intensity rnwy lgts.

**LUBBOCK ARPT-SPECIAL NOTICE: ILS procedure #1, straight-in minima 400-1 until further notice. (3-2)

LUBBOCK ARPT-TOWER: Mar 4 ILS glide slope shut down until approx Sept 1. (2-25)

FLD: N 1000' rnwy 17-35 clsd to all acft until about Sept 1, for major const and ext of rnwy. Rnwy 17 threshold lgts moved 1000' S. Men and hvy equip working during daylgt hrs in the apch zone of rnwy 17. Rnwy 17-35 clsd to Convair and larger acft during const period xcpt during IFR wea conditions or with N or S winds of 20 knots or more. (3-14)

LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305°-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700'; 335°-015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700'; 060°-125°, 35 n mi at 1500'; Mar 27, VOR shut down until approx April 22 - during this period VOR flgts authorized to use LFK Rbn in lieu VOR xcpt V13E LFK to SHV unusable. Intersections, altitude and reporting points as charted. (4-15)

MARFA-RADIO: Auto. rebroadcast feature cmsnd. Rcvg 122.1, 126.7, 135.9, 255.4mc.

MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW. (7-18)

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sunday. Fld will be clsd by white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

McALLEN-MILLER INTNL ARPT: Rnwy 18 clsd for take-off and lndg. (11-26)

McKINNEY-SPECIAL NOTICE: 166' lgtd temp drilling derrick erected 3.5 n mi NW.

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300' MSL. (6-15)

NEWMAN-RADIO: About May 31, MHW will be decmsnd and relctd at Hueco Mountain.

ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 clsd. (5-16)

**PANHANDLE ARPT: Abandoned - land use changed. (4-18)

PORT ISABEL ARPT Clsd all operns - const. (7-26)

ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)

SAN MARCOS ARPT: NE/SW strip rough - caution. (8-6)

SHAMROCK ARPT: Beacon and rnwy lgts inop. (7-9)

SNOOK-RADIO: USAF H fac cmsnd. Freq 371 kc. Ident SOK, lctd lat 30-29-00, long 96-29-25. Class: MHW. Bear & dist to Bryan AFB: 355°, 8.0 n mi. (1-29)

SNYDER-WINSTON FLD: 150' (2577' MSL) lgtd rotary drilling rig erected 2552' SE N/S rnwy. (10-4)

TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hrs on Green Arwy #5 approx 134 n mi WSW of Texarkana LF rng.

TYLER-POUNDS FLD-TOWER: ILS glide slope out of tolerance from MM to touchdown - account of severe scalloping and roughness.

UVALDE-LEONA RANCH STRIP: New lndg area reported: lctd 35 n mi NW; lat 29-30, long. 100-22; elev 1720'; 1 strip - 2800' long. (1-28)

WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'; coverage over restricted Areas 219 and 443 not certified.

**WAXAHACHIE-STOCKHAM DUSTING ARPT: Abandoned. (4-19)

**WICHITA FALLS-KICKAPOO ARPT: 350' (1374' MSL) lgtd twr erected 3.8 n mi W (290°T) at lat 33-52-15, long. 98-33-07. (4-11)

Coast and Geodetic Survey
MARCH 20, 1957
PREFERENTIAL ROUTINGS
OUTBOUND FLIGHTS
DEPARTING FROM:
*IDLEWILD
LA GUARDIA
*NEWARK/TETERBORO
IDL/LGA/EWR/TEB
FIRST FIX
Route to the first fix shown will be assigned in the departure clearance.
Limit of short range clearance.
*Stillwater first fix with radar hand-off out of IDL and EWR
All operators and pilots are requested to file IFR flight plans in conformance with Preferential Routings. Pilots operating non-VOR equipped aircraft are requested to file IFR flight plans using low-frequency routes that overlie the VOR routes, whenever possible.

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods:(a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of 4° be indicated through use of the ground check or +6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 108.6 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RADAR AVAILABLE : How and Where

(14 May 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible

Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____), IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.

Continued on next page.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

(a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.

(b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
"(aircraft identification) THIS IS (name of radar site), (instructions)"
The instructions will normally consist of one of the following:

(a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)

(b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).

(c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).

(d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).

(e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
(a) radio contact with the director is lost.
(b) notified by the radar director that radar contact has been lost.
(c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.

(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) . - .. - . . . (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 50. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

FLIGHT ADVISORY AREA - SPOKANE RAPCON CENTER: Effective April 22, 1957, the Flight Advisory Area for the Spokane RAPCON Center will be as follows:

From a point 49°N 115°W southward to a point on Green 2, 25 miles E of Mullan Pass; thence S to 46°N 115°W; thence W to 46°N 117°30'W; thence NW to a point on the eastern boundary of Red 53, 25 miles NE of Walla Walla MF Radio Range; thence to a point on the W boundary of Victor 112, 25 miles NE of Lamar Intsxn; thence SW to the southeastern corner of Prohibited Area P-246; thence W and northwesterly along the southern and southwestern boundaries of Prohibited Area P-246; thence along the western boundary of Prohibited Area P-246 and the eastern boundary of Restricted Area R-247 to the northeastern corner of Restricted Area R-247; thence to a point on Green 2 and Victor 2, 25 miles E of the Ellensburg MF Range; thence N to 49°N 120°W; thence E along 49°N to point of beginning.

Also, note that the voice call is changed to Spokane center or Spokane approach control, whichever is applicable.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

✓ WASHINGTON, D. C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Maximum speed within the zone is 180 mph or 160 knots indicated airspeed unless operational limitations for a particular aircraft require greater airspeeds, in which case the aircraft shall not be flown in excess of the minimum speed consistent with the safe operational limitations of the aircraft.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

✓ RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective upon publication in the Federal Register:

(Part 608 - Restricted Area - Amendment 197)

The Grand Marais, Minnesota Temporary Area (R-187A), published on December 19, 1956, 21 F.R. 10177, is being amended by extending the effective date to June 30, 1957 for this area.

Section 608.31 is amended by changing the effective date from January 1, 1957 through March 31, 1957 to read: ".....through June 30, 1957".

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New Editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Bellingham	Pocatello	Norfolk Local	WAC 139
Boston	Portland	Seattle Local	WAC 190
Duluth	Salt Lake City	WAC 62	WAC 404
Fargo	Seattle	WAC 76	JN 44
Minot			

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AERONAUTICAL CHART CORRECTION: Correct the following Aeronautical Chart as follows:

"Little Rock Sectional Chart, 37th edition, dated February 28, 1957, change Fort Smith tower transmitting frequency from 236 kc to 269 kc."

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 12, Number 4, dated April 30, 1957, as follows:

ON REQUEST REPORTING POINTS

Under DESIGNATED: Effective June 6, 1957

(1) Page 7 - Add the following intsxns:

LIMERICK, PA. (LF) INTSXN - the intsxn of the 081°T radial of the Pottstown, Pa. VOR and the N course of the Philadelphia, Pa. LFR.

VALLEY FORGE, PA. (LF) INTSXN - the intsxn of the N course of the Philadelphia, Pa. LFR and the SW course of the Willow Grove, Pa. LFR.

(2) Page 7 - Correct the following intsxns:

Item 5 - COFFEYVILLE, KANS. (VHF) INTSXN - Change to read: "076°T radial of the Ponca City, Okla. VOR."

Item 9 - EDNA, KANS. (VHF) INTSXN - Change to read: "076° T radial of the Ponca City, Okla. VOR."

Item 19 - NEW LIBERTY, KY. (VHF) INTSXN - Change to read: "088° T radial of the Nabb, Ind. VOR."

Item 26 - STILLWATER, OKLA. (VHF) INTSXN - Change to read: "260°T radial of the Tulsa, Okla. VOR."

Under REDESIGNATED: Effective June 6, 1957

(3) Page 7 -

Disregard Item 1 - COLEBROOK, CONN. (VHF) INTSXN.

Item 5 - DECKER, IND. (VHF) INTSXN - Change to read: "086°T radial of the Centralia, Ill. VOR."

(4) Page 8 - Correct the following intsxns:

Item 18 - MONROE, IOWA (VHF) INTSXN - Change to read: "316°T radial of the Ottumwa, Iowa VOR."

Item 19 - NASHVILLE, MO. (VHF) INTSXN - Change to read: "359°T radial of the Neosho, Mo. VOR." in lieu of the Butler, Mo. VOR.

Under CANCELLED: Effective June 6, 1957

(5) Page 8 - Add the following intsxns:

ARDMORE, PA. (LF) INTSXN - the intsxn of the 082° mag radial of the West Chester, Pa. VOR and the N course of the Philadelphia, Pa. LFR.

LANSDALE, PA. (LF) INTSXN - the intsxn of the 048° mag radial of the West Chester, Pa. VOR and the 270° mag bearing from Willow Grove, Pa. LFR.

WINGS, PA. (LF) INTSXN - the intsxn of the N course of the Philadelphia, Pa. LFR and the SW course of the Willow Grove, Pa. LFR.

(6) Page 8 - Disregard the following intsxns:

Item 1 - ANDALUSIA, ALA. (LF) INTSXN

Item 5 - COOKSBURG, N.Y. (VHF) INTSXN

Item 7 - EDDY, N.Y. (VHF) INTSXN

NON-STANDARD HOLDING PATTERNS:

(7) Page 8 - Cancel the following intsxn, effective June 6, 1957:

ARDMORE, PA. (LF) INTSXN - Direction of holding - N on the N course of the Philadelphia, Pa. LFR; direction of turns - RIGHT; time - one minute; minimum altitude - 2000'.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 23. Ukiah, California. Correct CAA telephone number to read: HOmestead 2-6136.

(2) Page 27. Medford, Oregon. Correct WB telephone number to read: SPring 3-1067.

(3) Page 27. El Paso, Texas. Correct WB telephone number to read: KEystone 2-2640*.

(4) Page 28. Richmond, Virginia. Correct WB telephone number to read: FAirfield 5550*.

(5) Page 99. Radiated Test Signal. Add: Los Angeles (International 111.0 mc.).

(6) Page 99. (Airborne) Correct Billings, Montana (Municipal) VOR rcvr check point to read: 073°; at the intersection of runways 4-22 and 9-27.

(7) Page 103. (Ground) Correct Alice, Texas VOR rcvr check point to read: 270°; on taxistrip N of hangar.

(8) Page 104. (Ground) Correct Fresno, California VOR rcvr check point to read: 075°; at triple orange line on blacktop taxiway on NE side of approach end of runway 29.

(9) Page 106. (Ground) Correct Muscle Shoals, Alabama VOR rcvr check point to read: 292°; at the eastern end of runway 11-29 equi-distant from the end and both sides of the rnwy.

(10) Page 107. (Ground) Reestablish Texarkana, Ark. VOR rcvr check point to read: Location #1 - 121°; intersection of taxiway and runway 13. Location #2 - 124°; intersection of taxiway and runway 4.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

ENO	Kenton, Del., VOR (Renamed from Dover DOV)
MIE	Muncie, Ind., Muncie Arpt. (Assignment)
MTK	Matanuska, Alaska, Intsxn (Change)
XWO	Wolf Intersection, Alaska (Assignment)
3BH	Benton Harbor, Mich., Ross Field (Assignment)
DE	Klondike, Ont. (Assignment)
DI	Dolphin, Ont. (Assignment)
GG	Guelph, Ont. (Assignment)
HS	Colchester, Ont. (Assignment)
IQ	Esker Lake, Que. (Assignment)
MF	Moffat, Ont. (Assignment)
NQ	Canard, Ont. (Assignment)
NZ	Angler, Ont. (Assignment)
OO	Oshawa, Ont. (Assignment)
PF	Port Perry, Ont. (Assignment)
RZ	Ramea Island, Nfld. (Change from Rondeau, Ont.)
TQ	Ashton, Ont. (Assignment)
TU	Thurso, Que. (Assignment)
WM	Welcome, Ont. (Assignment)

MINIMUM RECEPTION ALTITUDES: Effective June 6, 1957, the MRA's at Elizabeth, Henryville and Martinsburg Intersections, Indiana, are deleted.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

✱ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is not done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg., test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not useable for navigational purposes until the stns are recmsnd at new lctns. (4-18)

BIRMINGHAM ARPT-TOWER: About June 1 MM and LMM will be shut down - relctn.(4-25)

FLD: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness & bends out of tolerance.

ALABAMA: MOBILE-BATES FLD - SPECIAL NOTICE: Unlgtd trees penetrate apch zone to all rnwys. Use caution. 200' and 1/2 mi is absolute tk-off min for all acft. (4-22)

MOBILE-BATES FLD:- Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld.

MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2). About June 6, W course LFR will be realigned from 102° to 095°. (4-24) During shutdown, MSL LFR may be used in lieu of VOR. MEAs and Int remain as charted. (4-30)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds:121.5,122.5, 126.3,126.18,243.0mc. Rdo bcn (FHU 410 Kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civilian acft have been endangered by failure to observe the requirements listed. (4-19)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at appoox 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

PHOENIX-SPECIAL NOTICE: Extreme Caution - area between Phoenix VOR & Hassayampa VOR on Victor arwy 16 and Green 5. Extensive high performance, jet acft cross these arwys when departing and arriving Luke AFB in connection with training conducted Gila Bend Restricted Area (R-309, R308). This tfc generally crosses V 16 and Green 5 between Hassayampa VOR & town of Tolleson (11 mi W of Phoenix) at alts of 5000' MSL and below 0715-1600, Mon-Fri. All flgts operg thru this area maintain at least 4000' MSL. Flights lndg or departing within area advised to exercise extreme caution below 4000' MSL.

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt mgr. See p. 50 for revised missed apch proceds.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27-B, LAX-PHX: Caution-puncture vines. (6-18)

SAN SIMON-RADIO: About June 1, VOR will be cmsnd. Freq: 115.4 mc. Ident: SSO. Lctd lat 32-16-12, long. 109-15-45. Elev: 3607' MSL. Class: VORW. Disregard spurious signals.

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000';060°-075°, 35 n mi 11,000';075°-085°, 21 n mi 11,000';090°-170°, 40 n mi 12,000'; 225-230°, 40 n mi 7,000';330°-345°, 35 n mi 11,000';345°-360°, 25 n mi 11,000'. (7-17)

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF and UHF - steers unrel beyond 35 mi at or below the following alt:(a) NW quad 10,000'; (b) SW quad 10,000';(c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: BENTON ARPT: Temp clsd to transient acft due hazardous conditions. (4-16)

**CAMDEN-HARRELL ARPT: NE/SW strip to be used in emerg only. (4-8)

ARKANSAS: PINE BLUFF-RADIO: May 6, VOR shut down until approx June 6. (5-10) Durg shutdown, VOR flights authorized to use PBF homing fac in lieu VOR except V-168 TXK to PBF unusable. Ints and alts as charted. (3-22)
TEXARKANA-RADIO: VOR shut down - relctn to lat 33-30-50, long. 94-04-20. (4-1) VOR flights authorized to use TXK LFR in lieu of VOR. (1-3)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)
ARCATA ARPT-RADIO: April 2, ILS lclzr and glide slope shut down until approx May 17 - relctn lclzr. (5-9)
AUBURN ARPT: Clsd to hvy acft. Light aircraft use extreme caution acct soft rnwys.
BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°, 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)
CAMARILLO-RADIO: All courses have multiples. (6-17)
CRESCENT CITY-RADIO: VOR arwy radials flight-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flight-checked on arwy radials only.
DINUBA-ALTA ARPT: Clsd until June 20. Unlighted until July 20. (4-22)
DIXON ARPT: Closed. (8-30)
**DOWNEY ARPT: Closed - land use changed. (3-14)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: VOR has light course roughness all quads. Only arwy radials flight-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)
LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods durg arpt const. (8-18) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230° true. (5-6) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch light lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800' - caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. Daylgt opern of cranes with 80' booms adj to apch end rnwy 30. Take-offs not affected. (3-28)
LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down - modernization. Manual bdcast contines on VOR and both VOR & LF combined. (4-26)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)
LOS ANGELES INTERNATIONAL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000'MSL beyond 30 n mi. (4-19) About June 17, gnd ctl freq 121.9 mc will be changed to 121.7 mc. (5-10) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail. 30-min req thru twr. Equip. crossing rnwy. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or between

CALIFORNIA: LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)
LUCERNE VALLEY-DOUBLE J RANCH ARPT: Length of strip reported increased to 3000'.
NATIONAL CITY ARPT: Extensive const around arpt. (7-19)
**NEEDLES, 25A, LAX-AMA ARPT: Fuel no longer avail. (4-19)
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flight should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.
OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications durg IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)
OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.
OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.
OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30)
OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)
ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)
ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg at arpt should apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea.
ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)
OXNARD-VENTURA CO. ARPT: Until approx July 31, 179' lgtd oil drilling derrick erected 1600' W and 2200' N of W end of rnwy 7. (4-30)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20° 43 n mi at 7000'.
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)
SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

[redacted]: SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)
SAN FRANCISCO INTNL ARPT-TOWER: About May 15 twr will be changed to 201 kc.(5-10)
FLD: 130' high pile-driver lctd 2000' W of term bldg- mrkd day and ngt.(2-13) Men and equip. working turf areas adj concourses B and D. All acft and equip. should be parked 20' or more from existing W edge of paved area concourse B and existing S edge of paved area concourse D. Mrkd day and ngt.(3-26)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23)
SANTA MONICA-RADIO: TVOR radials 030°,075°, 210°,260° and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)
SANTA PAULA ARPT: Work in progress S side of fld. Caution-trucks immediately S of rnwy. Area S of rnwy soft, muddy. (9-1)
SANTA YNEZ ARPT: Const in progress. Rnwy 8-26 being extended 1000' to the W. Duration of work approx one month. (4-5)
SHAFTER-KERN CO.# 14 ARPT: Auto races being held June 1 & 2. During preparation and dismantling May 25 thru June 8, tk-off and lndg indicated by arrow in fenced area E side of fld mrkd land here only. Tfc left lndg to N; right lndg to S. (5-6)
STOCKTON FLD: Intensive helicopter trng conducted in vcnty of fld btwn 0800-1700 daily xcpt Sat and Sun. Acft utilizing Stockton rdo rng for simulated rng apchs- exercise extreme caution. Minimum altitude for low apchs is 528' MSL. (8-3)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°,40 n mi at min en route alt. (3-14)
THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.(10-11)
UKIAH ARPT: Use surfaced rnwy 34-16 only. Dirt strip closed for winter. (10-26)
VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.
WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.
YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200'; lgts, BL4; fuel, F2.(1-3)

[redacted]: CHEYENNE WELLS ARPT: Closed for winter due dust. Land at own risk. (10-29)
COLORADO SPRINGS-PETERSON FLD: Caution -lndg acft-due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)
✱ DENVER-STAPLETON FLD-TOWER: May 8, VHF/DF flgt-checked and cmsnd. Freq coverage:118.1,118.3,119.3,119.5, 120.5, 120.9, 121.5, 122.1, 126.18, 135.9, 137.88 mc. Commun unreliable at 40 mi below 14000' MSL 154° to 180° and below 16,000' MSL 181°thru 243°. VHF/DF bearings reliable in these areas. (5-8)
DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segmented circle denotes rgt hand tfc. 2-way rdo rqrd.(9-12) 200' open ditch N side W end rnwy 8R-26L flag mrkd day hrs, flashing red ngt hrs. (3-26)
HUGO-RADIO: About July 1, VOR will be cmsnd. Freq: 108.2 mc. Ident: HGO, Lctd: lat 38-52-22, long. 103-24-12. Elev: 4932'. Class: VORW. (5-7)
PARSHALL-SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)

TALLAHASSEE-DALE MABRY ARPT: Lgtd steam generating plant being erected 22.6 n mi SSE, at lat 30-05, long. 84-10. (8-27) Clsd to air carrier acft exceeding 50,000 lbs except as alternate arpt. Non-air carrier acft exceeding 50,000 lbs rqr prior permission. Rnwy 9-27 clsd to air carrier ngt operns. (10-7)
TAMPA-SPECIAL NOTICE: Civil acft operg VFR in Tampa Bay area should avoid MacDill AFB control zone or remain above 2500' unless in contact with and cleared by MacDill AFB twr. Mil acft operg VFR in Tampa Bay area should avoid Tampa Intnl and Pinellas County Intnl control zones or remain above 2500' unless in contact with and cleared by the appropriate control twr. Additional caution should be exercised in entire area regardless of altitude due large numbers acft operg VFR therein. Extensive practice jet penetrations and practice instrument approaches in progress at all arpts. (7-11)
TAMPA-RADIO: VOR crs 95°-105° unusable.
TAMPA-INTNL ARPT: Rnwy 14-32 clsd to all IFR and ngt take-off and lndg. Caution unmarked obstn left side apch end rnwy 32. (1-31)
TITUSVILLE ARPT: N/S and E/W rnwys under construction - caution. (8-17)
VERO BEACH ARPT: Rnwys 3R-21L and 7R-25L clsd ngts. (2-15)
WINTER HAVEN-CYPRESS GARDENS ARPT: New arpt reported: 4 mi SE; lat 27-58-00, long. 81-41-45; elev 130'; 3 rnwys (all sod); longest rnwy 3600'; no lgtf facs; 80 oct ; repairs; operg 0900-sunset. (1-23)
GEORGIA: ALBANY ARPT: Jet acft operg from Turner AFB particulary SE of arpt. Ctc Turner twr on 126.18 mc for advisory info. If unable to ctc Turner twr ctc Albany rdo for relay. (11-18)
ALMA-RADIO: Mar 25, VOR shut down - modernization. During modification shutdown VOR flgts are authorized to use the Alma LFR in lieu of the VOR on all airway segments. MEAs remain as charted. Harris Neck, Cabins, St. Mary's Int unusable. Augusta, radial 215° usable at Dublin Int. MRA 5000'. Augusta 170° radial usable at Lott's Int, MRA 5000'. (5-7)
ALMA, SITE 43, MIA-ATL ARPT: Sod rnwys soft when wet - caution advised. (4-12)
ATLANTA-RADIO-SPECIAL NOTICE; ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun arpt. (2-26) Center advises high altitude sector with jurisdiction over airspace 25,000' and above within Atlanta Control Area now activated. All jet type acft operg on IFR flgt plans at or above 25,000' or 1000' on top should guard 301.4 mc. Within Atlanta area, this channel will be utilized to obtain tfc clearances and to forward progress reports. Weather and other info not pertinent to tfc control should be handled on 255.4 mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)
ATLANTA-RADIO: VOR courses 060°-090° out of tolerance acct bends and roughness.
ATLANTA ARPT: Arriving acft make initial ctc with Atlanta Apch Ctl on 120.7 mc regardless of wea or flgt plan. Acft not equipped for 2-way commun on 120.7 mc will use other avail freq. Rnwys 33R-15L and 27R-9L clsd. Rnwy 15-33 clsd 0730-1730E Mon-Fri until Jan 31, 1958. (5-6)
BRUNSWICK ARPT: Caution - intensive blimp training in vicinity.
BRUNSWICK-McKINNON ARPT: Rnwy 15-33 clsd to ngt operns until further notice. (2-15)
COLUMBUS-RADIO: Caution - all courses LFR have moderate to severe multiples. (8-29)
MACON-RADIO: VOR/DME usable dist 35 n mi at MEA. (5-10)
NORCROSS-RADIO: VOR courses 200°-230° out of tolerance acct scalloping.
ROME-RADIO: LF rng operg as unmonitored fac. Use of LF rng as en route or apch aid must be ADF disregarding on-course signals and pilot must monitor fac during such use.
SAVANNAH-TRAVIS FLD-TOWER: ILS BC-restricted excessive bends. Lclzr not to be used above 5000' MSL. (3 19)
SWAINSBORO-THOMPSON ARPT: Clsd - new rnwy under const. (11 20)
VALDOSTA RADIO: VOR unusable 240° clockwise thru 360°-110° acct excessive roughness and course displacement with exception of arpt apch crs 003°, usable to 10 n mi. (8 31)
IDAHO: BOISE AIR TERMINAL-TOWER: UHF/DF NE and NW quads unreliable below 14,000' beyond 40 n mi. SW and SE quads unreliable below 10,500' beyond 40 n mi.
BURLEY-RADIO: VOR coverage 130°-150, 26 n mi at min terrain clearance alt.
GRANGEVILLE-IDAHO CO. ARPT: Caution-E/W rnwy clsd; NE/SW soft on edges.(5-10)
IDAHO FALLS-FANNING ARPT: Rnwy 16-34 clsd to ngt operns - unlgtd. (4-23)
JEROME-COUNTY ARPT: Clsd due thawing conditions. Fld muddy. (2-24)
MALAD CITY-RADIO: VOR coverage 360°-20° and 50°-60°, 35 n mi at 12,000'.
STREVELL ARPT: All lgts inop. (6-23)
TWIN FALLS RADIO: VOR radials 115°-150° usable dist lmtd to 35 n mi at min terrain clearance altitude. (1-4)
TWIN FALLS-JOSLIN ARPT: Excavation 15' deep, 30' wide lctd 156' off NW end rnwy 12-30. Mrkd by line of red flags extending 36" above gnd on SE edge of excavation paralleling rnwy. Men and equip operg vcnty. (4-4)
ILLINOIS: ALTON-CIVIC MEMORIAL ARPT: Aerobatic area for student trng in following described area: Bounded by long. 89-48-and 90-00; lat 38-57 and 39-03. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL.
BRADFORD-RADIO: VOR coverage limited to 36 n mi MEA from 265° clockwise to 30°.

[redacted]: **CARBONDALE-SOUTHERN ILLINOIS ARPT: Formerly carried as Murdale Arpt. (3-27)

**CHAMPAIGN ARPT: 20' poles erected approx. 150 ft N & adj to E/W rnwy. (9-5) E/W rnwy perm clsd. (4-12)

CHAMPAIGN-UNIVERSITY OF ILLINOIS ARPT: Thru Aug 15, hvy lcl tfc Mon-Sat. Use caution while in area. (1-15) Glider operns Sat and Sun in VFR wea using N/S rnwy & 600' tfc pat. with rgt or left turns depending on tfc. (4-13)

CHICAGO AREA-SPECIAL NOTICE: Effect. Mar 31, all helicopter operns in the Chicago metropolitan area will be required to fly prescribed routes of flgt with the MDW, ORD, and Glenview Arpt Tfc Ctl Zones when the following wea conditions exist: Less than 1000' ceiling and/or less than 3 mi visibility. Charts and procedures detailing these routes are avail. from the following CAA offices: Midway, O'Hare, and Meigs Twrs, Aviation Safety Offices at Du Page Co. Arpt and 5448 S Kildare, Chicago, Ill. (3-1) 170' maximum height twrs supporting 28 mi of transmission line being erected west of Orland Park, Ill. thence southeasterly and easterly to a point on the Indiana-Illinois state line, passing 0.7 mi E of Frankfort, Ill. and 2.7 mi southwesterly of Prosperi Arpt; 0.5 mi N of Monee, Ill and 2.5 mi S of Governors Airpark. Unmarked, unlighted. (4-17)

CHICAGO-RADIO: Multiples NW course LFR. (11-9)

CHICAGO-HOWELL ARPT: 34' above gnd electric/telephone pole being erected 300' NE of NE corner. (3-12)

CHICAGO-MEIGS FLD: 450'(1041'MSL) lgtd concrete chimney being erected 2.5 n mi WSW (252°T) at lat 41-51-02, long. 87-39-11 (3-8) Caution-S end rnwy dist from threshold lgts to seawall 90'. Fld will be clsd under following wind conditions: (1) Wind 90° to rnwy, 15 knots or more to acft 1500 lbs or less. (2) Wind 90° to rnwy, 20 knots or more to single-eng acft xcpt tricycle or caster gear acft. (3) Wind 90° to rnwy, 25 knots or more to all acft.

CHICAGO-MIDWAY ARPT-TOWER: TVOR inop due excessive roughness, scalloping and bends on all existing arwys. About June 3, ILS lclzr will be shut down for approx. 3 days. FLD: 375'(968'MSL) lgtd steel stack being erected 2.5 n mi NNE(23°T) at lat 41-49-42, long. 87-43-23. (4-17) Single eng transient acft will not be allowed dock space at the N terminal bldg, must use facs of S terminal bldg. Due to non-visibility acct parked acft, twr unable to ctl single eng acft on many portions of all outer ramps. Use extreme caution on E ramp and in vcnty of both terminal bldgs. All acft will remain N of white line on S side of rnwy 27R while running up, parking or taxiing. (5-9) One experimental oscillating flasher guidance lgt installed on each side of green threshold lgts on apch end rnwy 31L. Bldg 23' above gnd(627'MSL) being erected at 41-47N, 87-45W at NE intsxn of 55th St and Cicero Ave, adj to arpt. (3-8)

CHICAGO-O'HARE INTNL ARPT-TOWER: About Sept 23, rcvr 122.5 will be changed to 122.6mc. (3-22) FLD: Due to non-visibility twr unable to ctl tfc 300'-800' W rnwy 36, 800'-1600' E apch end rnwy 9, 100'-1100' N rnwy 9-27, 800' SE intsxn rnwy 14-32, and USAF ramp due bldgs and parked acft center taxiway to ramp and black top taxiway to Slick hangar, and terminal gates 1, 2 and 3. All inbound acft equipped with appropriate multiple rdo freq shall make initial ctc with O'Hare apch ctl on 118.3mc or 348.6mc if UHF equipped regardless of wea. Landing and take-off prohibited unless acft equipped with functioning rdo capable of 2-way direct commun with ctl twr. (4-27)

CHICAGO HEIGHTS-RADIO: VOR/DME coverage limited to 03°-58°, 70°-130° and 155°-317°, 35 n mi at 2000' MSL (6-12)

DANVILLE-VERMILLION COUNTY ARPT: Caution-men and equip. on field. (10-11)

DIXON ARPT: NE/SW rnwy clsd for const-men and equip. on field daylight hours. (4-18)

EAST ST. LOUIS-PARKS METROPOLITAN ARPT: Aerobatic area for student trng in following area: Bounded by long. 90-00 and 90-15;lat 38-25 and 38-35. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500'MSL. (5-13)

GALESBURG MUN ARPT: Caution-truck on field. (2-25)

GILMAN ARPT: Closed. (10-11)

HARVEY-RADIO: About June 6, LFR will be decmsnd. (4-25)

'HIGHLAND-WINET ARPT: Caution - construction. Men, equipment on field. Strip 100 feet in width available west side of north/south runway. Use extreme caution. (5-9)

JOLIET-RADIO: VOR coverage 35 n mi at all azimuths at min en route alt. Automatic weather cmsnd August 13. (8-13)

JOLIET ARPT: Work in progress on extending 3 existing steel stacks and construction of one new stack 450' above ground(965'MSL) lctd 2 mi SE-lighted. (1-7)

KEWANEE ARPT: Men and equip. on field intermittently-caution. (6-29)

[redacted]: LOMBARD-YORK TOWNSHIP ARPT: Transmission line approx 3000' W. Height of twrs 123', not marked or lighted. (11-21)

MIDDLETOWN-RANDALL'S ARPT: Field closed intermittently by "X" during spring wet season account soft spots. Circle field - if safe to land operator will remove "X". (3-26)

NEWBURGH-STEWART AFB-RADIO: USAF VHF/DF bearings unreliable below 7000' in all quads. (9-23)

NEW YORK CITY AREA - SPECIAL NOTICE: Acft operating VFR be alert for all types of tfc from Newark, Teterboro, LaGuardia, Idlewild, NAS Floyd Bennett, Westchester Co. Arpt, Mitchel AFB and Rockaway Arpt. VFR acft apchg Idlewild from S or W remain well off shore until reaching a point abeam SE of Floyd Bennett. VFR departures from R31L at Idlewild, unless cleared otherwise by Idlewild twr, shall climb straight ahead to an alt of 1200' before turning left. Floyd Bennett tfc can normally be avoided by not exceeding a heading of less than 270° mag until abeam Floyd Bennett prior to proceeding on desired course. VFR acft not intending lndg at any of New York metropolitan arpts should avoid apch areas thereto below 2500'. Recommended crossing traffic plan crossing area at 2500' or above, ceiling permitting, avoid shoreline S of Flatbush, Floyd Bennett and Idlewild due hi-density tfc in that area. Acft arriving or departing Idlewild or LaGuardia requested to remain well clear of Mitchel AFB. (10-1)

NEW YORK: NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat within 4.3 n mi radius of arpt; in lndg join tfc pat at or above 1200' MSL, weather permitting. This applies to New York International (Idlewild) Arpt; La Guardia Fld, N. Y., and Newark Arpt, N. J.

★NEW YORK AIR ROUTE TRAFFIC CONTROL CENTER: Rcvr 122.1 mc decmsnd. (5-13) Rec'd too late for ANRA.

**NEW YORK-HELIPORT #1, PIER 41, MANHATTAN: Open daylgt hrs on 1-hr advance notice only. Telephone ALgonquin 5-1000, ext 666. Restricted to float and skid type helicopters. (2-7)

NEW YOKR INTERNATIONAL (IDLEWILD) ARPT-TOWER: About June 17, ILS serving rnwy 22 will be cmsnd. Lclzr freq: 110.9 mc. Lctd 475' SW end of NE/SW rnwy 22. Elev: 10' MSL. Bear: 222°. Ident: IWY. Glide slope freq: 330.8 mc. Glide angle: 2.8°. Lctd 300' SE of centerline of NE/SW rnwy and 1248' from apch end of rnwy 22. Elev: 11' MSL. MM lctd 3400' from NE end NE/SW rnwy. Elev: 61' MSL. OM lctd 5.53 mi from NE end of NE/SW rnwy. Elev: 75' MSL. Alt over MM 240' MSL; OM 1500' MSL. Concurrently with cmsng of ILS, Elmont FM on back course ILS serv rnwy 4, will be decmsnd. FLD: Lndgs and tk-offs prohibited unless acft equip with functioning 2-way rdo, capable of direct 2-way commun with ctl twr. Clsd to fighter type, motorless and jet propelled acft. Clsd to mil acft xcpt on offl bus or flag rank or higher. Caution. Use paved surfaces only. Rnwy 1L-19R, 1R-19L and 7L-25R perm clsd for lndgs and tk-offs, avail for taxiing. Rolling surface S end rnwy 7R-25L. NATCC preferential rnwy system in effect. 185' MSL ctl twr is highest arpt structure. Caution - taxi A - acft running up on clsd rnwys 7L-25R, S of intsxn with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Const in progress adj all paved surfaces. 150' cranes and hvy truck operations within arpt bndry - mrkd. Follow centerline all taxiways. New taxiways temp mrkd by delineators and/or taxiway lgts irregularly spaced. Unstable shoulders. Centerline apch lgtg system serving rnwy 22 cmsnd. System extends 3000' from rnwy pavement out into apch. System consists of green lgts across rnwy at threshold, a red bar lgt on each side of rnwy 100' from the pavement, a red bar lgt on rnwy centerline 200' from the pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. (4-11) On or about May 20, existing sequenced flashing lgt system serving rnwy 4 will be modified so that the entire sequenced flashing system will be 2300' long and ending 700' from the end of the rnwy. (5-7)

NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia apch ctl on 119.9 mc regardless of wea. No UHF freqs avail for twr contacts. FLD: Clsd to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. Lndgs and take-offs prohibited unless acft equipped with 2-way rdo, capable of direct commun with ctl twr on gnd ctl 121.7 mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. General trucking, 40' crane, men and equip operg inside base of dike-days. 500' apch end of rnwy 31 not usable for lndg acft - days. Obstns and equip mrkd - flags days, lgtd ngts. Equip parked 250' from centerline of rnwys when not in use. (9-28) Soon, combination left lane apch lgtg system serving rnwy 4 consisting of 1500' hi-intensity lgts with 3600' neon lgts will be decmsnd. Simultaneously, 3000' standard hi-intensity centerline apch lgtg system configuration A will be cmsnd. (1-11) Caution - use paved surface only, sod areas unsuitable for acft operations. Amber lenses have been installed on the last 2000' of rnwys 4, 22, 13, 31. Bi-directional lgts have been installed at the apch end of rnwy 22 at a distance of 25'. (3-22) Run-up pads under const adj to SE side taxiway 1 and 9 - flagged by day lgtd at ngt. (4-17)

NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No ngt flying permitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)

**NEW YORK-WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 minute advance notice (tel. Longacre 4-2073). Direct commun by 2-way radio on 122.8 mc required before apch and take-off. Caution - ship traffic in area. (9-27)

NIAGARA FALLS-RADIO: VHF/DF unreliable below 3000' in NE quad, 4000' SE and SW quad and 4500' in NW quad. (6-22)

NIAGARA FALLS ARPT-TOWER: Lclzr and glide slope shut down. (4-25) FLD: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara River as W boundary and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16)

NIAGARA FALLS-COLONIAL VILLAGE ARPT: Closed due rnwy repairs. (2-23)

OGDENSBURG ARPT: E/W rnwy clsd - const. (4-24)

PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at min en route instr alt. DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)

PLATTSBURGH MUNICIPAL ARPT: VFR tfc pat for all civil acft in vicinity of arpt is 800' to insure adequate separation from military acft and jet turbulence. Non-rdo equipped acft will not enter Plattsburgh ctl zone unless ceiling is 2500' and visibility 3 mi. Non-rdo equipped acft will maintain 2000' MSL until W of arpt. Over that position, acft shall let down to pat alt.

POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'.

ROCHESTER-MONROE CO. ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T-type hangars. Caution taxiing in these areas. No signal between sunset-sunrise to indicate gnd visibility of less than 3 mi and/or a ceiling of less than 1000'. (3-3)

TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 Knoxville is invited to the proximity of the W course of Knoxville radio rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.
BRISTOL-TRI-CITY ARPT: Hangar const in progress 350' W of N end rnwy 2-20. Height 45' unlgtd. (1-28)
CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. LFR operg as homing fac. (5-8)
CHATTANOOGA-LOVELL FLD: All acft within arpt tfc ctl zone between sunset-sunrise must be equipped with transmitter and rcvr capable of rcvg instructions from ctl twr; durg daylgt, all acft must be equipped with rcvr capable of rcvg instructions from ctl twr.
KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution - VOR has occasional momentary course disturbance in mountainous areas.
KNOXVILLE-McGHEE TYSON ARPT-TOWER: ILS glide slope operg on test basis.
MEMPHIS ARPT: Const in progress - men and equip. on fld - caution. (5-9)

TENNESSEE: NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250° have bends and roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi 180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEAs and routing as follows: V-16 GHM VOR to BNA LFR via GHM 066° MEA 3000'; V-16 BNA LFR direct Smithville VHF Int via CSV 284° MEA 3500'; V-16 Smithville Int to CSV VOR via CSV 284° MEA 5000'. V-140 DYR VOR to McEwen Int via DYR 083° MEA 5000'; V-140 McEwen Int to BNA VOR via BNA 266° MEA 3500'; Min hold alt at McEwen 3500'; V-140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V-140 Hartsville Int to Highway Int via BNA 056° MEA 7000'. V-7 BNA LFR to Lewisburg Int MEA 3000'. (2-28)

NASHVILLE-BERRY FLD: Taxiway between ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy - use as a taxiway. (12-28)

SEWANEE-UNIVERSITY OF THE SOUTH ARPT: Clsd due to rough and muddy fld.(2-19)

TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

ADDISON ARPT: Arpt reported: Type "L"; longest rnwy 2000'; remarks - work in progress enlarging NW/SE rnwy to 4500' x 100' with asphaltic concrete. (4-12)

ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)

AUSTIN - MUELLER ARPT-TOWER: April 15, ILS MM shut down - relctn. (4-15) During this period, ILS landing minimum rnwy 30 left raised to 300-1. (4-11) FLD: Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat. - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstn on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 30 with rnwy 3-21. Green range lgts on rnwy 30 designate touchdown pdint ngts. (10-4) Const in progress 1100' SE of advertised touchdown point on rnwy 30L. (5-7)

BEAUMONT-JEFFERSON CO. ARPT-TOWER: About June 1, ILS will be cmsnd. Lclzr freq: 109.5 mc, ident: BUJ. Glide slope freq: 332.6 mc. Apch bear: 113°. LMM freq: 206 kc; ident: UJ. LOM freq 236 kc; ident BU. MM lctd 0.4 mi. OM 4.8 mi from apch end rnwy. (4-30) FLD: Rnwy 11-29 clsd - construction. (9-19) Due non-visiblity twr unable to ctl tfc on ramp N of hangar #1. (2-13)

BIG SPRING-SPECIAL NOTICE: Acft operg in vicinity of Big Spring range and Webb AFB in VFR wea exercise extreme caution due to intensive jet tfc. Alt below 5,000' saturated on Arwy Green 5 and V-16. (4-22)

BIG SPRING-RADIO: April 8, VOR shut down until approx Aug 8 - relctn to lat 32-23-06, long. 101-29-00. (3-7) During this period, VOR flgts are authorized to use BGS LFR in lieu of BGS VOR. On all arwys MEAs remain as charted. Rowena Int use 105° bear. from BGS LFR, Jack Int use 108° bear. from BGS LFR, Sterling Int use 131° bear. from BGS LFR, King Int use 186° bear. from BGS LFR, Johnson Int use 203° bear. from BGS LFR. Mustang Int use 266° bear. from BGS LFR. (4-5)

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

BROWNWOOD ARPT: 500' (2000'MSL) lgtd twr being erected 5 n mi SSW (218°T) at lat 31-43-45, long. 99-01-00. (5-3)

COLLEGE STATION-RADIO: DME coverage 60°to90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

CORSICANA-ALLISON RANCH ARPT: Clsd due to exten const on rnwys. Expected to re-open about June 1. (4-23)

CULBERSON-RADIO: About May 20, VOR/DME will be shut down until approx June 20. (4-5) During shutdown, following MEAs authorized on V-66, V-79 using HUP VOR. HUP VOR to CXN VOR 10,000'. CXN to Arno Int 12,500'. Arno Int to Monohans Int 14,500'. Courses as charted. Gore Int CNM radial 177° in lieu CXN 360°. MRA 10,000'. (4-22)

DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21)

DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation take-offs not permitted. Caution-acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions.

EAGLE LAKE-RADIO: About May 20 VOR will be shut down until approx June 20. (4-5) During shutdown VOR flgts authorized to use following temp MEAs, Routes and Fixes: (1) TEXAS: GLS 278 or HOU 262 and CLL 165° radials authorized as ELA fix in lieu VOR. MEA 4000'. (2) V180 SIH to ELA not usable. Temp route SIH to Int V198 (HOU 262° radial) via AUS 125° radial authorized. MEA 5000'. (3) V180 ELA fix to Richmond VOR Int. authorized via GLS 278° radial MEA 4000'. Richmond VOR Int to Arcola VOR Int. authorized via GLS 278° radial MEA 2000'. (4) V198 Seguin VOR Int. to ELA fix authorized via SAT 080° and HOU 262° radials. MEA 5000'. (5) Route Dacus VOR Int to Courtney Int not usable. Temp route Keenan VOR Int. to V15 authorized via LFK 213° radial MEA 5000'. (6) Courtney and Cypress VOR Ints not usable. Following fixes temp redesignated: Dacus VOR Int Hou 330° and CLL 085° radials; Gulf Coast VOR Int HOU 345° radial and 125° mag bear to MNU rbn; Fairbanks VOR Int HOU 315° radial and NE course RIC LFR; Richmond VOR Int GLS 278° and HOU 247° radials. No change in MRA's except Richmond VOR Int. which is 2000'.

**EL PASO INTNL ARPT: 110' water tank lctd just SSW admin bldg has been dismantled. Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in clt zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip avail.

✱FORT STOCKTON-RADIO: May 9, VOR cmsnd. Freq: 112.8 mc, Ident: FST. Lctd lat 30-57-20, long. 102-58-33. Monitoring category (1). (5-9) Rcvd too late for ANRA page.

FORT WORTH-CARTER FLD: 274' (824'MSL) lgtd twr being erected 8 n mi SSE (169°T) at lat 32-41-42, long. 97-01-15. (4-23) Const on a 2050' rnwy extension on SE end of rnwy 13-31. Hvy equip. and menwill be in the area approx 90 days. 500' SE end of rnwy 13-31 will be clsd periodically during daylgt hrs when men and hazards will be properly mrkd. (3-21)

★FT. WORTH-MEACHAM FLD-TOWER: About June 3, ILS lclzr and glide slope will be shut down until approx Aug 3. (5-1) Effect May 1, twr hrs opern: 0700-2200. (4-15)

GREENVILLE-MAJORS ARPT: Rnwys 18R and 35L clsd until June 6 due to const. Men and equip. working during daylgt hrs. Other rnwys will be clsd intermittently until further notice. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Ngt lndgs not advisable. (5-10)

GUTHRIE-RADIO: April 22, VOR shut down until approx May 22. (4-22) During shutdown, GTH VOR, flgts authorized to use V-102 LBB VOR-SPS VOR MEA 6000' MSL. (3-20)
